

EISENHOWER-TRIP

L.F. - eds. Mon, June 6<sup>th</sup>. '60.

In Tokyo, today, the Socialist party held an emergency convention - to lay plans for an anti-American campaign, Against the Japanese American Security Treaty - and against President Eisenhower's trip to Japan.

One measure - will be - the mass resignation of all Socialist members of the Tokyo Parliament - one-hundred-and-fifty of them. Hoping - to force pro-American Premier Kishi to resign, Before - the President arrives.

Allied with the Socialists - are the extreme left wingers, Who have been staging riotous demonstrations - against the treaty and the Eisenhower visit.

However, Japanese government officials insist - that there's no change in the schedule for the President in Japan. Except for one minor change. President Eisenhower, we hear, will not play golf with ~~Mr~~ Premier Kishi, as had been intended.

On the island of Okinawa, today, students held a

rally - demanding that the United States hand Okinawa back to Japan. They say they'll press this agitation- with a peaceful demonstration when President Eisenhower arrives.

~~On Formosa, the belief increases - that the Chinese Reds will assail the off-shore islands of Quemoy and Matsu, as a hostile ~~in~~ demonstration - when President Eisenhower visits Formosa. Communist cannon bombarded the islands over the weekend - with another salvo ~~of shells~~, today.~~

*At any rate* *did*

## TIBET

The Panchen Lama - reported to be fleeing from  
Tibet, bound for India. *And this is* The puppet ruler of Tibetan Buddhism  
- who was installed by the Chinese Reds, *In place* - of the  
traditional spiritual and temporal ruler, the Dalai Lama.

*even this hand-picked*  
They say ~~the~~ Panchen Lama found - he could 't  
take the Communist oppression any longer, *And,* began a  
movement of mass prayer among the Tibetan people. In behalf  
of liberation.

That, we hear, played a part in the new  
insurrections - now sweeping Tibet. The Panchen Lama-  
a fugitive.

## STRIKE

At four Atlas missile bases, today - workers of the Convair Company were on strike. Three thousand members of a machinists union - who set up picket lines. Which - kept other union workers from the job. The result - a tie-up in such matters as rocket research.

The bases affected include - Cape Canaveral, Florida, and Vandenberg Field in California. However, the strike would not affect the launching of Atlas missiles, which are ready - in case of dire emergency.

At the same time, twenty-five thousand additional workers at plants of the Convair Company staged a one-day work stoppage - to discuss proposals that they should go on strike. Furthermore, there's labor unrest throughout most of the aircraft missile industry.

TRUMAN

Today, former President Truman made a statement - which promptly provoked further inquiries. He said - that, as President, he vetoed the use of espionage planes to gather intelligence information.

"I turned it down because I didn't think such flights were proper," said he.

H.S.T. gave no details - and, of course, the news reporters questioned him later on.

TRUMAN - add

This time he explained -- that in Nineteen Forty-Nine or Nineteen Fifty the idea was proposed at the State Department. Flights by espionage planes -- over Russia and China. Former President Truman said that at the time we had a plane which could ~~mm~~ have made such over flights -- at a height of ninety thousand feet. But, he rejected the notion. "I had nothing to do with the dirtiness of spying", he said, today. Adding -- that he doesn't think the spy flights are necessary now.

CHILE

Another violent earthquake - in Chile. But this one struck far to the south - down toward Tierra Del Fuego.

A region - sparsely populated. So there could be not much loss of life.

But there was immediate fear <sup>e</sup>that quake may have started another tidal wave ~~+~~ like those that caused havoc on Pacific shores far and wide, When Chile had its devastating series of shocks - last month.

VATICAN

Today, Pope John ~~the Twenty-Third~~ made ~~one of the~~  
<sup>an</sup>~~most~~ important appointments - in the preparation for the  
Ecumenical council ~~of the Roman Catholic Church. Which - is~~  
to seek ways of christian unity.

Over the weekend, the Pontiff created a number of  
commissions - for various phases of the preparatory work.  
Today, naming - Cardinal Bea to ~~be~~ head an advisory board.  
For establishing contacts, with Protestant and Eastern  
Orthodox Christians.

Cardinal Bea, a German Jesuit, is a noted biblical  
scholar. A student - of Protestant and Eastern Orthodox  
interpretations of the scriptures.

FOLLOW VATICAN

At Rochester, New York - a decision by the American Baptist Convention. Which decided against a withdrawal - from the National Council of Churches. A delegation from Wichita, Kansas, protested against continued membership in the Council - which has been ~~is~~ criticized for being too liberal. But the Baptist Convention, today, rejected the protest by an overwhelming majority.

## POLITICS

Another political argument is on. This one-  
concerning the New Mexico state convention on Saturday.

The Democrats - ■■ naming delegates to the Democratic National  
Convention.

New Mexico -considered strong for Senator Lyndon  
Johnson. But, yesterday, Senator Kennedy said - that he gets  
a good share of the votes. Seven and a half - out of seventeen.

Today, that's disputed by a claim that Johnson has  
fourteen of the seventeen. So how can the contradiction be  
resolved?

Well, on the Johnson side, the explanation is that  
some delegates who are supposedly for Kennedy - will be  
persuaded to vote for Johnson at the Convention. To which  
the retort is - that they can also be persuaded to stay with  
Kennedy.

## AUTOMOBILE

Here's a nightmare thought, you're in a speeding automobile - and the driver, at the wheel, leans back, reading the newspaper paying no attention to the road. Nightmare now - but pleasant dream of the future.

At Princeton, New Jersey, a demonstration - of an electronic highway, on which an automobile can travel - without any attention from the driver. Electronic equipment - sensing the presence of anything metallic on the road, guiding the automobile and keeping it under control, driving the car - in fact.

Of course, it must be a special kind of automobile, and that was provided by General Motors. Which equipped a couple of cars - for the demonstration today, Dick. Presenting - the automobile of the future.

## EISENHOWER

Today President Eisenhower was marching - like the West Point cadet that he was those years ago. The President - striding along with other members of the class of Nineteen Fifteen. In the annual - West Point parade.

There's no explanation of the Mix-up yesterday - when the President did not meet the heavyweight champion of the world, Ingomar Johansson. Although - the Swedish boxer had received an invitation to make the acquaintance of President Eisenhower, at a Republican fund raising dinner.

Ingo- invited, we hear, by the Republican leader in Rockland County. But, when he got to the Bear Mountain Inn, where the festivities were on - he couldn't find the Republican leader. Nor could he get a message in - to the President.

The champ and his party had tickets for the dinner - but found their table was occupied by some other people. Who - wouldn't move. So all that Ingo could do was - return to his ~~training~~ training quarters.

There's an old familiar line in the world of pugilism: "Shake the hand that shook the hand of John L. Sullivan." But President Eisenhower cannot say: "Shake the hand that shook the hand of <sup>Ingomar,</sup> ~~Johnson~~."
