In the flight of Apollo Ten - time out to unwind. Even time for congratulations. Astronauts Stafford, Cernan and Young - haveing a virtual holiday, a sort of happy hangover from that historic moon-skimming flight of yesterday. The glow of success added to by ground control at Houston where they were telling the space men: "Everyone is raving about your performance!" Gene Cernan replying simply: "Pretty satisfying - pretty challenging." Still to come - the return flight. This scheduled to start - early tomorrow morning - with splashdown in the Pacific set for Monday afternoon.
