TAKE ON THE DIGITAL WORLD

D'snin

Two members of Marist's Class of 2004, Damian Bednarz (left) and Timothy Nolan, are among 1,000 of America's top college and university students who in the coming year will undertake graduate study, advanced research, and teaching in more than 140 countries worldwide as Fulbright Scholars.

POLAND

Damian, of Fair Lawn, N.J, majored in political science and will travel to Warsaw, Poland, in August to begin research on "Coalition-Building in Post-Communist Poland: The SLD and Beyond." Damian is fluent in Polish and German. Tim, of Waterbury, Conn., majored in information technology and Spanish and has been awarded a teaching assistantship to Spain, where he will focus on teaching English as a second language using technology. Tim is fluent in Spanish.

While at Marist, Damian participated in the Hansard Scholars Program at the London School of Economics and Tim studied at the Complutence University in Madrid. The new Fulbright Scholars

are shown in the Student Center rotunda, in front of the American flag and flags representing countries where Marist students have studied abroad.

The prestigious Fulbright program has been sponsored by the U.S. Department of State since 1946.

A Fond Remembrance of Two Giants Who Shaped Marist College

The Marist community remembers the legacies of John J. Gartland, Jr. and Br. Paul Ambrose Fontaine, FMS, two men who were exceptionally committed to the college's ideals and selflessly devoted their time and unique talents to making Marist a distinctive liberal arts institution.

20

Honoring Marist's Heritage

On a picture-perfect autumn weekend, the dedication of the Foy Town Houses celebrated the extraordinary contributions of Marist President Emeritus Linus Richard Foy '50 to Marist College. Marist President Dennis Murray also paid tribute to a special group of Marist faculty who have served the college for at least a quarter-century.

President Dennis J. Murray goes to bat to promote Marist.

NEWS & NOTES FROM THE CAMPUS

Chair of Marist's Board of Trustees since 1994, Robert Dyson (above, left, with President Dennis Murray) has been actively involved in the development of a number of major building projects that have significantly advanced academic pursuits at the college.

Dyson Foundation Makes \$3 Million Gift for Addition to Dyson Center

The Dyson Foundation has announced a \$3 million gift to Marist to support a much-needed addition to the Margaret M. and Charles H. Dyson Center.

Rob Dyson, chairman of Marist's Board of Trustees and director and president of the Dyson Foundation, announced the gift at a board meeting Feb. 7. Mr. Dyson indicated the gift was to help address the space needs that have been created by the growth of the School of Graduate and Continuing Education and the need to create additional space for the successful programs in both the AACSB-accredited School of Management and the School of Social and Behavioral Sciences.

"Rob Dyson has been a tremendous supporter and friend of Marist College for nearly three decades," says President Dennis J. Murray. "Our thanks go to Rob and the trustees of the Dyson Foundation for this very generous gift, which will further enhance the academic space enjoyed by our students and faculty."

Mr. Dyson joined the Marist board in 1975 and has served as its chairman since 1994. The Dyson Center was built in 1990 and dedicated in honor of his parents, Charles and Margaret Dyson.

Marist To Launch Master's in Communication; Online Program To Start in Fall 2004

The School of Communication and the Arts at Marist is launching a master of arts program in organizational communication and leadership in fall 2004 pending approval from the New York State Education Department.

Courses for the new MA will begin in fall 2004 for part-time students in a 100 percent online format. Courses will be taken one at a time and require just eight weeks to complete. Part-time students will finish the degree in

two years including two summers. The format mirrors that of Marist's other successful online

programs in management and computer science. In 2005-2006 Marist will launch a full-time program in which students can finish the 30-credit degree in one year through a mix of in-person and online courses.

"Communication has long been one of the college's most popular undergraduate majors," says Dr. Guy Lometti, dean of the School of Communication and the Arts. "The degree will be a natural fit for many Marist graduates, as well as those from outside the campus community seeking advanced study in preparation for doctoral work or professional credentials." The curriculum focuses on organizational communication, which is the study of how communication functions in companies and organizations.

The School of Communication and the Arts has created the program to be applicable to a wide variety of industry professionals ranging from those involved in public relations management and human resources to those with interests in independent consulting,

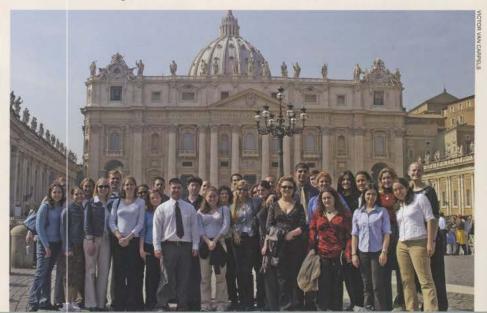

coaching and the like. A thesis/non-thesis option serves both those looking to move forward with a PhD

program following graduation and those receiving their master's degree as a professional credential.

The Marist MA in organizational communication and leadership is the only degree of its kind offered in this region of New York with the flexibility of a 100 percent online program. Applications are now being accepted for fall 2004. For more information visit the Office of Graduate Admissions online at www.marist.edu/graduate or call toll-free 888-877-7900.

An Insider's Tour of Rome

Tim Massie, Marist's chief Public Affairs officer, led 32 Marist students on a trip to Rome as part of a class, "Religious Experience in Rome," during Spring Break March 13 to 21. Tim, who lived at the North American College in Vatican City from 1985 to 1987 and studied theology at the Pontifical Gregorian University in Rome, gave the students an insider's view of the Eternal City that included a tour of excavations under St. Peter's Basilica (below) and an hour-long private visit to the Sistine Chapel.

NSF Awards Marist \$500,000 Grant for Grid Computing

The National Science Foundation awarded Marist a three-year, \$500,000 grant this past fall to support a collaborative grid for advanced Internet and research applications.

Other institutions receiving funding through NSF's Strategic Technologies for the Internet program include some very impressive company: Massachusetts Institute of Technology, Carnegie Mellon, Johns Hopkins and the University of Southern California.

Grid computing is a form of distributed computing that involves coordinating and sharing computing, application, data, storage and/or network resources among geographically dispersed organizations. Under the NSF grant, Marist is working with researchers, faculty and technical and engineering staff at Lehigh University, Rensselaer Polytechnic Institute, the State University of New York at Geneseo and IBM's Watson Research Center to develop and deploy a testbed grid-computing infrastructure. Marist is the lead institution on the project.

Marist's Linux Research and Development Center is used to test the grid infrastructure and applications deployed in the college's recent \$500,000 National Science Foundation grant. Above (left to right), Ross Mauri, general manager, e-business on demand for the IBM Corp., state Sen. Steve Saland and Marist President Dennis Murray visit the center. Sen. Saland was instrumental in establishing the center, funded by grants from New York State.

Marist Music at the Bardavon

Crowds packed the historic Bardavon 1869 Opera House in downtown Poughkeepsie for the Marist Music Department's annual spring concert April 4. Following pieces by the Chamber Singers and Singers, the Symphonic Band, conducted by Director of Music Arthur B. Himmelberger, performed with several special guests including (at left) worldrenowned alto saxophone soloist Lynn Klock. The college has a vibrant music program with more than 250 students participating in a variety of choral or instrumental activities throughout the year. Student performance opportunities include several chamber ensembles, the band, a string orchestra, several choirs, a jazz ensemble and men's and women's a cappella groups. Marist also has an active performing faculty.

First Lady Recognizes Hudson Valley Preservation Efforts

rist Lady Laura Bush has presented Putnam County, N.Y., Legislator Vincent Tamagna with a certificate of recognition for preservation efforts taking place in the Hudson River Valley. Mr. Tamagna works with Marist's Hudson River Valley Institute (HRVI) in his role as "Hudson River Navigator," an appointment made through the federal American Heritage Rivers initiative.

Mrs. Bush made the presentation in the East Room of the White House Jan. 15 to Mr. Tamagna and Dr. James Johnson, HRVI executive director. The Hudson River Valley Institute is the academic arm of the Hudson River Valley National Heritage Area.

The First Lady oversees Preserve America, a White House initiative recognizing and designating communities across the nation that protect and celebrate their heritage. Mrs. Bush announced that Putnam County was one of the first eight Preserve America communities.

Marist Appoints Dr. Andrés Fortino Dean of School of Management

r. Andrés Fortino has been named dean of the School of Management at Marist

College.

To lead the AACSB-accredited School of Management as chief academic and fiscal officer, Marist sought an entrepreneurial individual with leadership and vision to advance distinctive programs and expand new relationships with academic and corporate constituents. Dr. Fortino brings to Marist a rich background in education both in the academic environment and in industry. Most recently he served as associate dean for academic development at George Mason University's School of Management.

As an administrator and professor, Dr. Fortino pioneered a number of innovative programs including a master's in bioscience management, a master's in technology management, and an MBA for Northrop Grumman executives. He also helped shape GMU's global experience program in which all graduate students are required to participate in an international experience to develop global awareness. He holds bachelor's and

master's degrees in electrical engineering from the City College of New York and received his PhD in electrical engineering from the City University of New York.

Dr. Fortino has lectured extensively on technology worldwide and has led more than 180 high technology seminars for Learning Tree International, a company specializing in worldwide hands-on training for management and technology professionals. He has also served as the CIO and vice

president for finance of a nonprofit organization. He also worked for the IBM Corp. in its advanced technology division, where he received IBM's first invention level award for his work in semiconductor research.

The author of seven books, Dr. Fortino has practiced the application of information technology to solving business problems for

Dr. Andrés Fortino is dean of the School of Management.

the past 30 years. His scholarship also has focused on information systems development, intellectual property management and data networks. His teaching has centered on competency building, developing global awareness, the use of drama to teach management and alternative educational technologies in management education.

The School of Management offers undergraduate degrees in accounting, business and economics and

graduate degrees in business administration and public administration. The MBA and MPA are offered in both on-campus and online formats. AACSB International, the Association to Advance Collegiate Schools of Business, has accredited the college's undergraduate and graduate business programs.

Marist Names Matt Brady Head Men's Basketball Coach

Brady comes to Marist after helping lead Saint Joseph's to Elite Eight

arist College has selected Matt Brady its fifth Division I head men's basket-ball coach.

"I am happy to welcome Matt to the Marist College family," said Director of Athletics Tim

Murray at a press conference April 27 on the Poughkeepsie campus. "I am excited to have a coach of his talent and background join our staff and I look forward to Matt's leadership as we continue to build our basketball tradition." Tim Murray said Marist and Matt Brady had agreed to a four-year contract that runs through the 2007-08 season.

Coach Brady came to Marist after an 11-year stint as an assistant coach at Saint Joseph's University. During his years there, the Hawks had four NCAA Tournament appearances, three NIT berths, four Big 5 championships and three Atlantic 10 titles. This past season, he aided the Hawks in putting together one of the most successful campaigns in program history. Saint Joseph's went 27-0 during the regular season, posted a program record 30-2 overall record, earned a No. I national ranking, earned a top seed in the NCAA Tournament for the first time in school history and advanced to the Elite Eight.

"I am tremendously honored that Marist has selected me as the next head coach." Matt Brady said. "I and my family are thrilled at being given this opportunity and I am looking forward to the challenge of trying to elevate Marist College basketball back to the top of the conference."

Marist College has named Matt Brady (above) its fifth Division I head men's basketball coach.

"First and foremost, Matt Brady will maintain the integrity of the Marist men's basketball program," said President Dennis Murray. "Matt impresses me with his abilities as a leader, coach, teacher and mentor and we all welcome him to the Marist family. As a community we expect great things from him and the program."

No stranger to Northeast basketball, he

has served as an assistant coach for the past 17 seasons. He began his coaching career in 1987 as a member of Tom Penders' staff at the University of Rhode Island. He made his first NCAA appearance at URI, helping the Rams to a Sweet Sixteen berth in 1988. After two seasons with the Rams, he moved on to Wagner College, where he served as the top assistant to Tim Capstraw for four seasons before accepting his first position at Saint Joseph's.

Matt Brady was a standout player during his college days, enjoying a successful four-year career at Siena College in Loudonville, N.Y. He graduated as the school's all-time leader in assists, with 593, and is currently second all-time in that category.

He is a native of Haddon Heights, N.J., where he attended Paul VI High School in Haddon Township. A varsity basketball player at Paul VI, he was named to the 1980's South Jersey All-Decade Team.

Marist College is in its seventh-year as a member of the 10-team, Division I Metro Atlantic Athletic Conference (MAAC).

Marist Awards Prestigious McGowan Scholarship

arybeth Kunsch '05 of Cresskill, N.J., has been named a William G. McGowan Scholar and Marist's top business student for the 2004-05 academic year. The prestigious and highly competitive scholarship from the William G. McGowan Charitable Fund will provide an \$18,000 tuition award toward her senior year as an accounting major.

Named in honor of William G. McGowan, a pioneer in the telecommunications industry and the founder and longtime chairman of MCI Communications Corp., the William G. McGowan Charitable Fund qualifies a select number of colleges and universities nationwide to participate in its McGowan Scholars program. Colleges and universities may apply only if they have business programs accredited by either the Association to Advance Collegiate Schools of Business International (AACSB) or the Association of Collegiate Business Schools and Programs (ACBSP). Scholarships are then awarded through a competitive process on individual campuses.

The McGowan Charitable Fund established the McGowan Scholars program to provide significant scholarship support to the country's top students who are pursuing a business education. The program is based on the experience of William G. McGowan during his college days. Though admitted to Harvard Business School to study for an MBA degree, he did not have sufficient

funds to complete his studies. However, he won Harvard's Baker Scholars award, which provided the funds necessary for him to earn his degree and launch a successful business career.

A committee of School of Management faculty members selected Marybeth from a slate of business students nominated by management faculty. The committee reviewed norninees' academic records, leadership qualities, character and commitment to helping others. The committee also considered a 1,000-word essay required

from each nominee on the contributions of William G. McGowan to today's business world in general and to the telecommunica-

tions field in particular.

"He was a man of infinite vision, determination and self-confidence who forged new frontiers in business and personal telecommunications," Marybeth wrote in her essay. "His vision resulted in breaking up the monopoly in the telecommunications industry and bringing lower-cost long-distance service to millions of American businesses and households. Without William G. McGowan, the business world, especially telecommunica-

*Marybeth Kunsch'05 (second from left) stands outside the Margaret M. and Charles H. Dyson Center on the Marist campus with members of the William G. McGowan Scholars selection committee, (left to right) Professor Caroline Rider, Committee Chair Dr. Robert Walsh and Dr. Margaret Gagne.

tions, would be a vastly different place."

In addition to maintaining a GPA of 3.87 in her major, Marybeth has been treasurer of the junior class, treasurer of Beta Alpha Phi, an accounting honor society, and vice president of Beta Gamma Sigma, the honor society for AACSB-accredited business programs. She also has been involved in community service organizations on campus including Campus Ministry and Circle K. She will intern with KPMG in Stamford, Conn., this summer.

Marybeth says it an honor to receive a scholarship named for William G. McGowan. "It's something I'm really proud of."

NBCNEWS

Dr. Lee Miringoff (right), director of the Marist Institute for Public Opinion, and Dr. Barbara Carvalho, director of the Marist Poll, in New Hampshire provide analysis on the presidential primary to a wide range of media including NBC News.

The Marist Institute for Public Opinion has been recognized by a national independent research group for the accuracy of its polls.

MIPO and Marist students caught the attention of the national political and media communities for the accurate and informative Marist Polls on the Democratic presidential

primaries held earlier this year. Not only did the Marist Poll analyze what mattered to voters on the issues and in their candidate preferences, but its horse-race numbers were exceptionally pre-

cise. Of special note was the poll's accuracy in predicting the results of the New Hampshire

According to the Pew Research Center for the People and the Press in Washington, D.C., of the seven different polling organizations reporting their final estimates—KRC/Boston Globe/WBZ, Suffolk University/WHDH, Zogby/MSNBC/Reuters, ARG, University of New Hampshire/Fox/WMUR, Gallup/CNN/USA Today, and Marist—the University of New

Hampshire, Gallup and the Marist College surveys were among the most accurate. "The Marist College survey, in particular, predicted the election outcome almost perfectly."

The 94 Marist students participating in the surveying were led by Stephanie Calvano '04, Bridget Maroney '04, Linda Crane '05, Jill Carboni '06 and Alicia Buhse '06.

National as well as regional media carried the Marist Poll results. ABC-TV's Nightline featured the results on its evening program Jan. 26. Reporters interviewing MIPO Director Lee

Miringoff and Marist Poll Director Barbara Carvalho included CNBC's John Seigenthaler, Ernie Anastos of New York City's Channel 2 WCBS, Gabe Pressman and Jay DeDapper of New York City's Channel 4 WNBC and Dave Evans of Channel 7 WABC, as well as reporters from regional TV outlets in Albany and Burlington, Vt.

The Marist Poll's national surveys continue to monitor the presidential campaign, the candidates and the issues.

Sen. Hillary Clinton on Campus for Poughkeepsie Riverfront Forum

arist was the site of a forum Feb. 9 at which New York Sen. Hillary Clinton was a special guest.

The forum on riverfront revitalization as an economic engine for Poughkeepsie drew about 75 members of the city administration as well as business and community leaders. The forum, organized by City of Poughkeepsie Mayor Nancy Cozean, was closed to the public but open to the media.

The group met in the James A. Cannavino Library, where a dozen students had the opportunity to meet the senator and former First Lady.

U.S. Sen. Hillary Clinton of New York meets political science major Edward Summers '04 as Dr. Thom Wermuth, dean of the School of Liberal Arts and director of the Hudson River Valley Institute, looks on at a private city-sponsored forum at Marist.

Effron Lecture in Jewish Studies: On Creating a Memorial

emorials are usually considered a way to commemorate those who have been lost. But a guest speaker at Marist spoke eloquently on the idea that creating a memorial is itself part of the remembering process.

Dr. James E. Young spoke on "Memory, Countermemory, and the End of the Monument after 9/11" in the Nelly Goletti Theatre in the 27th annual William and Sadie Effron Lecture in Jewish Studies.

Dr. Young has been on two committees selecting designs for major memorials: Germany's national Holocaust memorial and the World Trade Center Site Memorial. He is chair of the Department of Judaic and Near Eastern Studies at the University of Massachusetts—Amherst. His books include At Memory's Edge: After-Images of the Holocaust in Contemporary Art and Architecture and The Texture of Memory, winner of the National

Jewish Book Award in 1994.

The audience at the lecture included Sadie Effron '79, who with her late husband, Bill, established the William and Sadie Effron Lecture in Jewish Studies in 1976 to raise awareness of Jewish history, culture and current affairs at Marist and in the community. The Effron family has been active in civic and cultural affairs in the Poughkeepsie community for many years. Many members of the family were also present at the lecture.

Dr. Joshua Kotzin, assistant professor of English, is the new coordinator of the lecture series. Dr. Milton Teichman of Marist's English faculty coordinated the series for 26 years until his retirement from teaching. Previous lecturers have included Chaim Potok, Charles Silberman, Irving Howe, David Wyman, Franklin Littell, Jane Gerber, Joseph Telushkin and Susannah Heschel.

Dr. James E. Young (fourth from left) gave the annual William and Sadie Effron Lecture in Jewish Studies. Sadie Effron '79 (fourth from right) and family members (shown) were among the audience. Mrs. Effron and her husband, Bill, established the lecture series in 1976. Dr. Joshua Kotzin (second from left) coordinated the lecture.

Marist Celebrates Three for Community Service

President Dennis Murray (far right) presented the 2003 President's Award for Community Service to (left to right) Douglas A. McHoul, who recently completed a 31-year career of public service, the Rev. John J. Brinn, a Roman Catholic priest who has served two Poughkeepsie parishes for the past 38 years, and Marguerite Townsend Palmore, an activist and volunteer for more than 60 years, at the college's 36th annual Community Breakfast.

Marist To Open One of Only Three OSDL Linux Research Sites Worldwide

Development Labs (OSDL) and will offer mainframe data center computing resources through OSDL for Linux developers, becoming one of only three OSDL-affiliated research facilities in the world. The other OSDL labs are located in Beaverton, Oregon and Yokohama, Japan.

Marist is the first college or university to become an affiliate member of OSDL through a newly established college and university

affiliate program.

OSDL is home to Linus Torvalds, the creator of Linux, and is dedicated to accelerating the growth and adoption of Linux for enterprise computing. Founded in 2000 by Computer Associates, Hewlett-Packard, Hitachi, IBM, Intel and NEC, OSDL is a nonprofit, vendor-neutral organization that sponsors Linux initiatives targeting the datacenter, telecommunications and corporate desktop markets. The lab also makes state-of-the-art computing and test facilities in the United States and Japan available to developers around the world.

"Higher education is gravitating to Linux for a number of reasons, and Marist is one of the earliest to do so," says Stuart Cohen, OSDL CEO. "As our first higher education member, Marist College will give OSDL insight into how colleges and universities use Linux today, and also a better appreciation for how it's being incorporated into computer science curricula."

Through Marist, Linux developers will have remote access to a mainframe system to run qualified projects and test Linux software. Enabling a community of users to develop and test Linux on the mainframe will further improve Linux as an enterprise operating system while building a pool of skilled developers for

Board of Trustees Welcomes Two New Members

Marist College has welcomed two new members to its board of trustees.

Alexander Reese is a director of Hudson Heritage, LLC, which is developing the former Hudson River Psychiatric Center property just north of the Marist campus. An investment banker and private investor, Mr. Reese has been involved in corporate finance and venture capital. He is also active in environmental issues and serves on the boards of Families First New York, Poughkeepsie Day

James Barnes '84

School and Grinnell Library in Wappingers Falls. He is a graduate of Yale University and holds an MBA from Columbia University. His late mother, Franny Reese, was a longtime member of Marist's board.

James Barnes '84 founded OAKLEAF Waste Management in 1995 and has served as president and CEO since its inception. He has more than 20 years of professional business experience including 14 years in the solid waste industry. As an entrepreneur he has been featured in national publications including *Fortune*. He is recognized as an industry leader and frequently is a speaker or panelist at major conferences. OAKLEAF, with more than 270 employees and current revenues approaching \$200 million, has been ranked three times in the Top 100 of the *Inc.* magazine 500 list. The company recently invested in the purchase of Integrated Process Technologies, a facilities repair and maintenance services provider based in Hartford, Conn., with revenues of \$120 million and more than 120 employees.

industry and education.

"Marist's designation as an OSDL is an important strategic move in support of further innovation, research and competitiveness in open source development," says Marist President Dennis J. Murray, an early supporter of the Linux movement. "The lab, driven by IBM's powerful zSeries 990 server, will allow Marist to work with businesses, government agencies and other universities and research centers to help develop a skilled workforce and products that will spur economic growth and enhance America's competitive edge."

Marist will make available through OSDL an IBM eServer zSeries 990 (z990) server to support the development of Linux applications and skills on the mainframe. OSDL will begin accepting mainframe project requests in the summer of 2004. Projects intended for testing on the Marist mainframe equipment will be accepted, evaluated and approved by OSDL according to its existing project submission process. For more information, visit www.osdl.org.

Marist was an early adapter of Linux technology and has an international reputation as a leader in the development of open source software. The college opened its Linux Research and Development Center in 2001.

Students and Alumni Walk All Night for American Cancer Society

Some 600 luminaria lit the way around the campus green during the overnight American Cancer Society Relay for Life at Marist. The candles were donated in honor and in memory of family and friends diagnosed with cancer. The event raised more than \$26,000.

arist College, along with the American Cancer Society's Eastern Division, hosted its first "Relay For Life" April 16 on the campus green, raising more than \$26,000 for local cancer support programs and cancer research at the state and national levels.

The 12-hour, overnight relay is a national ACS event in which teams of 10 to 15 members spend the night walking or running around a track to honor or remember those who have been affected by cancer.

A Marist student or graduate led each of the 20 teams, which also included family members and friends. A total of 275 participated.

The "Alma Mater" team, made up of alumni and their families and friends, raised \$5,075. The alumni team members included Jeanette Wherry '99, Bobby McCulloch '02, Beth Mathewson '00, Colleen McCulloch '99, Heather Rose '99, Becky Knauer '03, Catherine Coco '03 and Christine Coco '99.

Deborah Stein, executive director of the ACS Eastern Division and a student in Marist's MPA program, was impressed by the students who took part and helped coordinate the event, including event chair Katie Flynn '05, Student Government Association President Bobbi Sue Gibbons '04 and the Social Work Association, as well as Bob Lynch '75, director of Student Activities. "Everyone did a phenomenal job."

An award from the IBM Corporation to Marist has launched Project Greystone, a pilot program that benefits the college, IBM and schools in the City of Poughkeepsie while giving Marist students an opportunity to develop and test products and systems for managing the digital assets of the future.

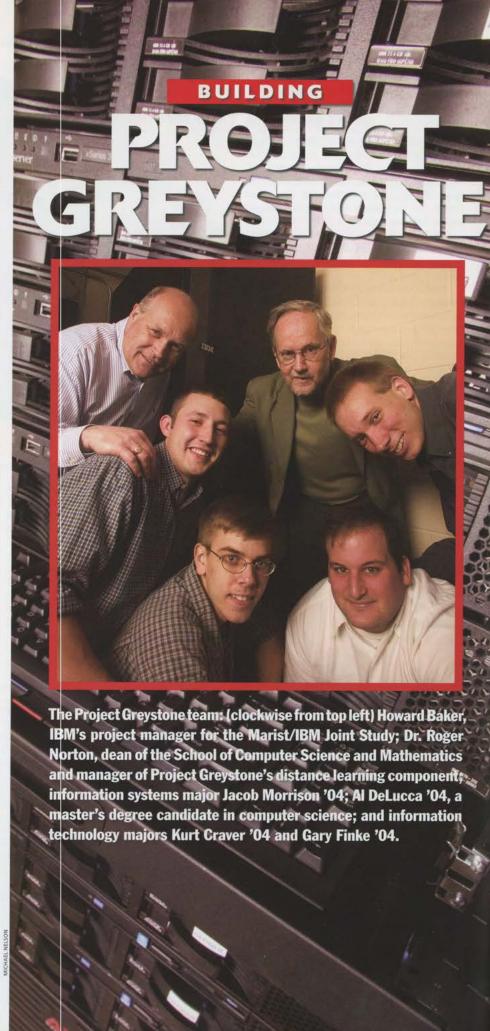

was nearly the night before Christmas and all through campus, not a creature was stirring–except for four students in the Lowell Thomas Communications Center, assembling computer components as part of Project Greystone.

Project Greystone, named after one of the original buildings on the Marist campus, is a Marist/IBM Joint Study that has excited researchers, faculty, government officials, educators and technical leaders worldwide. It uses IBM and Cisco Systems hardware in a system based on a Digital Media Distribution Solution (DMDS) with associated software to provide a rich media infrastructure to support customer applications.

The pilot program's courseware and services for an end-to-end eEducation environment were created by Marist faculty and information technology staff to benefit teachers, students and parents at schools in the City of Poughkeepsie and soon in the Highland, N.Y., School District as well.

Working over the December holiday was nothing unusual for Marist/IBM interns Al DeLucca '04, a master's degree candidate in computer science, and undergraduate information technology majors Gary Finke '04 and Kurt Craver'04 and information systems major Jacob Morrison '04. Three of them also worked 40 hours during Spring Break in March, hunched over PCs in third-floor study rooms in the James A. Cannavino Library. IBM paid them well, they say, but that's not the only reason they have put in 20 to 24 hours per week in addition to their courseloads.

They also had the opportunity to work with IBM technical experts from all over the world: e-learning architects from the IBM Pacific Development Centre in Vancouver; content management experts from Software Group in Santa Teresa, Calif.; Watson Research scientists in Yorktown, N.Y.; Systems & Technology Group Cisco Alliance experts in Poughkeepsie and in Research Triangle Park, N.C.; usability experts in Southbury, Conn.; and software engineers in IBM's lab in Boeblingen, Germany.

Hands-On Experience with Technology Experts

ustin Schilling, senior consultant for the IBM Software Group (SWG), representing the Data Management DB2 Content Management set of products, came to Poughkeepsie from IBM's Watson Research Lab in Hawthorne one day a week to work with the four interns. The architect on how Greystone would work, he built the platforms, offering education and guidance on all phases of the building process from installation to testing and deployment. He also provided, and schooled the interns on, the latest product technologies. "This opportunity to work with leading edge technologies in a customer environment is truly unique," he says. "Lots of

things that work in a laboratory environment sometimes exhibit unforeseen characteristics when moved to a 'real' environment. The interns learned to work with things that 'don't work' as planned and collaborate with the development laboratories to solve problems and enhance the products."

"It's an absolutely great benefit for my students," says Dr. Roger Norton, dean of the School of Computer Science and Mathematics and manager of Project Greystone's distance learning component. "Marist creates a mini-lab for IBM. We create a research environment for them. We refine it. They can then market it outside."

Al, who began working on Project Greystone in January 2003, says one of the great things about the internship is the hands-on experience it offers. "They trust us with a lot of stuff," he says. "Everything that gets done is done by a student."

Jacob and Kurt both came on board in April 2003. The experience has been invaluable, Jacob says. "We're doing everything from coding and applications development to systems administration and hardware configuration."

"It's been great," says Kurt, "lots of direct experience—experience I don't think we could get any other way." The experience has included installing and maintaining IBM blades, a fairly recent product that Howard Baker, IBM's project manager for the Marist/IBM Joint Study, notes very few colleges have. Blades are compact servers that fit vertically, like books on a bookshelf, into IBM's eServer BladeCenter system.

Project Greystone was partially funded as part of an IBM Shared University Research award to Marist announced in May 2003.

Austin Schilling, senior consultant for the IBM Software Group (SWG), representing the Data Management DB2 Content Management set of products, was the architect on how Project Greystone would work. He came to Poughkeepsie from IBM's Watson Research Lab in Hawthorne one day a week to guide the Marist/IBM interns on all phases of the building process from installation to testing and deployment.

The SUR award follows a long history of IBM support for computing at Marist. The college's ongoing Joint Study with the IBM Corp., begun 16 years ago, has helped Marist develop a world-class technology platform to support instructional, research and administrative initiatives, placing it among the most technologically advanced liberal arts institutions in the country. At the same time, the Joint Study has allowed IBM to use Marist as a "living lab" to test promising concepts and applications in education, business, digital media, communications and other fields. "IBM gets great feedback," says Mr. Baker.

One of IBM's goals for Project Greystone is the implementation of DMDS, a solution that enables businesses to deliver digital media, "rich media" such as live video, on existing network infrastructure. The solution comes in a stand-alone rack that includes hardware and software to create, distribute and manage rich digital media information and services. DMDS integrates Cisco Systems' latest Application and Content Networking Systems products. The DMDS components ultimately can be quickly retooled for other projects involving the creation, storage and distribution of digital media.

"The unique part is that we hope to develop more rich media content, and that's what this whole system is designed to deliver," says Mr. Baker. "We want to get to the point where we're using more rich media in the courses provided by Marist." For instance, he notes, Kurt worked with faculty member Victoria Sarkisian to deliver on demand and live streaming videos she planned to use in a college writing course this summer.

Making It Easier to Store, Search and Deliver

nother experimental task for the interns was to take content stored in instructional applications and store it in a common format called SCORM. "If you were to tag all your content according to this SCORM standard, it would make it a lot easier to search across applications," says Mr. Baker.

Jacob wrote code for SCORM, which he describes as an educational standard for describing metadata. Jacob wrote a program that can translate data, such as the title and author of a book, from a proprietary format into SCORM. Project Greystone is using SCORM to develop a single platform for creating, storing and distributing

digital assets in three diverse collections at Marist: the Emmy Awards Collection,

which is an archive of all Emmy award broadcasts in two areas, sports and documentaries; the FDR collection, which consists of images, audio, video and text material from the Franklin Delano Roosevelt Presidential Library in Hyde Park that the college is digitizing and hosting on its systems; and the Merit collection, course material reserved for Marist students to download over the Inter-

net in a 21st-century version of an academic library's Reserve Room of old.

Materials in the collections currently can be searched and downloaded, but not in one click, or by the same search engine. Each collection has unique metadata and search and browse requirements. The goal is to have all of the collections stored, searched and delivered using a single technology platform instead of the variety of systems currently in place, offering high-performance streaming on demand to the college community and the outside world.

Gary worked on the Emmy component. Although the Emmy videos have no direct connection to the distance learning courses in the Poughkeepsie schools, they offer a testbed for future projects, he notes. "Eventually, the school district or Marist will have videos that they will want to make available for viewing via streaming, like a video that is used in conjunction with an online class," Gary says. "The Emmy videos application

"This opportunity to work with leading edge technologies in a custome environment truly unique IBM's Austin Schilling say

allows us to test content management solutions so when we do have content that is directly related to the school district or online classes from Marist, it will be ready to be implemented."

Online Support and Education for Local High School Students and Teachers

roject Greystone addresses not only issues of digital asset management but also online learning and partnerships with school districts. The pilot program provides distance education to teachers and students in the City of Poughkeepsie schools. Educational modules-the rich media-include college credit courses that Poughkeepsie High School does not have the resources to offer; professional development and certification opportunities for teachers; orientation modules for new faculty; and training modules for elementary school teachers on effective classroom instruction in science and math. Full-time Marist faculty teach all courses. Marist professors also are developing the courses and modules.

"It's a great community project," says Dr. Norton. "Poughkeepsie High School is extremely happy about this particular project. It meets the needs of urban schools that have a difficulty in terms of meeting the needs of all their students."

John McCarthy, superintendent of Highland, N.Y., schools and former assistant superintendent of the Poughkeepsie School District, has been involved in the project from the beginning. "I applaud IBM and Marist for this very important initiative," he says. "It's very exciting for us, and by offering online Marist courses for our high school students, doors are opening for them that would not have been opened before. The opportunity is just phenomenal."

Delivery of the rich media involves sending it to, and storing it ahead of time on, devices installed at Poughkeepsie High School. "Part of the solution incorporates some special hardware from Cisco Systems that allows you to put that content out there beforehand," Mr. Baker says. "The teacher could select what he or she wants to make available. For instance,

they could on a Monday go to this Digital Media Distribution Solution and pick the content that they wanted to make available to their students later on in the week. Maybe at night, it would be sent over to this piece of hardware called a content engine, and it would be available for them to stream the next clay, or for the next two weeks." If

Poughkeepsie High School tried to do that without the content engine, over just a normal Internet connection, it might not work, Mr. Baker notes.

Teachers and students in the schools access the Marist resources through portals developed by the interns. The portals differ from a Web site in the way they organize data by "portlets," windows into different applications. A teacher need only log in once; his or her ID is passed along thereafter from

application to application. A teacher can use the portal to report attendance, access discussion groups, add links, access forms and check the status of any form he or she has submitted. Each teacher views a portal he or she can customize. The four interns worked with teachers and students in the Poughkeepsie schools to learn what they wanted from the pilot project. Faculty and students from the Poughkeepsie schools have provided feedback that helped with the initial development of the portal and future enhancements.

In return, teachers in the school district gain access to professional development training. "Teachers are finding it difficult to meet permanent certification requirements," says Dr. Norton. "Within five years, teachers need to get a master's. This provides them a means to get that permanent certification at a time and location convenient to them."

Project Greystone also offers teachers a mentoring program, virtual community tools such as instant messaging, email and online support groups, training on teaching math and science in elementary schools, and tools to put assignments, course materials and other content online for their students. Students, meanwhile, gain access to college credit courses and other content that the school district otherwise could not afford.

If the success of Project Greystone continues, Marist eventually could provide this e-learning package to schools, both inner-city and rural, nationwide. The project already is giving the college further experience in the delivery of online learning.

Marist's partners in Project Greystone also view it as a fruitful collaboration. "The Marist team has been outstanding to work with on Project Greystone," says Tony Sager, director, Cisco Business Development and IBM Distinguished Engineer, who manages IBM Server Group's relationship with Cisco. "Through the combined team's efforts we now

have technology that provides a Web Services-based interface to access a shared service for the distribution of multimedia. This makes multimedia distribution a horizontal function that all business applications can easily share via Web Services. I expect that as this leading edge capability becomes productized it will provide great commercial value to IBM's customers."

"This Greystone pilot is a rich media, on demand, endto-end capability, based on

an open standards solution for interactive, rich media e-learning service," says Walter W. Wiebe, IBM executive business development consultant. "Building Greystone with IBM and Cisco technology in a higher ed and industrial partnership brings to fruition a dream we've had for 15 years since we built the National Internet backbone in 1988. NSF and the Federal Networking Council were key drivers of the Advanced Distributed Learning initiative in 1996 that initiated the IEEE IMS standards. Now we have the availability of broadband networking services, low-cost high-functional PCs and servers, real time collaborative facilities and rich media services that will enable an on demand global education facility for evervone to benefit from. Greystone is a pilot example of this end-to-end capability and absolutely could not have happened without the outstanding leadership and dedication of Howard Baker and his intern team, Austin Schilling, Roger Norton and the exceptional teamwork of Marist, Cisco and IBM."

"It's been great," says Kurt Craver '04. "Lots of direct experience— experience I don't think we could get any other way."

Seniors Shine in Silver Needle Fashion Show

Twenty-six seniors created dazzling collections of sportswear, eveningwear, swimwear and more for the Marist Fashion Program's 18th annual extravaganza.

he models wore everything from silk, satin, suede and velvet to feathers, bamboo, a fishnet and a down comforter in the 18th annual Silver Needle Fashion Show.

"In my four years at Marist, I've never seen a stronger group of senior collections," says Heather Osgood, director of the Fashion Program. "There was so much variety in terms of themes, apparel category and color."

Twenty-six seniors created collections of sportswear, eveningwear, swimwear and intimate apparel for the show, held at Casperkill Country Club in Poughkeepsie in April. Themes ranged from "Empress of the Sea," featuring soft, glimmering fabrics suggesting mermaids, to "Down with Comfort," for which models wore down duvets. Three collections were inspired by confections, including "Candy is Dandy," in eye-popping purple, hot pink, bright yellow, turquoise and orange; "Sweet Tooth," complete with cotton candy and lollipops as props; and "Oh My Godiva," evoking the colors and textures of boxed chocolates.

The Silver Needle for Outstanding Garment award went to Kristin Davide for an ensemble in her collection "Aces High," reflecting the playing cards and slot machines of a Las Vegas casino. The Silver Needle for Outstanding Collection honor was awarded to Marisa Berman for her collection "Walks Like an Egyptian," highlighted by a model wrapped like a mummy.

The seniors worked throughout the academic year on their collections. During the fall, each met with an industry designer who reviewed sketches of garments, replicating the initial steps of the apparel development process in the fashion industry. The designer critics were Philip Leeming, director of design and product development at Kenneth Cole; Robert Tonner, president and CEO of the Tonner Doll Co.; Marianne Webber, owner of Webber Wear; Leong Ong, designer for Ralph Lauren; Eric Kristjanson, head designer for Kasper; Dominique Pino '99, designer for Dominique Daniela Inc.; Cherie Quinn, designer for Breaking Loose; and Kimberli MacKay '95, head designer for Betmar.

The junior design class also showed garments as part of the 2004 Amazing Threads Scholarship Competition. Their challenge: to come up with athletic apparel that could be functional and fashionable, focusing on such unusual sports as curling and spelunking. Jessica Borzone '04 won for her collection, "Equestrienne."

The rising juniors will have a hard time topping the 2004 show. "I think students are digging deeper for design inspiration every year, and it shows," says Heather Osgood. "The collections are truly a reflection of the students and their direction as young designers."

Right, the collection of Alison Voelz '04, "Candy is Dandy," drew on her passion for knitting.

Spring Break

Beyond the

ot all college students spent their Spring Break at the beach. From March 13 to 21, 15 Marist students, led by Ryan Maraziti '00/'04 M of Marist's Office of First-Year Programs, traveled to Jacksonville, Fla., to help build houses through the campus chapter of Habitat for Humanity. Kristen Roy '04 spent Spring Break chaperoning 60 high school students on a two-week community service trip to Tobati, Paraguay.

Hands-On Helping

In Jacksonville each morning the Marist students reported to the main campus of Habijax, the largest Habitat for Humanity chapter in the nation. Split up into different groups, they were sent to various sites to perform a variety of tasks. Each of the house's foundations had been professionally laid and the preliminary framing set up. The students, supervised by Americorps volunteers, did everything from landscap-

The Marist crew building a Habitat for Humanity house in Jacksonville, Fla., included (front row) Kelly O' Hanlon '04, Gwynyn Holobaugh '08, Ashley Pendelbury '07, Brie Matthews '05, (second row) Mike DeJesus '08 (second from left), Jason Miller '08, Allison Duncan '07, Corey Allen '08, (back row) Patrick Hull '08 (third from left) and Jennifer Russell '04 (far right).

Kelly O'Hanlon '04 (left) and Jennifer Russell '04 work in the rafters on a Habitaty or Hamanity home in Jacksonville

Beall

Volunteering, not vacationing, was on the minds of some caring Marist students who traveled in March to communities in Florida and Paraguay, where their skills and hard work helped make a difference.

ing and clearing yards to roofing, putting up wallboard, and painting, with each day bringing different chores.

The students found one of the most rewarding aspects of the trip to be working alongside the homeowners, who are required to put a certain amount of "sweat equity" into

their homes. The homeowners were always very grateful for the work being done.

"It was great to see the owners with a smile on their faces," says Louis Ortiz '06. "It really reinforced our purpose down there. To see them having a good time and joking around with us were highlights for the entire week."

Although not necessarily experts in building houses, the participants learned many valuable skills. "Alot of people don't realize they have the capacity to do this kind of work, but the Americorps people were very supportive," says Ryan.

The Jacksonville community was very supportive of the visitors. The Marist group stayed at a local church. The area YMCA provided free memberships that included use of the showers, gym and swimming pool. Another church hosted a

BY KERRY MCQUADE

dinner one night, and a local woman cooked dinner for them on another evening. Otherwise the volunteers cooked for themselves and ate meals together.

The participants not only volunteered their time and labor but had to pay \$100 for a site fee and raise \$9,000 to cover other expenses including airfare and food. Their main fund-raising event was a book sale at Marist, which also enabled them to donate \$600 in books to libraries at the Children's Home, Clinton Elementary School and the Astor Home.

"We are very appreciative of the support the entire Marist community offered, from President Dennis Murray and his office to Student Affairs, Sodexho Marriott Services, College Activities and First-Year Programs," Ryan says. "Everyone on campus helped us achieve our goals."

Louis is looking forward to another Habitat trip during next year's Spring Break, possibly to Arizona. The group may also try to organize a trip over the summer.

In addition to their yearly Spring Break trip, the Marist Habitat group works on a house in Wappingers Falls every Saturday morning. The group meets twice a month and has approximately 60 members. The students who made the trip to Jacksonville were Gwynyn Holobaugh '07, Jason Miller '07, Mike DeJesus '07, Jennifer Russell '04, Matt Hittenmark '06, Corey Allen '07, Jordi Iriarte '06, Patrick Hull '07, Zairia Benjamin '07, Louis Ortiz '06, Joe Tamweber '06, Allison Duncan '06, Ashley Pendelbury '05 and Brie Matthews '05, Kelly O'Hanlon '04.

Bringing Clothing, Shoes and Toys to Children

Kristen Roy made the trip to Paraguay with one of her high school Spanish teachers, Ronald Garcia at Kingswood-Oxford School, who founded the Team Tobati program in 1999 in the hope of helping a poor community in his parents' native country.

The Team Tobati program brings high school students and medical professionals to Paraguay to help construct classrooms and medical facilities where residents can receive basic medical care and children can learn English, literacy and computer skills. Currently, says Kristen, many children do not attend school, and the ones who do go only for three-hour shifts in overcrowded classes. Many students and teachers do not have school supplies.

In Tobati, a village located about an hour from Paraguay's capital, Asuncion, approximately 17,000 of the 21,000 residents are under the age of 17, according to the Team Tobati Web site. About half of the houses lack electricity and running water and 30 percent of the population makes less than \$1 per day. The main employer is a brick factory. The residents primarily speak Guaraní, with a small number speaking Spanish.

Over Spring Break, Kristen helped her group distribute clothing, shoes, toys and toothbrushes to children in the most impoverished areas. She was invited to homes consisting of one or two walls with a makeshift roof, and to meals that consisted of a handful of freshly picked string beans. Despite the living conditions, Kristen was amazed by the residents' strength of spirit. "Although they have less than we can imagine here in the U.S., their faith and spirits are the strongest I've seen. They have a great passion for life. They say they can learn a lot from us. But not as much as we can learn from them."

On a fall evening, (left to right) Joe Heavey, general manager, Marist College Dining Services, Kristen Roy '04, Anthony Dambrosia, Dining Services employee, Kaitlin Lau '04 and Daniel Gil, Dining Services employee, prepared food for delivery for Project Marist Meals. Kristen and Kaitlin took the meals to Hillcrest House, a local transitional housing facility and homeless shelter. Marist students deliver meals donated by Dining Services to the facility four nights per week.

Two years ago Kristen Roy '04 was inspired by a Social Ethics and Economics class during her sophomore year. That inspiration became an award-winning project that has been alleviating hunger in Poughkeepsie ever since.

When her class visited Hillcrest House, a local transitional housing facility and homeless shelter, it dawned on Kristen to collect unused food from Marist's dining services and give it to the facility. She collaborated with Joe Heavey, general manager of Marist's Dining Services, in creating Project Marist Meals. Today it feeds 35 people a day using food that otherwise would go to waste.

"I have always felt a particular responsibility to help those less fortunate," says Kristen. "Here at Marist everyone has pulled together to give me that opportunity. The administration, professors, Campus Ministry, the cafeteria and students have provided me with support and resources to establish this program."

Joe Heavey and his staff donate and prepare the meals, and student volunteers deliver food four days a week throughout the academic year. During 2002-03 the effort provided approximately 2,500 meals.

"This program helps us tremendously," says Hillcrest Director Chris Canale. "This allows Hillcrest to use its limited funds to shore up other areas of need, and the presence of the students is a real boost to the spirit of those who rely on the shelter for support."

"Marist Meals" Wins Award

In 2003 the Sodexho Foundation gave Joe Heavey its \$5,000 Heroes of Everyday Life Award, which recognizes Sodexho employees who help feed the hungry. Kristen says the award money will go toward perpetuating Project Marist Meals.

In addition to donating through Project Marist Meals, Dining Services provides 200 lunches for Thanksgiving Day to the Lunch Box of Poughkeepsie, 550 dinners for Christmas Day meals through Dutchess Outreach and the Eileen Hickey Foundation and 25 meals for Easter and Christmas to Grace Smith House.

Kristen says the Spring Break trip changed her life and reinforced her desire to work in Tobati. She has signed on to spend a year there beginning this August, teaching English and informing the community of

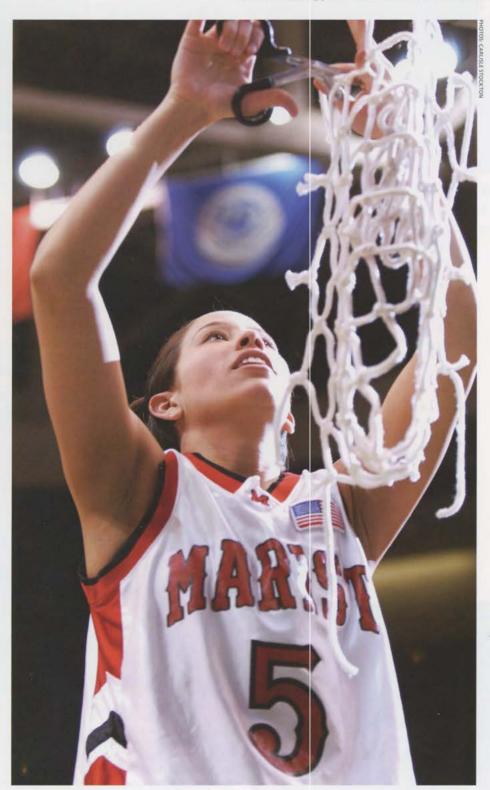

programs to benefit them. She believes the year-long commitment will be a practical application of the education she has received at Marist. Spending a semester in Ireland through the Marist Abroad program helped give her the confidence and independence to go to Paraguay. As a public relations major with a minor in public praxis, she studied social justice and issues in developing nations. Her Social Ethics and Economics class inspired her to initiate Project Marist Meals at Marist, an award-winning program that feeds some of the area's hungry by donating extra meals from the college's dining hall (see sidebar).

Kristen feels that the classes she took for her public praxis minor shaped who she became at Marist and who she is becoming as a Marist graduate. "You have to take risks, leave your comfort zones and face your fears to realize your own potential."

Women Reach NCAA

Picked preseason to finish only seventh, the women's basketball team earned its first Metro Atlantic Athletic Conference Regular Season and Tournament Championships and made its first appearance in the NCAA Tournament.

Vicki Wancel '04 helps cut down the net after leading Marist to its first-ever MAAC Tournament title and a berth in the NCAA Tournament with a win over Canisius in the title game.

t all began in preseason. Second-year Head Coach Brian Giorgis felt he had enough talent on the veteran Marist squad to take home the Metro Atlantic Athletic Conference Championship at the end of the season. To convey his confidence in his team, he handed out practice shirts that said "2004 MAAC Champions... Why Not US?"

"The team already had a year under my system, which is not an easy one to learn, and very early in preseason you could see that they seemed to be much more comfortable with it," Coach Giorgis says. "But really, they were the ones who made me confident because they believed in themselves. I can have all the confidence in the world, but if they don't believe in themselves, you're not going to get it done."

Though returning 10 players, including five seniors, to the roster, Marist was picked to finish seventh in the preseason coaches' poll, with Maureen Magarity '04 earning a spot on the Preseason All-MAAC Second Team. Disappointed by the low pick, the Red Foxes decided to use it as motivation.

It worked. The Red Foxes proved skeptics wrong as they dominated their schedule and earned Marist's first-ever MAAC Regular Season and Tournament Championships and an appearance in the 2004 NCAA Tournament. The Red Foxes finished the year with a 20-11 record, clinching only the second 20-win season in program history and first winning season in more than a decade. Marist also finished with an 11-2 record at the McCann Center, the best home record in history.

"This season was an extremely successful one. We definitely made ourselves a team to be noticed in the MAAC, especially when others said we weren't," Maureen says. "Being a senior and leaving on such a high note was a perfect way to end my basketball career and it is only the beginning for the underclassmen."

Marist opened the season winning one and losing two non-conference games. The Red Foxes began MAAC play with wins over Canisius and Niagara at home, followed by a victory over St. Bonaventure and a loss to Auburn. Despite the loss, the Red Foxes

BY KELLY McCARTHY

committed a season-low seven turnovers and had their RPI reach 71 and strength of schedule reach 59, the highest such numbers in program history.

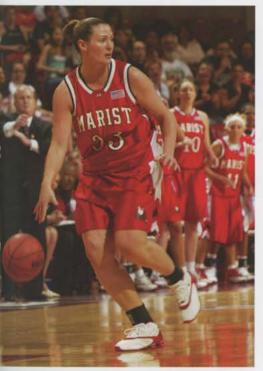

"Our strength of schedule obviously helped," says Coach Giorgis. "All of our non-conference games were close. Whether we won or not, we were in it 'til the end. When you can win close games early, it helps you win those close games down the stretch."

Coach Giorgis also credits the tight-knit group of seniors with helping the team stay focused and positive during the non-conference portion of the Marist schedule.

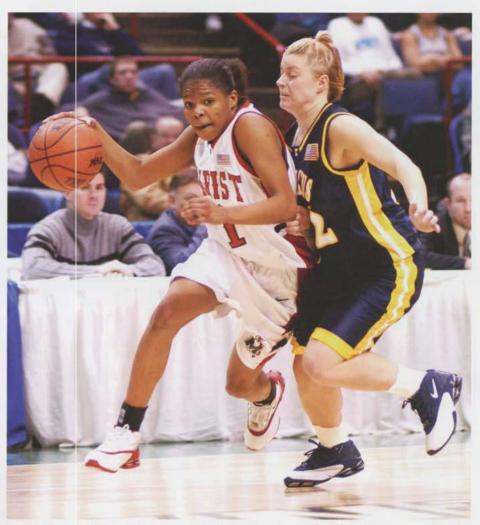

"The kids were able to endure two tough losses [Hartford and Penn] and still believe in themselves," he says. "That's what senior leadership does for you."

Following a brief holiday break, the Red Foxes headed down to the Big Easy for the Tulane DoubleTree Classic. Marist bounced Tulane out of its own tournament for the first time in history with a 60-46 victory. The Red Foxes fell 59-49 in the championship round on Dec. 28 to a very physical San Jose State team. Seniors Stephanie Del Preore and Maureen Magarity were named to the All-Tournament Team.

Late December and the month of January

Team captain Maureen Magarity '04, shown in the NCAA Tournament in Tempe, Ariz., versus Oklahoma, earned All-MAAC Second Team honors for the second straight year. She averaged 12.6 points, 4.9 rebounds and 2.5 assists per game.

Rookie Shannon Minter '07 put on a show in her first time at the MAAC Tournament, leading the Red Foxes to the title. In the championship game win over Canisius, Shannon scored seven points and had five assists in a career-high 30 minutes of play.

brought a win over Delaware State 62-50, two losses to Boston University and Manhattan and easy wins over Rider and Iona. After losing to Siena 65-55 on the road, their defeat of Fairfield 59-45 began a four-game winning streak.

In the highly contested top spot in the MAAC, the Red Foxes remained in first place with a thrilling 77-74 victory over Saint Peter's followed by a 64-56 win over Loyola. The women closed out the month of January with a 74-65 pounding of Rider at Alumni Gym. It was also a very historic occasion as Stephanie not only reached the 1,000-point plateau, but also recorded 31 points and 21 rebounds, becoming the first Red Fox to record 20+ points and 20+ rebounds in a single game and set the single game record for rebounds.

Atop the MAAC with an 8-2 record (12-7 overall), Marist was full of confidence as the team headed to Buffalo to face Niagara and Canisius. But beating the Purple Eagles and

the Griffs a second time would not come to fruition as Marist was defeated by Niagara 65-54 and Canisius 64-51.

With six games remaining on the schedule and four teams vying for the regular-season title, the Red Foxes knew losing was not an option. They defeated Manhattan, Saint Peter's and Fairfield and clinched their first winning season in 11 years with a victory at Loyola. Next, Siena edged Marist 57-51 but in their final regular-season game on Feb. 29, the Red Foxes bounced back, defeating Iona 66-61. They left the Mulcahy Center as the 2003-04 MAAC regular season co-champions, sharing with Siena their first title.

The Red Foxes earned their first twoseed and first-round bye in the 2004 HSBC MAAC Tournament, held March 5-7 at the Pepsi Arena. They overpowered the defending MAAC regular-season and tournament champion Manhattan 60-49, defeated Saint Peter's in the semifinal round 62-54 and As the buzzer sounded, the red and white of Marist stormed the court as the Red Foxes won their first MAAC Championship and their first trip to the NCAA Tournament.

triumphed in the MAAC Tournament finals over Canisius 76-74. As the buzzer sounded, the red and white of Marist stormed the court as the Red Foxes won their first MAAC Championship and first trip to the NCAA Tournament.

Stephanie Del Preore was named Tournament MVP, averaging 23 points and 11 rebounds, including a 30-point, 16-rebound performance in the final game, and Maureen Magarity was named to the All-Tournament Team, averaging 14 points, six rebounds and 2.3 assists.

More than 200 fans, friends and family gathered with the team at the McCann Center March 14 for the 2004 NCAA Women's Championship Tournament Selection Show airing live on ESPN. At approximately 5:40 p.m. the Red Foxes learned they were going to Tempe, Ariz., as a 14 seed to take on No. 3 Oklahoma (24-8) in the first round of the tournament.

"It was a great feeling to know that we got the respect by being seeded fourteenth," Stephanie says. "Getting to go somewhere warm like Arizona was the icing on the cake."

Marist, which had won eight of its last nine games, headed to Tempe with tremendous confidence. After practicing hard

Stephanie Del Preore, shown in the MAAC Tournament, was named the 2004 MAAC Tournament MVP averaging 23 points and 11 rebounds. She is ranked sixth all-time in scoring with 1,195 points and fifth in career rebounding with 709.

The women's basketball team, coached by Brian Giorgis (second row, far left), show they are Number One after winning their first MAAC Championship at the Pepsi Arena in Albany. They went on to face the University of Oklahoma in the NCAA Tournament in Tempe, Ariz.

during the three days prior to the game, the women took to the court March 20 to face the Sooners at Wells Fargo Arena.

Marist fell behind 14-2 eight minutes into the game but battled back to cut the deficit to 26-23 with 34 seconds remaining on a three-pointer by Kristen Vilardi '06. Marist headed into the half trailing by only five points at 28-23.

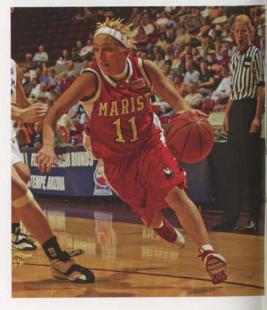

The Red Foxes struggled to score in the opening minutes of the second half, netting only four points in the first 11 minutes. Marist was down by as much as 20 points with 9:22 remaining in the game. But the Red Foxes again demonstrated their toughness. Marist scored the next 15 points in the game over the next 5:16 to close to within five points, 47-42 with 4:06 to play in the game. After a made free throw and a jumper with 3:07 to play by the Sooners, Megan Vetter '05 hit a pair of free throws to make it a two-possession game, with 2:45 to play, 50-44. Oklahoma pulled away by making 4-4 from the free throw line in the final 1:57 and outscored Marist 8-1 in the final 2:45 of play.

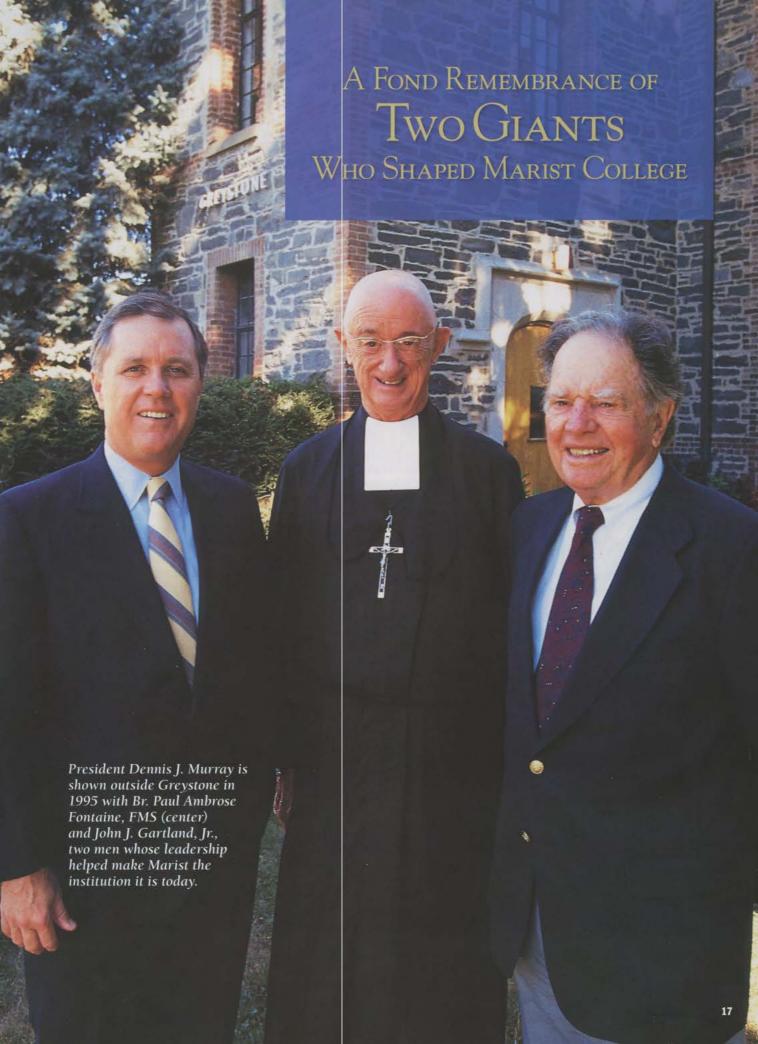

The historic and remarkable 2003-04 Marist College women's basketball season came to a close that night with a 58-45 loss. The Red Foxes finished the year with a 20-11 record, the most wins since the 1981-82 season, and a 13-5 conference record. Several Red Foxes were honored for their efforts during the season. Coach Giorgis was named MAAC Coach of the Year, and All-Met Division I Women's Basketball Coach of the Year. Center Kristin Keller '05 was named Sixth Player of the Year, while Maureen Magarity

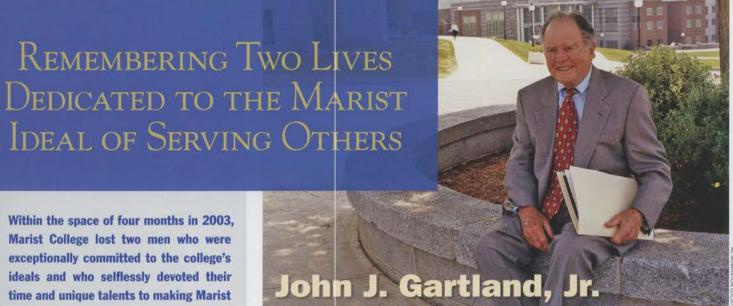

and Stephanie Del Preore were All-MAAC Second Team selections.

At the airport in Phoenix as the Red Foxes waited to head back to Poughkeepsie, an Oklahoma alumnus on his way to watch his Sooners play stopped and addressed some members of the team. "You gave Oklahoma a good run. Believe me, you had them scared." He paused and then smiled. "You all should be so proud of yourselves for how well you played."

Senior Nina Vecchio played in all 116 games during her four-year Marist career, capping it with a made free throw to clinch the Red Foxes MAAC Tournament championship game win over Canisius. Nina graduates as the all-time leader in assists with 563.

Jack Gartland is shown beside the library following a board of trustees meeting in 2000. For 20 of his 30 years on the college's board, he chaired the Buildings and Grounds Committee, overseeing projects that totaled more than \$120 million in physical plant improvements. As president of the McCann Foundation, he played a leadership role in securing important foundation grants to support the expansion and enhancement of the Marist campus.

a distinctive liberal arts institution.

On Aug. 24, John J. Gartland, Jr. died at the age of 89. Jack Gartland advised three Marist College presidents and served for three decades on Marist's board of trustees. beginning in 1969. He was an integral part of every major college decision during that period, shaping Marist both academically and physically. As chair of the board's **Buildings and Grounds Committee for two** decades, he was a force behind the college's remarkable growth.

On Dec. 27, Br. Paul Ambrose Fontaine, FMS, the founder of modern-day Marist College, died in Florida at the age of 90. Brother Paul successfully led the college's effort to receive its charter in 1946 as a bachelor's degree-granting institution and then oversaw the building of the new college's campus, faculty and academic programs for the next 12 years. After leaving Poughkeepsie for Rome to serve as assistant superior general to the Marist Brothers, in 1989 he returned to the campus where he remained an important presence, advising President Dennis J. Murray and supporting the Office of College Advancement.

President Murray, a longtime friend of both men, shared the following tributes with the Marist College community, highlighting each man's extraordinary achievements and the special character that made each so dedicated to serving others.

ohn J. Gartland, Jr. was the best of a great generation and was widely recognized as Dutchess County's most influential community leader of the 20th century.

Born in Poughkeepsie in 1914, Jack lived through the Great Depression, answered his country's call in World War II and returned home to help build the modern America we all enjoy today. In his role as senior partner in his law firm, president of the McCann Foundation and co-trustee of the Cunneen-Hackett Charitable Trust, he was a friend of good causes and sought partnerships that would benefit the residents of this region.

One can look around any part of Dutchess County and see Jack's influence. His wisdom and work benefited St. Mary's Church in Poughkeepsie, Our Lady of Lourdes High School, Our Lady of Mount Carmel Church, Saint Francis Hospital, St. Peter's Cemetery, the Astor Horne, the Bardavon 1869 Opera House, the Mid-Hudson Civic Center, the McCann Ice Arena, the McCann Golf Course. the Catholic Center in Poughkeepsie, the Community Foundation of Dutchess County, the Franklin and Eleanor Roosevelt Institute and dozens of other nonprofit organizations throughout the county.

Of course, Jack's greatest commitment was to Marist College and those affiliated with this community. His remarkable span of service to Marist dates to 1956, when he was elected chairman of the college's first lay advisory board. In 1969, he was elected to the college's board of trustees and served as chairman of the board from 1972 to 1974. For 20 of his 30 years on the board, Jack chaired the Buildings and Grounds Committee and oversaw the design and development

of the Marist campus. The construction or renovation of virtually every building on our campus was completed during his tenure as committee chair, totaling more than \$120 million in physical plant improvements. His participation was always hands-on; he attended meetings nearly every week and made frequent visits to construction sites to monitor progress. As president of the Mc-Cann Foundation, Jack played a leadership role in securing several million dollars in foundation grants to support the expansion and enhancement of the Marist campus. He took particular pride in the James J. McCann Recreation Center and the way it met the recreational needs of students at the college and in the community.

Jack oversaw more than just the physical improvements to our campus. He was an advisor to three Marist presidents and served as an important bridge between the college and the Dutchess County community. In his first year of involvement he became an advocate for expanding the college's mission by opening its doors to lay students, men in 1957 and women in 1968. In 1969, he introduced the McCann Scholars program that has awarded more than \$1.7 million in scholarships, enabling hundreds of area students to attend Marist. Jack also understood the importance of academics and helped establish Marist's first endowed chair, the Dr. Linus Richard Foy Chair in Computer Science.

Jack never sought attention or awards but, in the Marist Brothers tradition, went about doing good quietly. Yet as a college community we deservedly recognized Jack by presenting him with the President's Award

for Community Service in 1967, an award also presented to both his father and his son. In 1980 he was awarded an honorary Doctor of Humane Letters, and in 1989 the northern part of our campus, including student residences and athletic fields, was named the Gartland Commons in his honor. In 2000 Jack retired from active service on the board and was named a life trustee.

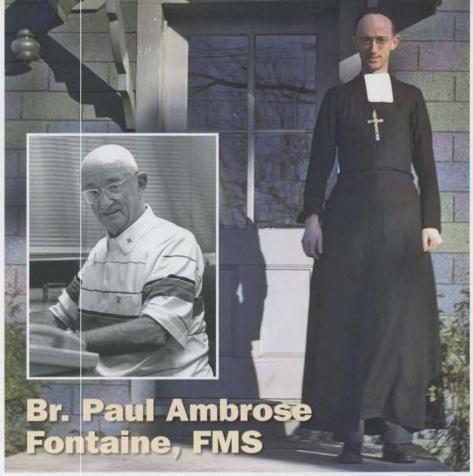

I will remember Jack as a person who loved people, had an enthusiasm for life and laughed often. He liked to tell stories, but he never preached. He let his actions speak for themselves, and the results of his work showed his true character. He gave us all a great lesson on how to live a good life.

rother Paul's life was a testimony to his faith in God and his dedication to others. He spent more than 75 years of his life as a Marist Brother, led the college's effort to receive its charter as a bachelor's degree-granting institution, made 33 trips around the world on behalf of Marist missions and served two popes as a personal emissary to Africa and Asia.

Born Leonard Edward Fontaine in Southbridge, Mass., in 1913, Brother Paul entered the Order's junior novitiate in Tyngsboro, Mass., at the age of 13. In 1927, he arrived in Poughkeepsie at the site of what was then a high school and formation center for future Marist Brothers. In 1929, the Marist Brothers' Normal Training School was only allowed to offer freshman- and sophomorelevel college courses. Following his studies in Poughkeepsie, Brother Paul transferred to Fordham University to complete his bachelor's degree in education. He also received a bachelor's degree in library science from Villanova University and a master's degree in English from the Catholic University of America in Washington, D.C.

In 1943 at the age of 29, after teaching in several schools, Brother Paul was called by his provincial to become the new Master of Scholastics at the Marist Brothers' Normal Training School. Three years later, he successfully petitioned the New York State Education Department to grant a charter, transforming the Training School into a four-year institution then called Marian College. Brother Paul remained here an additional 12 years to build the campus, the faculty and the academic program. In 1960, the charter was amended to change the name from Marian to Marist College.

Brother Paul left Marian College in 1958 when he was elected assistant superior general of the Marist Brothers worldwide. Working in Rome, his talents as the "master builder" of Marist College were put to good use as a member of the commission that supervised the major renovation of a facility that became

Br. Paul Ambrose Fontaine, FMS became Master of Scholastics at the Marist Brothers' Normal Training School in 1943 at age 29. He successfully led the college's effort to receive its charter in 1946 to grant bachelor's degrees and then oversaw the building of the new college's campus, faculty and academic programs. Above, circa 1949, he is shown by a classroom located in the building (no longer there) known as "the Pullman" because of its original use as a dormitory. In his later years when he lived on the Marist College campus, Brother Paul volunteered actively for the Office of College Advancement. He served several terms as national chair of the Marist Fund and, along with Br. Richard Rancourt, FMS, helped create a successful framework for the Marist Fund campus campaign. He often helped with phonathons for the Marist Fund (inset). He also chaired the campus division for the two-year library capital campaign, and his leadership inspired an impressive \$169,592 in gifts from Marist faculty and staff.

the new Marist Brothers' General House. He also supervised construction of the English-speaking second Novitiate in Fribourg, Switzerland, and established Marist schools and expanded apostolates in India, Japan, Pakistan, Sarawak and Sri Lanka.

In 1989 while serving in Liberia, Brother Paul contracted malaria. I asked him to return to Marist to recuperate and make the Kieran Gate House his retirement home. He returned to the college, but he never retired. He continued to be a strong presence on campus and around the world until moving to Florida in 2001.

Many of us have special memories of Brother Paul. One that stands out in my mind occurred on Nov. 8, 1997. Before a private audience with Pope John Paul II, we were invited with a handful of others to join the Holy Father in his private chapel in the papal apartment for 7 a.m. Mass. His Holiness asked Brother Paul to proclaim the First Reading during that liturgy. As I watched Brother Paul standing shoulder to shoulder

with Pope John Paul, I could feel the special bond between them—two men who devoted their entire lives to the service of God, the Church and the people of the world.

During his life, Brother Paul received many awards and honors. In 1972 Marist College awarded him an honorary Doctor of Humane Letters degree. In 1997 Pope John Paul II awarded Brother Paul one of the highest honors of the Roman Catholic Church, the "Cross Pro Ecclesia et Pontifice" (for the Church and the Pontiff). In 2000 Fontaine Hall, the home of our School of Liberal Arts, the Marist Institute for Public Opinion and the Office of College Advancement, was named in honor of Br. Paul Ambrose Fontaine.

Knowing the life Brother Paul lived, I am confident he has joined the communion of saints and will be interceding for all of us in heaven.

Dr. Dennis J. Murray is president and professor of public policy at Marist College.

HONORING MARIST'S HERITAGE

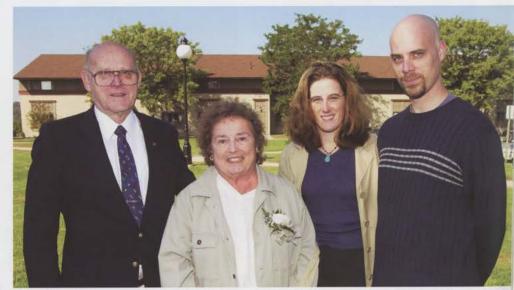

Marist's 2003 Homecoming/Reunion celebration was one for the archives. On a picture-perfect autumn weekend, the dedication of the Foy Town Houses celebrated Marist President Emeritus Linus Richard Foy '50 for his extraordinary contributions to Marist College. Marist **President Dennis Murray also paid tribute** to a special group of Marist faculty who have served the college for a quartercentury.

President Dennis Murray (right) presents a commemorative gift to President Emeritus Richard Foy '50.

Dr. Foy greets one of the many guests at the dedication ceremony.

Several hundred people attended the dedication of the Foy Town Houses during Homecoming/Reunion Weekend 2003. The dedication honored Marist President Emeritus Richard Foy (far left), shown here with (left to right) his wife, Mary, their daughter, Bridget Foy Pomerantz '98, and their son, Peter '95. Dr. Foy served as Marist's president from 1958 to 1979. The Foy Town Houses are located across from the Dyson Center.

Dr. Foy was

appointed

president of

the college in

1958 at age 28,

the youngest

college

president in the

United States.

Foy Town Houses Dedicated to President Emeritus Richard Linus Foy '50

ast fall on the lawn in front of the newly named Foy Town Houses, President Dennis Murray told several hundred alumni and friends about the remarkable growth and advancement of the college under Dr. Foy's leadership.

Dr. Foy was appointed president of the college in 1958 at age 28, the youngest college president in the United States. During his 21-year tenure, enrollments grew from 150 to more than 2,000 students and curricula expanded to include 23 majors. Dr.

Foy oversaw major growth in the college's physical plant, in particular construction of 14 new facilities, as well as its operating budget, which went from \$27,000 in 1958 to more than \$10 million in 1979. He established an evening division and introduced the college's first graduate programs. He offered student housing on campus and opened the college to women. In 1959 he installed an IBM 1401

computer at Marist, enabling the college to initiate academic programming in computer science and apply the new computer to support operations in Marist's key administrative offices, and starting the institution on its path to becoming one of the premier schools for using information technology in teaching and learning. Also on his watch, ownership of the college was transferred in 1959 from the Marist Brothers to the Marist College Educational Corporation with an independent board of trustees, and Marian

College became Marist College.

Dr. Foy was also a hands-on president. He taught an undergraduate course in mathematics each semester and was very active in civic affairs.

After leaving the presidency in 1979 he was appointed a life trustee of Marist and had a successful career with a major executive search firm, Boyden Associates. The Dr. Linus Richard Foy Chair in Computer Science, named for him, was established at Marist in 1983.

> Dr. Foy earned three degrees in mathematics: a BA at Marist in 1950, summa cum laude, an MS at St. John's University in 1954 and a PhD at New York University in 1962. He was awarded honorary doctorates from Iona College in 1961 and Marist College in 1979. Prior to his appointment as president of Marist, he taught math and physics at St. Ann's Academy and Cardinal

Haves High School in New York City; he also served as a guidance counselor at the former school. He was born in the Bronx, N.Y., and joined the Marist Brothers order following graduation from high school.

Dr. Foy spent 24 years as a Marist Brother before leaving the order. His wife, Mary Foy, was at his side during his 21 years as president and again at the dedication which their son, Peter '95, and their daughter, Bridget Foy Pomerantz '98, also attended.

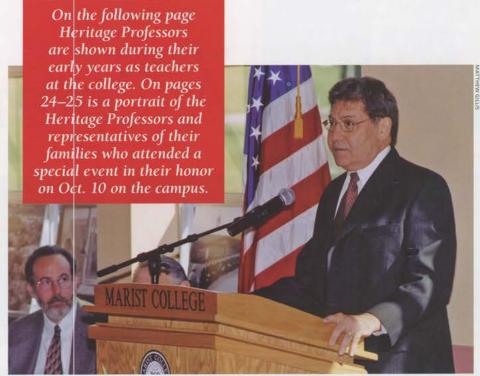

39 Honored as Heritage Professors

twastruly a homecoming for some former professors on the first day of Reunion Weekend 2003 as they arrived at the Marist library for a photo-taking session. The occasion was the designation of a group of 39 faculty as Heritage Professors, and past and present faculty members greeted each other with joy. It wasn't easy to tear them away from their conversations to climb risers for an official photo commemorating the day and their service to Marist.

After the photo session, the group moved to a luncheon in the Cabaret, where President Murray presented awards to the faculty members designating them as Heritage Professors. The designation had originally come from Marist's board of trustees, who earlier in the year had voted unanimously to establish a special honor recognizing faculty who were deeply committed to advancing Marist from its earliest years to the present day.

Each of the Heritage Professors served Marist for at least 25 years and began his or her tenure at the college before 1971. Included within this group were individuals whose actions ranged from the construction of campus buildings and judicious management of college resources to the development of academic policies and traditions that enabled Marist to establish itself as a well-respected institution of higher learning.

President Murray also honored President Emeritus and Life Trustee Linus Richard Foy '50 and Anthony V. Campilii '62, CFO/vice president for business affairs, who was designated a Heritage Executive. President Murray recognized both for their contributions and leadership as longtime administrators.

Richard Lewis, associate professor of art and chair of the faculty (seated), and Dr. Richard La Pietra addressed the group of newly designated Heritage Professors.

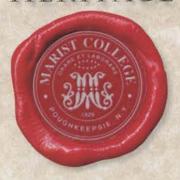

Heritage Professor Roscoe Balch (center) visits with former Dean of Students and Director of Development Tom Wade and his wife, Ann.

HONORING MARIST'S HERITAGE

n Oct. 10, 2003, Marist College President Dennis Murray presented awards to faculty members designating them as Heritage Professors. Earlier in the year, Marist's board of trustees had voted unanimously to give special recognition to a group of faculty who were deeply committed to advancing Marist from its earliest years to the present day. The board had voted to designate a unique group of 39 faculty as Heritage Professors.

Each of the faculty members served Marist for at least 25 years and began his or her tenure at the college before 1971. Included within this group were individuals whose actions ranged from the construction of campus buildings and judicious management of college resources to the development of academic policies and traditions that enabled Marist to establish itself as a well-respected institution of higher learning.

President Murray also honored President Emeritus and Life Trustee Linus Richard Foy '50 and Anthony V. Campilii '62, CFO/vice president for business affairs, who was designated a Heritage Executive. President Murray recognized both for their significant contributions and leadership as longtime administrators.

Covering the Human Drama of Sports

lan O'Connor '86, the award-winning USA Today columnist, is one of the nation's distinctive voices in sports journalism.

ighteen summers ago, Ian O'Connor '86 packed his bags and headed for the Arizona desert.

Behind the wheel of an orange 1976 Ford Pinto with no air conditioning, it was a cross-country journey that was at times difficult to endure. Once there, however, it was the start of a career that has produced one of the most prominent sports writers

in the country.

Ian is a sports columnist for USA Today, the Journal News of Westchester (N.Y.), and their parent company, Gannett Newspapers. He has worked for the New York Times and New York's Daily News, been nominated for the Pulitzer Prize and received the prestigious Sigma Delta Chi Award signifying the best sports column writing in America.

Suffice it to say, the self-described "lazy, clueless" college guy who spent his freshman year in sweatpants has found his niche. "I knew from an early period that this guy had everything you need to be a good sports writer," says Jack Curry, a baseball writer for the *New York Times* who started work at New Jersey's *Star-Ledger* on the same day as lan in 1986. "I instantly liked him."

Today, Ian writes four columns each week for the *Journal News*, many of which are syndicated nationally throughout Gannett's 100 newspapers. While it's now common to see him in the Yankees' locker room after a World Series game or interviewing athletes from around the globe at the Olympics, his future was not always so certain.

"I really didn't have any long-term direction," Ian recalls about his early college days.

That all changed when he met with journalism professor David McCraw midway through his freshman year. Noting the student's high grade point average, strength in English and love of sports, the professor directed Ian toward *The Circle*.

"He was always a student who had a little something more than even the other very good students," says Mr. McCraw, who taught journalism at Marist from 1981 to 1992. "It wasn't just that Ian understood sports. He also had great intuition about journalism and how to tell a story."

Mr. McCraw has since pursued a career in law, currently serving as legal counsel for the New York Times. Even today, however, lan credits the former teacher with steering him toward success. "He pushed me to do more," he says. "He was certainly one of the best teachers Marist has ever had."

Ian completed his senior year with a keen eye on the future. He was awarded one of just 20 Pulliam Fellowships, one of the country's most prestigious journalism internships.

The fellowship took him out west, where he spent the summer at the *Arizona Republic*. Before he left, Ian received some inspirational words from Marist President Dennis Murray.

"You did great work here," Ian recalls Dennis Murray telling him as he received his diploma at the 1986 commencement ceremony. "I think you're going to go out and make the college proud."

BY JEFFREY DAHNCKE '01

The sports columns of The Circle, Marist's student newspaper, carried Ian O'Connor's first bylines.

Ian O'Connor '86 outside Madison Square Garden in New York City

Those words stuck with him as Ian put his head down and began working his way toward the top of his field. After the summer in Arizona, he landed the job at the *Star Ledger*. It wasn't the most glamorous position, often focused on town meetings and death notices, but it built a foundation.

A little over a year later, he accepted a clerk position at the *New York Times*. Thrilled to be at the "beacon of American journalism," he seized the opportunity.

"I answered a million phones and tried to impress the editors there with my work ethic," he says. "I was able to slowly but surely write more and more, and do less and less of the grunt work."

The editors took notice, and one of them brought Ian along when he went to work at the *National Sports Daily* in 1990. Although the paper lasted just 18 months, it advanced Ian's career enough to tee up a position at the *Daily News* in 1991.

"That was a big break for me. It really raised my profile," he says. "That's where I was able to make a name for myself."

It's also where he picked up his Pulitzer Prize nomination for a story he wrote about Les Cason, a former high school basketball standout whom he found dying of AIDS in New York's Washington Square Park.

By 1994, he was a daily columnist for the paper. In 1998, Gannett came calling. Feeling he had possibly reached the ceiling in his current position, Ian made the switch, lured by the broad audience he would now be writing for.

"It was a chance to grow the brand nationally," he says. "The prospect of more national exposure in *USA Today* was a big carrot for me."

It has turned out to be an even bigger carrot for his readers. Behind the strong work ethic he adopted early on and a unique ability to convey the human drama of sports, Ian's headshot is now a regular in sports sections across the country.

"He really is at the height of his profession," says Jack Curry, who knows Ian both inside and outside the newsroom. Mr. Curry's wife is a Marist grad—Pamela Orbine'86—while Ian's wife, Tracey, is Pamela Orbine's sister.

As a result, Mr. Curry has observed Ian's strength in other areas, none more apparent than as a father to his seven-year-old son, Kyle. "He's a terrific dad."

Between his newspaper writing, various television appearances and family life, lan has recently found time to undertake another

responsibility. He is currently writing a book, tentatively set for a March 2005 release, about the spotlight on today's prominent high school basketball stars.

It's the beginning of another chapter in what has already been a very successful story. "This is a first step in trying to broaden my horizons," says Ian, who is tracking the senior year of Brooklyn basketball phenom Sebastian Telfair for the upcoming book.

Clearly, though, he doesn't need to do any more to make Marist proud.

"Even if he decides that he wants to continue as a (newspaper) writer, he can be one of the distinctive voices of sports journalism of his generation," David McCraw says.

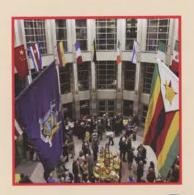

Meanwhile, Ian has just placed first in the national Associated Press sports editors writing contest in the columnist category. Despite all of the awards and accolades he has received, he wouldn't mind if they all stopped tomorrow.

"We're not supposed to be the news, we're supposed to cover the news," he says, "We're supposed to be in the shadows."

Or in Ian's case, in Yankee Stadium, Madison Square Garden, or whatever happens to be the major sports venue at the moment.

1952

Dr. Edward Cashin's 20th book, The Brightest Arm of the Savannah, The Augusta Canal, 1845-2000, won an award from the Georgia Historical Society for the best book in 2002. His 21st book is titled From Balloons to Blue Angels: The Story of Aviation in Augusta, Georgia. Dr. Cashin will be a featured speaker at Patriots' Weekend 2004, a commemoration of the 225th anniversary of the American Revolution in New York sponsored by Marist's Hudson River Valley Institute. He will speak July 16 at Bear Mountain's Overlook Lodge on "Three Officers and a Lady: The Hudson Valley and Georgia in the American Revolution." For information visit www. hudsonrivervalley.org or call HRVI at (845) 575-3052.

1955

Dr. Michael J. Kelly and his wife, Janet, bought a house in St. James, N.Y., in July 2003. Mike is an adjunct instructor at Stony Brook University where he teaches management courses. I Thomas G. Murphy delivered a paper at the annual conference of Coptic Studies. The paper was published in the Bulletin of the Center for Coptic Studies. Br. Declan Murray celebrates his 50th year of being a classroom teacher. Brother Declan is a religious educator at Archbishop Molloy High School in Jamaica, N.Y.

1956

Rev. Francis Gallogly lives on the campus of Villanova University in Villanova, Pa. Br. Frank also serves as chaplain to the retired

sisters of St. Joseph at Chestnut Hill. Robert Hopkins teaches at Trinity High School in Manchester, N.H. His son, Patrick, teaches in Singapore; another son, Craig, was to graduate from the University of Pennsylvania veterinary school in May 2004; and a daughter, Colleen, was to wed in April in San Diego, Calif., where she teaches. Br. Leo Shea, FMS is president of the Guadalupe Middle School, a tuition-free Catholic school for poor Mexican children on the border in Brownsville, Texas.

1962

William Lenehan is entering his 10th year of retirement. He never tires of hearing from former Marist football players and oarsmen. Bill can be reached at wilenehan@aol. com. Dr. M. John O'Connell is

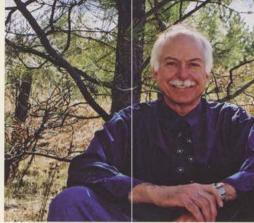

semi-retired and lives in Boothbay Harbor, Maine, "right across the footbridge." He keeps busy and enjoys helping school districts improve the effectiveness of their schools and connecting with "old" Marist classmates from the high school graduating classes of 1956 to 1959. He is doing some educational consulting in New York, Pennsylvania, Maryland and West Virginia. His son-in-law is with the 1st Armored Division in Baghdad. ■Dr. Frank J. Swetz is involved in editing a new e-journal for teachers, devoted to the use of the history of mathematics in teaching. His Web site is www.mathforum. org/convergence.

1964

Barbara and Robert Van Aernem's youngest son, Brian, was married in October. Now they have someplace to visit to play golf when the weather in Delmar, N.Y., is cold: Brian lives outside Myrtle Beach, S.C., where he is an officer in the Horry County Fire and Rescue Service.

1966

Michael Borrelli was re-elected for a fourth term as Rye (N.Y.) town councilman. He has been a Knight of Malta since 1997. ■ Jack Broderick, an oil painter, had a one-man show in Buenos Aires in October. His work also appeared in a five-person show in Paris in January 2004. After leaving Marist, he studied art at the Lyme Academy of Fine Arts in Old Lyme, Conn. Joseph Garcia and his wife, Agnes, are happily retired and living in Florida. John W. Hart, PhD had two articles published in 2003: "Living Water: A Sacramental Commons" in Catholic Rural Life magazine and "Sustaining a Sacramental Commons" in Dialog -A Journal of Theology. He spent six weeks in Italy participating in the National Endowment for the Humanities seminar "St. Francis in the 13th Century." Paulist Press will publish his next book, Environmental Theology, in May 2004. John is known for his work in social ethics and environmental ethics, and he has given more than 150 presentations on four continents, in 24 states and in Canada, Brazil, Switzerland, Italy, Nepal and England. John Palumbo has joined Bayer Healthcare in Norwood, Mass., as a senior clinical consultant. His son, John, is at James Madison

John W. Hart, PhD '66

University in Harrisburg, Va., and his daughter, Angelina, is at Loyola College in Baltimore, Md. Rocco Pietrofesa is enjoying making lots of wine in his retirement. His son, Rocco, who is an airman 1st class in the Air Force, was briefly stationed in Iraq in support of the troops before being restationed to England. He was to be discharged from military service in May 2004. Alan W. Schultz is retired from his position as laboratory director with Ben Nesin Laboratories in Shokan, N.Y., a division of the New York City Environmental Protection Agency. ■ Tom Taylor teaches and coaches football at Canterbury Prep in New Milford, Conn. His team won the Northeast football championship in 2003. Charles Zoeller is the manager of the Adult Day Health Center of the Elder Service Plan of the East Boston Neighborhood Health Center in Winthrop, Mass. The center offers a day program and residential care for Alzheimer's patients.

1967

Joseph Conklin retired on Dec. 31, 2003, after 22 years with the Center for Professional Education at Andersen Worldwide in St. Charles, Ill. Gerard DeFiglio retired from IBM on Dec. 31, 2003, after 341/2 years of service. Michael Gilfeather is enjoying retirement. One of his children recently graduated from college and two others are currently attending college. Peter Higgins has merged his consulting firm with anothersmall business in Las Vegas, Nev. He is working on homeland defense issues, lecturing at UCLA, 'having fun." Robert Johnson's daughter, Jennifer, writes episodes of "The Guardian," which airs on CBS on Tuesday nights. Bob has four grandchildren and is "perking along" at www.lcafe.com. Anthony LaRocco retired from teaching three years ago. He lives in New York City and has a home in Florida for the winter months.

Patrick J. Sullivan has been married for 33 years and has two grown children. He has spent most of his working career with IBM in the greater NYC area.

1968

Walter Arendt retired in August 2002 after 35 years as a teacher and manager with New York State government. He has two grandchildren, Allison, 8, and Billy, 1. Robert G. Bailey, Esq. has been appointed to the Debt Counseling Drafting Committee of the National Conference of Commissioners on Uniform State Laws as well as the Strategic Planning and the Membership committees of the National Academy of Arbitrators. Alumni Author

Running Recon: A Photo Journey with SOG Special Ops Along the Ho Chi Minh Trail

Author: Frank Greco '74 Published in January 2004 by Paladin Press Large-format, 448 pages, 700 photos, documents, color maps

www.runningrecon.com.

Web site:

This large-format, 448-page military memoir and combat photography book offers an account of a top-secret U.S. Army organization known as the Studies and Observation Group, or SOG, that operated for eight years during the Vietnam War and became America's most decorated elite unit. The group's official records were destroyed in 1972 when it was disbanded. Through anecdotes, correspondence and 700 rare photographs primarily from personal collections, as well as color maps and declassified documents, Running Recon reflects Frank Greco's experiences in Kontum, Vietnam, from April 1969 to April 1970 as part of SOG as well as the collective experiences of other SOG veterans.

Dependents Schools in Germany. Patrick is a mathematics teacher and guidance counselor at Bamberg American High School and Anne is a librarian at Ansbach High School. ■Richard A. Measel taught earth science and biology at Green Run High School in Virginia Beach, Va., for the 2003-04 school year. Rich retired as a lieutenant commander with the U.S. Navy in 1992. Ron is the managing director at the PGA National Resort and Spa in Palm Beach Gardens, Fla., where the Florida chapter of the Alumni Association hosted "Alumni Day at the PGA."

Gladys L. Cooper, Esq. '77

Gladys L. Cooper, Esq. '77: Serving the Community

Gladys L. Cooper, Esq. '77 was one of four individuals honored for outstanding community service at the Catharine Street Community Center's 13th annual Martin Luther King, Jr. Breakfast in Poughkeepsie.

In acknowledging the honor, Gladys quoted her grandmother, a Baptist minister. "As long as God is blessing you, you have to continue to give back," she told the audience of more than 600 guests at the Mid-Hudson Civic Center. She urged them to continue Dr. King's dream, to remember those not as fortunate and "not to accept the status quo."

A native of the Hudson Valley, she was appointed corporate secretary of CH Energy Group, Inc. in 1999 and served in that capacity for CH Energy Group, Central Hudson Gas & Electric Corp., CH Energy Services Inc. and their eight subsidiary companies until January 2003.

She received her associate's degree from Dutchess Community College and graduated with honors from Marist with a bachelor's in business administration. She first joined Central Hudson in 1977 and in 1984 was appointed Central Hudson's corporate secretary, the first woman and first African-American to be appointed an officer of Central Hudson. In 1992 she took an educational leave of absence and in 1995 received her Juris Doctor in Law from the University of Maryland. She then rejoined Central Hudson and was appointed assistant vice president of governmental relations.

Gladys has served as a member of the Catharine

Street Cornmunity Center board and was the chair of the steering committee that developed the annual Martin Luther King, Jr. awards breakfast, the center's major fund-raising event. She is a member of the board of the Eleanor Roosevelt Center at Val-Kill, the Community Foundation of Dutchess County, the Dutchess County Arts Council and TransArt, Inc. She has served in various roles on the boards of the College at New Paltz Foundation, Inc, the YWCA of Dutchess County, Rehabilitation Programs, Inc., the Youth Resource Development Corp., the American Red Cross and the Dutchess County Girl Scouts Council, among others.

She has received several awards and honors including the YWCA's Special Recognition Award for Continued Community Service, the Dutchess Community College Outstanding Alumni Award and the Cunningham Award for Exceptional Achievement and Service to the University of Maryland School of Law.

She is a member of the Phi Alpha Delta Law fraternity, Zeta Phi Beta sorority, the Christian Legal Society and an active member of Springfield Baptist Church in Beacon, N.Y., which was founded by her grandmother, the Rev. Mattie Cooper, in 1946. She has established a scholarship endowment fund with the Community Foundation of Dutchess County for members of her church who wish to continue their education.

Gladys has two children and two grandchildren.

Charles Bender still works in the field of psychology managing a work program for developmentally disabled adults. Charlie lives in LaGrange, N.Y., with his wife, Tammy, and their children, Cody and Chelsea. Kathleen Murphy Dombroski and Michael Dom-

broski will celebrate their 25th wedding anniversary in 2004.
Br. Paul Keenan is a Franciscan Brother living in Bolivia studying Spanish. Brother Paul is a certified social worker who worked and studied at the Washington Theological Union in fall 2003.
Kathleen Norton McNulty was honored at Our Lady of Lourdes High School's Legion of Honor Dinner on Feb. 11, 2004. A Lourdes'

alumna, Kathleen has had a distinguished career in journalism. A former writer for the Associated Press Wire Service, she is now a features writer and public editor at the *Poughkeepsie Journal*. Kathy Anderson Pereira stopped working outside of her home in 2003 in order to enroll her 13-year-old son in a home-schooling program. She works with two other teachers, a speech therapist, an occupational

Christopher M. Capone has been appointed chief financial officer and treasurer of CH Energy Group, Inc. in Poughkeepsie. John Donovan has been program manager for San Luis Obispo Regional Rideshare for five years. He and his staff implement marketing, public relations and community outreach to promote the use of alternative transportation in San Luis Obispo County, Calif. Preston Felton was promoted to first deputy superintendent of the New York State Police on Nov. 6, 2003. Carlos Garcia is a supervisor I for the New York City Human Resources Administration's Department of Social Services. He serves as a liaison between the NYC HRA Family Independence Administration and the Office of Child Support Enforcement citywide. Theodore Kissel, his wife, Cheryl, and their three daughters, Kathryn, Julia and Megan, love to fish and enjoy the outdoors near Barryville, N.Y., along the Delaware River. Lori Karpp Messina received a master's in secondary education and mathematics from Mount Saint Mary College in December 2003. She also received New York State teacher certification in February 2004. Patrice Sarath's short story "A Prayer for Captain LaHire" was reprinted in The Year's Best Fantasy 3 from Harper Collins. Her story "Into the Dark" received a Nebula nomination. "Thanks, Dr. Sommers!" Patrice writes.

1985

Darryl Imperati was appointed principal of the Valley Central High School in Montgomery, N.Y., in May 2003. He took the position on Sept. 1, 2003, after 17 years in the district as teacher and assistant principal. ■Tom "Ziggy" Lehrkinder writes that his wife, Lynn McGahan Lehrkinder '86, was diagnosed in 2003 with melanoma, a form of skin cancer. Lynn has been courageously following her treatment protocol for the past year, he says. They both are very appreciative of the kind words and thoughts from the Marist community. I John Loughlin was promoted to the rank of lieutenant colonel in the U.S. Army Reserves. He serves in the Army Surgeon General's Office in the Pentagon. As a civilian, John works as an agent for State Farm Insurance in Troy, N.Y. Susan Marcy and her husband, Dennis, traveled in 2003 to the Bahamas in March, Cancun in April, the Adirondacks in June, Chincoteague, Va., in July and northern Maine in August. To cap it all off, they hiked a 4,000+-foot peak in New Hampshire in October. ■ Eileen McCue enjoyed traveling to China, Ireland and Iceland in 2003. Eileen is a certified social worker for Taconic Developmental Disabilities Services Office. Her private practice in Poughkeepsie continues to expand. Lisa Farabaugh Pilewski and her husband, Tom, are kept very busy with their four children. "Lots of activities, lots of chaos," she writes. "We are abundantly blessed." Lawrence Roll is the security technology architect for Mercedes-Benz headquarters in the United States. "Thanks, Marist!" he writes.

Christopher M. Capone '84

1986

Kenneth Briggs is developing J2EE Enterprise JAVA applications at New York Independent System Operator in Guilderland, N.Y. Ken is a senior analyst/technical developer at the company. His band, "Blues-O-Saurus," was to record its first CD in December 2003. Steve DeVito is a senior accounts payable coordinator with the law firm of Stroock & Stroock & Lavan in New York, N.Y. He writes that he would like to express his deepest condolences to the family of Vincent Kane '86. Vinnie was a New York City firefighter who lost his life in the Sept. 11, 2001 terrorist attacks. Donald Godwin, Ed.D. was appointed to the position of dean of students at Marywood University in Scranton, Penn. Don administers the disciplinary/judicial affairs program and supervises the offices of student activities and leadership development and of housing and residence life. The Hon. Howard D. Mills III, Republican state assemblyman from Orange County (N.Y.), announced on Feb. 19, 2004, that he would take on incumbent Democratic U.S. Sen. Charles Schumer on Election Day, Nov. 2, 2004.

1987

Kevin Kaley is a member of the U.S. Army Reserves. He graduated from Command and General Staff College and was selected battalion executive officer. ■John O'Mahoney was appointed assistant principal of Intermediate School 77 in Ridgewood, N.Y., on May 8, 2003. Michael Tallman M '93 completed the U.S. Army's Command and General Staff Officer course on Dec. 31, 2003. He transferred to the Massachusetts Army National Guard Medical Command as the health services plans, operations, intelligence, security and training officer. Mike is also the special projects officer and privacy officer for the medical command. As a civilian, Mike is an information technology systems officer for the State Street Corp. in Westboro, Mass.

1988

CW3 Michael T. Carson returned in fall 2003 from a 10-month deployment in Kosovo as a Medevac and maintenance test pilot. Michael was stationed in Landstuhl, Ger-

many. I Jamie J. Guida conducts training seminars on chip sample preparation techniques and reverse engineering for J.F.A. Diagnostics in Round Rock, Texas. I Joseph Madden has three sons, Joe, Liam and Ronan-"two carrot tops and a blondie!" he writes. I John McGurk co-founded a computer software company, Tolan, Inc., based in Providence, R.I. Jonna Spilbor has added New York to the list of states in which she practices law. Other places on her list include California and D.C. She is a regular guest commentator on Court-TV. Fox News Channel and MSNBC and is a legal columnist for the Poughkeepsie Journal. The column appears on Sundays and is called

"Reasonable Doubts." She is a graduate of Western State University of Law in San Diego, Calif. Joseph Stevens is a regional manager for New York/New Jersey for Aztec Medical Products, Inc. Joe lives in Bridgewater, N.J., with his wife, Mary Ann, and their children, Nicole, 3, and Joseph, 1. Paul Ziegler is the director of acquisitions and underwriting for the Northeast region at CitiFinancial Mortgage.

Alan Affuso is a partner in a privately held IT consulting firm, the Garrett Sayer Group in Parsippany,

N.I. He was promoted to vice president of professional development in January 2003 and, in November 2003, was designated CIO of the firm. He invites all computer science graduates and near grads to contact him via his business email (aaffuso@garrettsayer.com) to begin networking their careers. Julie Daigle received an American Red Cross Pacesetter Award on Oct. 23, 2003, for outstanding service to the community and to the Red Cross. Kevin Garrity is a sports reporter and anchor for NY 1, New York City's all-news channel. His contract extends through 2007. ■ Carol Ann Catucci Kinane has been appointed special education coordinator for Huntington

Linda Betz M '88: Developing Security Strategies for IBM

Since Sept. 11, 2001, security has been in the forefront of everyone's mind, in every corner of the world, and in every industry sector, from finance, transportation and pharmaceutical to retail, information technology and education.

Today's hot security topics run the gamut from preventing identity theft—both business and personal—to defeating viruses that penetrate computer systems, detecting intruders, stopping hackers in their tracks and protecting PIN numbers during everyday ATM transactions.

Inside IBM's on demand e-business world, Linda Betz M '88 and her team of eServer security experts are engaged on the front lines helping the company develop and implement integrated security strategies that readily identify unauthorized users and defend systems from the threat of information technology (IT) security breaches, accidents and natural disasters. Their job: to ensure 24/7 the security, integrity and continuity of the day-to-day business operations of all IBM eServer customers.

To accomplish this critical mission, Linda, the program director of eServer Security and a certified Project Management Professional, leads the server strategy and architecture for security. This includes the IBM family of eServers, ranging from Intel-based to mainframes. Located in Poughkeepsie, N.Y., she and her staff connect to leaders in all IBM development groups and product divisions and are directly linked to the corporate security strategy team.

"As a result of our collaboration with IBM's Thomas
J. Watson Research Center, we developed and introduced the IBM 47'58 [encryption card] and the more
recent PCIX hardware encryption card," says Linda.

With this hardware encryption card, customers can offload "compute" intensive workloads (e.g. complex transactions, such as engineering and scientific number-crunching jobs, that call for a massive amount of computer time, processor power and speed) to a tamper-resistant device that protects critical encryption keys for a business.

"We are helping our customers to protect the identities of their customers, as well as the identity

Linda Betz M'88

of their own company, and to better control and manage information, whether they are transmitting credit information over the Internet or sharing data within their own networks or with other businesses," adds Linda.

Since joining IBM in 1983 at Poughkeepsie, Linda has primarily supported the manufacturing and engineering lines of the business. She recalls stepping right out of undergraduate school at SUNY Albany into IBM's world of automated tools and processes, where she began her career by helping build tools to load microcode onto tapes and diskettes, and working on the ALPS robot. To this day, she vividly remembers how the robot cut the diskettes, then labeled and placed them in boxes for the 3080X machine.

Intermediate School, where she also serves as a sixth grade special education teacher. I Michael Kinane has been appointed to the Smithtown Central Schools industry advisory board. Paul Mead and his wife, Josette, have two children, Christopher and Jonathan. Paul runs the Return Center at Avon in the Springdale, Ohio, branch. ■ Kathleen DeRiso Mitchell was promoted to vice president of Median Management Group, LLC, a company specializing in travelrelated insurance programs. She is responsible for the profitability of all the programs as well as company operations. I Richard Spina was promoted to Eastern region director of Maxxim Medical in Clearwater. Fla. Vincent Zuccarello has been promoted to vice president of health care finance for Oxford Health Plan in Norwalk, Conn. Vince and his wife, Sandra Izzo Zuccarello '89, live in Sandy Hook, Conn.

1990

Sean Creighton is the executive director of the Southwestern Ohio Council for Higher Education. He is pursuing a PhD in leadership and change at Antioch University in Yellow Springs, Ohio. ©Celeste English is pursuing a master's in childhood education at the College of St. Rose in Albany, N.Y. Upon completion of this degree in June 2005, Celeste will be a New York State-certified teacher of grades

Rebecca Hastava and Rich Pastor, a daughter, Logan Reese, Feb. 23, 2003

Monica Latus and Roy Freer, twin sons, Mason Roy and Spencer Reese,

From there, she became technical assistant to the division vice president and Kingston, N.Y., general manager, splitting her new responsibilities and time between product groups in the Hudson Valley and Endicott, N.Y.

She later held development management positions in the MVS software area and the Highly Parallel Query System organization, where she helped bring standard IBM hardware and software together to create an offering that helped companies scan, join and then break down huge amounts of data into manageable parts for faster processing. This assignment led to a second-line management position, overseeing a large team of developers who concentrated on security strategies

and focused on some key aspects of systems management.

In 2002, when IBM consolidated all servers from within various product lines into one brand, senior management asked Linda to assume a leadership role to help develop the security direction for the new family of IBM eServers. The concept took off fast. As a result, her team's project scope and responsibilities grew; they continue to evolve each year.

Before being hired by IBM, Linda pursued her love of computers and all things mathematical in short order. In 1980, during her high school senior year, she entered Dutchess County

Community College through early admissions. After earning her two-year degree at Dutchess, she enrolled at SUNY Albany, where within one year she graduated in 1982 with a BS in computer science and mathematics. When Linda joined the computer science master's program at Marist, she was already a full-time IBM software engineer.

"As a matter of fact," she announces, with a warm, broad smile, "everyone on my Poughkeepsie team has a degree from Marist!" She deeply appreciated the fact that the Marist MS in computer science program provided her with a mix of insights from professors as well as adjunct instructors who were professionals in the industry, including many from IBM. While Linda balanced work and family life, she took one course

every semiester for five years.

When not working on eServer issues and security strategies, Linda savors spending time at home in Poughkeepsie with her 14-year-old son, Richard, who has a passion for basketball. He played on the Oakwood School's JV basketball team and is enjoying his return to the classroom after a long, serious bout with migraines.

Born and raised in Poughkeepsie, Linda remembers growing up in a neighborhood of mostly IBM families. Her father had a long career with IBM Poughkeepsie as an englineer before retiring in the 1990s. Her older sister, Katherine, works at the IBM Thomas J. Watson Research Center in Hawthorne, N.Y. Katherine is a

manager in the very security organization that has had a major hand in helping Linda's eServer team develop the critical 4758 encryption card for the IBM eServers.

In 2003, Chris O'Connor, director of IBM corporate security strategy, selected Linda to be an adjunct member of the company's security strategy council. Here, the forward-thinking Marist alumna represents her systems group to ensure that the team's solutions fit into IBM's strategy for the eServer business.

As e-business moved from communicating information primarily between the business-to-business

sector in the mid-1990s to reaching into the home PCs of inclividual consumers, a huge cry rose up for tighter system and data security.

"In the 2000s, e-business customers want to know how to safely share more information in an on demand world, connect with broader target markets and maintain privacy without having their security issues go up because their exposures might go up," says Linda, who thrives on complex situations. "Today, these are some of the questions we hear.

"Many of the answers can be found right within the security attributes of the IBM eServers that we support," she adds. "And this is why we believe that our eServer security team is at the right place at the right time in the history of our industry."

She opened a freestanding storefront on Main Street in Pearl River, N.Y., "Moon River" on Oct. 25, 2003, selling gifts and clothing.

Kathleen Oremus-Brazee has

Remembering Bogdan Jovicic

The Marist College community mourned the loss of Assistant Director of Athletics Bogdan Jovicic following his passing March 12. He was 52. An active member of the Marist Athletics Department, Bogdan had an impact on students and staff alike, and his loss creates a great void on campus.

"The loss of Bogdan was a shock to all of us at Marist College," Director of Athletics Tim Murray says. "His presence in our department was a special one that

will be sorely missed."

A familiar face around the Department of Athletics, Jovicic, played numerous roles during his 19-year tenure as a Red Fox. In his most recent post, Bogdan organized and ran the school's intramural program, working with the entire student body.

Bogdan also served as an assistant coach with the Marist College basketball team for five seasons, helping to coach the likes of Rik Smits '88 and Miroslav Pecarski. He also served as the team's academic advisor during his coaching career.

Former head men's

basketball coach Dave Magarity remembers Bogdan fondly. "My relationship with Bogdan originally centered around basketball but our relationship grew over the past 19 years. He was such a warm and gentle person and one of the most unique individuals I knew. He was intelligent, well-read and always up on current events. He was an integral part of the community, as well as my life and my family's lives. My children grew up with Bogdan. He was always a friendly face and someone I will truly miss."

In 1984 Bogdan served his native Yugoslavia as an assistant coach for the nation's Olympic basketball team, helping prepare the squad for the Olympiad in Los Angeles, Calif. He also coached on the professional level in France, serving as an assistant coach with the Stade France Paris Club team, coaching in every European country as well as numerous other nations

around the world. Bogdan spent the 1979-80 season as an assistant coach with the USC Trojans.

In addition to coaching basketball, Bogdan spent three seasons as an assistant coach with the Marist soccer team. He was on the sidelines in 1992 when the Red Foxes knocked off the number one-ranked St. John's team.

Former Marist soccer coach and Director of Athletics "Doc" Goldman recalls Bogdan's abiding compassion for others. "Bogdan was very concerned about people.

He would come into my office with the newspaper and say, 'Did you see this?' or 'Did you see that?' and we would spend 30 minutes discussing it. He had a feeling for people, and was concerned about what people did to other people and why they did it. I think that showed in his relationship with the kids at Marist. He was always very good with the players, mindful of their needs and their development, athletically and as human beings.

Bogdan graduated from the University of Belgrade, earning a degree in political science in 1975. Upon his

graduation he moved to Paris, where over the next four years he studied French language and civilization at the world-renowned Sorbonne.

A versatile athlete, Bogdan played at various levels of basketball during his life and was able to play at every position on the floor. While at the University of Belgrade, he played for the Partizan-Belgrade Club team. He also was the player coach of the Velizy Club Team while studying at the Sorbonne.

Bogdan was fluent in English, French, Hungarian and Serbo-Croatian. He was also an avid chess player and was a member of the Vassar Chadwick Chess Club for the past 12 years.

A memorial service, attended by staff, faculty, students, alumni and members of the surrounding community, was held on March 26 at Our Lady Seat of Wisdom Chapel on the Marist campus.

The message board will also support all of the DRCN's endeavors and services. There is no charge to use

Remembering Dr. John E. MacDonald, Jr.

Dr. John E. MacDonald, Jr.

Dr. John E. MacDonald, Jr., an outstanding educator and one of the founders of Marist's computer science program, died Aug. 6, 2003, at a hospital in Poughkeepsie. He was 78.

A resident of Wappingers Falls, N.Y., for 45 years, Dr. MacDonald came to Marist College in 1981 following a distinguished career as a senior engineer at the IBM Product Development Laboratory. He was the college's first director of computer science and helped establish its graduate programs

in software development and information systems. He also played a role in developing Marist's longtime partnership with the IBM Corp. In 1986, he was appointed to the Dr. Linus Richard Foy Chair in Computer Science. He served the College with distinction for 13 years, retiring in 1994.

Dr. MacDonald was a dedicated teacher and an effective mentor who helped many students achieve successful careers in the field of computer science, says Marist President Dennis Murray. "His knowledge about technology and its impact on organizations helped influence the direction of the college and many of our academic programs. John took his work at Marist seriously, but never took himself too seriously. He was known for his good sense of humor and his perspective on academic life."

Dr. MacDonald held three degrees in electrical engineering: a BSEE from Purdue University, an MEE from Syracuse University, and a PhD from University of Illinois. As a senior engineer at IBM, he was involved in large processor development and played a role in developing core memory, an integral part of the evolution of the large systems.

"John made an indelible mark on Marist College," says President Murray. "His academic career is an exemplary model for others to follow."

He was survived by his wife of 57 years, Susan Henrietta, a daughter, three sons, 11 grandchildren and one great-granddaughter.

the message board, and registration is also free. To register and join go to www.EzBoard.com or email Sean at: seanlkelly@mail.com. Andy Lake is the 2003 U.S. Tennis Association Gold Slam winner in the National 30 and Over division. He completed the Gold Slam by winning singles tournaments on four surfaces. Andy won the National 30 and Over Hard Court in Austin, Texas, in March 2003; the National 30 and Over Indoor Court in Salt Lake City, Utah, in May 2003; the National 30 and Over Grass Court in Scottsdale, Ariz., in June 2003; and the National 30 and Over Clay Court in Palm Coast, Fla., in September 2003. Andy partnered with Kline Sack of New Orleans, La., to win the clay court doubles championship as well. He is the director of tennis at Hawk's Landing Club in Plantation, Fla. Red Fox fans will remember Andy's skill on the basketball court. Maria Martinez, Esq. is an associate in

international practice with the firm of Bryan Cave, LLP in New York, NY. The firm recently merged with Robinson, Silverman, Pearce, Aronsohn & Berman. Suzanne Norsby-Ovenshire is assistant director for juvenile corrections at the Goshen Residential Center of the New York State Office of Children and Family Services in Goshen, N.Y. Rachel Ammons, MD '99

Rachel Ammons, MD '99: Caring for Premature Babies 80 Hours a Week

The University of North Carolina Hospital's neonatal intensive care unit barely feels like a medical facility. Recently built and comfortable in its modernity swathed in soft colors, there are painted cats, cows and chicks outside the patients' "pods." But just beneath that serenity, there's an edge made apparent every time a bell, buzzer or pager goes off signaling that one of the premature babies is in potential jeopardy.

"For large portions of the day it feels like you're putting out fires," says Rachel Ammons '99, in the first year of her residency, cluring which she will rotate through the different pediatric units. She came to UNC after a stellar four years at the IMedical College of Virginia, where she graduated in the top six percent of her class. Walking through the halls of the unit, the former Marist softball centerfielder—a petite brunette, bubbly in her blue scrubs and red sneakers—seems as relaxed and grounded here as she did on the diamond, where in the late 1990s, Marist fans remember her Charlie Hustle style and drag-bunt scrappiness. She stops as she comes to the room where the doctors bunk during all-night duty. "I try to sleep when I am on call, but as soon as I close my eyes my pager goes off. I have to throw on my glasses and run out of NICU and into a difficult delivery. While still groggy, I have to quickly assess the situation because the babies I see are born prematurely and are very high risk."

Pressure is nothing new to Rachel. At Marist she earned a Presidential Academic Scholarship

manager of administrative services for Saratoga Hospital's new Ambulatory Surgery Center in Saratoga, N.Y. Jo-Ann Piezzo Holmes is a clinical social worker for the state of Connecticut. She completes court-ordered psychiatric and forensic evaluations. Alycia Libby is director of athletics department special events at the College of William and Mary in Williamsburg, Va. ■ Michael McCaffrey received a ID degree from Rutgers University School of Law in 2002. He was admitted to the New York and New Jersey bars and concluded a judicial clerkship in the Superior Court of New Jersey. In September 2003

he accepted an associate position at the law firm of Hardin, Kundla, McKeon, Poletto & Polifroni. PA in Manhattan where he is a litigation defense attorney. Gina McLaughlin is a senior treasury analyst for Avon Products, Inc. in New York, N.Y. She is pursuing an MBA at the Stern School of Business at New York University. Ann Severino Milutinovic was promoted to senior project manager at Wunderman. The company, a marketing communications agency, is located in New York. N.Y. Christine Minchak teaches first grade in the Ridgewood (N.J.) Public School District. She received

a master's from St. Thomas Aguinas College in 2002. I Janet Cacace Novoselich is a production manager for Dell Corp. in the consumer division, where she is responsible for the creative production of the PC catalog and software and peripheral direct mail. all four years, was a Metro Atlantic Athletic Conference All-Academic student athlete in 1998 and 1999 and won the 1999 President's Academic Achievement Award. All this while taking full loads of classes like organic chemistry and practicing non-stop for a team good enough to make the "play-in" round of the NCAA tournament Rachel's freshman year.

"Probably the most important values that I learned as an athlete that have helped me succeed in medical school have been dedication, teamwork and balance," says Rachel, who is a member of the Red Foxes' alltime softball roster. After graduation from Marist, she attended the Medical College of Virginia in Richmond to be closer to her mother, father and younger sister in her hometown of Herndon, a suburb of Washington, D.C. She finished ranked 11th out of 180 students and earned scholarships—for her class ranking—during her last two years. "Success in any aspect of life requires the commitment to continually strive to improve," she continues. "Success in softball meant endless hours spent on the softball field and in the batting cages. And now my dedication to success is how I am able to work long, long hours in the hospital learning the art of practicing medicine to hopefully become a great

Rachel doesn't throw around the phrase "to work long, long hours" just to intimate that she works more than she'd like. When she says long, she means long—routinely working 80-hour workweeks (the limit a resident can work, according to federal mandate). And that number, 80, seems even longer when one discovers that her husband, Jeff Troy, is also a resident (in radiology) at UNC. The two met in medical school and received their top matches when they applied as a couple to their residency programs. They have since bought a house in nearby Durham and were married in May.

As with most successes, Rachel's ability to shine in multiple arenas didn't come without the assistance of several admiring onlookers. She is quick to point out that her path was facilitated greatly by Dr. Joseph Bettencourt, a Marist biology professor and advisor for the health professions. He assists students through application process rigors and typically sends seven to ten students per year into the health professions. In Rachel's case an advisor and mentor was almost vital for a student juggling Division I sports and medi-

cal aspirations. "He really guided me through the entire process of applying to medical school, from teaching the core science coursework to helping me fill out rnedical school applications," she says. "Dr. Bettencourt is a wonderful mentor who helped me develop the study skills I needed to score well on the Medical College Admission Test and succeed in medical school."

But even for Dr. Bettencourt, who has watched his advisees succeed for nearly four decades. Rachel was an impressive combination of student and athlete. "In spite of the demands of playing softball and preparing for applications, Rachel was the best-organized medical school applicant I can remember," says Dr. Bettencourt. "Rachel does wonders for the reputation of Marist as she has performed so well while coming from a small college that in some areas of the country is not as well-known in the medical school circles. She accomplished this while maintaining a commitment to athletics. This enhances and assists other students from Marist getting into medical school as she represents the quality of education that permits one to do well against medical students from more well-recognized institutions."

After her residency, Rachel plans to apply for a fellowship to sub-specialize within the field of pediatrics. Her goal is to stay at a hospital similar to UNC's because it allows her the chance to teach and stay on the cutting edge of research. "I have always known that I didn't want a desk job," she says, thinking back to why she likes to work with children. "I just knew that I wanted to go to bed at night thinking that I had done something that day to help people. When you help children you really feel satisfaction because nothing means more to parents than their kids."

Case: in point is Rachel's father, Joe, her first softball coach. "I am most proud of Rachel's desire and dedication," he says. "Athletics and academics didn't always come naturally to her but she has always worked very hard and was extremely determined. I always thought that between softball and academics something would have to give, but not with Rachel. She never gave in."

-Alex Crevar

Tap into the Online Alumni Career Network

In its first six months, the Online Career Network has reached a membership of nearly 950 alumni. Members of the network are available to:

- Assist other Marist alumni with researching careers
- Give valuable insights into their industries
- Be a friendly voice in an otherwise competitive world

Join the Online Alumni Career Network to find fellow alumni already working in your field of interest, or to help fellow alumni learn about your field. To join, visit www.marist.edu/alumni/career. html.

Kevin Lundy '99

Kevin Lundy '99: Directing Government Relations for Wendy's International

Kevin M. Lundy has been named director, government relations for Wendy's International, Inc. Wendy's International is one of the world's largest restaurant operating and franchising companies with 9,293 total restaurants and brands including Wendy's Old Fashioned Hamburgers, Tim Hortons, Baja Fresh Mexican Grill, Cafe Express and Pasta Pomodoro.

Kevin is responsible for directing state and local government relations efforts as well as supporting the department's many issues management, grassroots and Wendy's political action committee activities.

Prior to joining Wendy's, Kevin was manager of state relations for the National Restaurant Association in Washington, D.C. During his tenure there, he was responsible for managing the association's state legislative affairs department, working with the membership and the association's 53 state partner associations.

Prior to working for the National Restaurant Association, Kevin was a legislative coordinator for a state government issues management and tracking firm in Virginia and also worked for a private communication company in New York City.

He earned a bachelor's in political science at Marist and is pursuing a master's in public policy. Kevin and his fiancée, Meredith, reside in Dublin, Ohio.

Tina Gioielli (center), who formerly taught Italian at Marist, celebrated her 90th birthday with friends including Br. Joseph L.R. Belanger, FMS '48 (left) and Maurice Bibeau '54, both professors emeriti of modern languages (right), at her home in Cary, N.C.

Remembering J.J. Allen '99

J.J. Allen embodied all the qualities of a great studentathlete, from his success on the football field to his contributions to the Marist College community as a whole. J.J. passed away on New Year's Eve with his wife, Lori, by his side. He had turned

28 on Dec. 13.

"He was the best we ever had, as a person and a player," says Marist football Head Coach Jim Parady. "He was tremendous. There are not many like him."

J.J. spent three years at Marist College, 1996 to 1999, transferring to Marist after a freshman year at Howard University. His impact far exceeded his great successes on the football field. Over the course of his three years he

was always among the first to volunteer his time to the local community. He spent countless hours working with local youth organizations and was always the first to volunteer for an event that involved helping others.

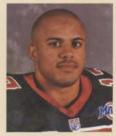

J.J. graduated from Marist in May 1999 with a bachelor's of science degree in biology. Melissa Tucci '01 shared a biology class with J.J. during her freshman year.

"Here I was a freshman, and the star football player was in my class," she remembers. "He was so willing to lend a hand to anyone to help them out. He was someone I looked up to academically and athletically."

J.J. had great success as a member of the Red Foxes football program, placing his name in the record books in numerous categories. For his career, 30 games, he carried the ball 597 times for 3,015 yards, the third-highest career total in program history. He holds the school record for career touchdowns with 41, and helped Marist to 20 wins in his three seasons. Allen was the heart and soul of the 1998 squad, a season in which he set single-season school records with

"What will always stand out about J.J. for me is how his personality made the spirit of our team," says Coach Parady. "His enthusiasm and love for the game was contagious and that part of him made for a closeness with his class and the team that has been hard to duplicate over the years."

J.J. Allen '99

Marist-Murray Ad Is a Home Run

President Dennis J. Murray went to bat to promote Marist and help out The Chronicle of Higher Education at the same time.

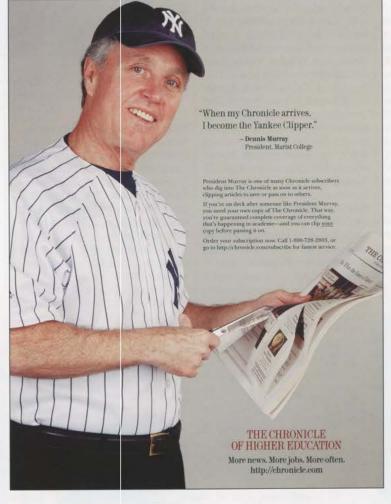

very eight weeks, you can catch a familiar face in a not-so-familiar pose gazing out from a full-page ad in *The Chronicle of Higher Education*. It's Marist President Dennis J. Murray, in a New York Yankees uniform, scissors in hand, cutting up a copy of the newspaper read by faculty, staff and administrators on college and university campuses across the country. It's all in the name of promoting Marist and *The Chronicle*.

The Chronicle is in a drive to increase its circulation, and Chief Public Affairs Officer Tim Massie learned of the ad campaign last August. The concept for pitching President Murray was devised by Tim and Peter Clark, a certified marketing consultant for WHUD Radio in Westchester County, New York.

The idea was to dress President Murray in a New York Yankees uniform, procured by Director of Athletics Tim Murray, and position him with a pair of scissors in one hand and a clipped copy of *The Chronicle* in the other. The tagline: "When my *Chronicle* arrives, I become the Yankee Clipper."

A lineup of several hundred colleges and universities submitted proposals to highlight their senior executives, but most struck out as the field was whittled to eight. Alvin Brockway, *The Chronicle's* associate publisher for circulation, said President Murray's willingness to pose for a humorous ad set the Marist suggestion apart from the rest of the crew.

"Everyone here is happy with Dennis's ad. In fact, our editor burst out laughing

The ad was a home run and Marist got a doubleheader thanks to the positive reader response.

when he saw it, thinking it provided a nice 'twist' in the series."

Of course, Alvin Brockway couldn't sacrifice a chance for a little word play of his own. In a letter to President Murray, he wrote, "Your pose was a big hit. Thanks for being such a good sport."

Being a team player led some of President Murray's California friends to playfully cry foul. He was born in Los Angeles and

once said his dream job was to play centerfield for the Dodgers. President Murray and his wife Marilyn moved to Poughkeepsie 25 years ago to succeed President Linus Richard Foy. "I'll do just about anything to advance Marist College and I'm a fan of *The Chronicle*, so I couldn't balk at this opportunity," Dr. Murray says.

The ad was a home run and Marist got a doubleheader thanks to the positive reader response. A second ad featuring President Murray, this time in more traditional shirt and tie, was on deck at The Chronicle and was used to promote the newspaper's exhibit booth at the annual conference of the American Council on Education in Miami, Fla. The thousandplus attendees couldn't miss that ad, either. The photo of President Murray was seven feet tall and showed him sitting on the floor of his office surrounded by Chronicle clippings and copies of the paper with the tagline, "The Chronicle helps Dennis Murray, president of Marist College, stay on the cutting edge. Tell us how you use The Chronicle."

Among the institutions selected for the series are George Mason University, Northeastern University, the University of California at Irvine, the University of Tennessee at Chattanooga and the University of Texas at Arlington.

The ad featuring President Murray first ran in the Jan. 30, 2004 edition of *The Chronicle* and will wind up at the end of 2005. After that, the ad campaign will be going, going, gone ...

Sail Ahead... with Graduate Studies at Marist

The School of Communication & The Arts

is proud to announce the launch of Marist's new graduate degree...

Master of Arts in Organizational Communication & Leadership

A degree that is focused on how an organization effectively communicates with its internal and external audiences, and how communication can make you a more effective leader, with improved conflict resolution and negotiation skills.
