

LT-Deleo Web, Feb. 6-37.

Israel - presents new conditions for a withdrawal from the Gaza strip and the Aquaba area. Requiring the United Nations - to station an emergency force along the Gulf of Aquaba, ^{and} Egypt - to give Israel a pledge of "non-belligerency".

Meanwhile, Egypt is demanding - sanctions. Cairo stating that President Nasser will insist - that economic measures be invoked against Israel. Or the Suez canal - will not be reopened.

From Jerusalem, Israel, we hear that the Government there is preparing - for economic sanctions. Ready to impose the severest kind of restrictions on the people - so as to cope with a possible embargo.

At his news conference, today, President Eisenhower made the prediction - that Israel will withdraw from Egyptian territory. Reporters asked him - would this country support sanctions? To which the President answered merely - that the United States Government supports the U. N.

WASHINGTON-ARABS

In Washington, the Arabian visits continue. President Eisenhower, today, conferring with Dr. Charles Malik, Foreign Minister of Lebanon. Malik - pro-western, a supporter of the Eisenhower Doctrine.

Yesterday, the President had talks with Crown Prince Abdul [^]Illah of Iraq - and, today, Abdul Illah met King Saud, who is still in Washington. The first meeting of the Crown Prince of Iraq and the Monarch of Saudi Arabia - since the nineteen-twenties.

King Saud told a news conference today - that the Eisenhower program for the Middle East is "good". Promising - that he will make matters clearer with Arab leaders, on his return home.

Britain and the United States - will pool their guided missile research. Just as they cooperated in the development of the Atom Bomb - during World War Two.

So stated in the House of Commons, today - by Minister of Defense Duncan Sandys. Who has just returned from Washington - where he negotiated with top American Defense Officials.

He came to the United States - to explain the British military cut-back. The necessity - of reducing armament expenditures, because of the financial crisis following the Suez affair. One way of spending less money - ~~depend more on~~ ^{depend more on} those ultra-modern weapons.

Duncan Sandys told the House of Commons today, that an arrangement was worked out - for British-American collaboration in the field of missiles. (Britain to get some American weapons - guided missiles of intermediate range, we hear. British science - to join with American science - in perfecting the Intercontinental Ballistics Missile. Called the "ultimate weapon.")

The two

~~can be "ultimately"~~

~~into~~ countries - to pool their scientific resources.

Reports in London are that the over-all plan is - to turn Britain into a giant rocket base. British strategy of defense - to change over from squadrons of war planes to swarms of missiles. A revolutionary change of strategic ideas - in this atomic age.

All of which will go into final discussion, when Prime Minister MacMillan meets President Eisenhower.

(The word being that MacMillan will be) in Washington, sometime next month.

SOVIET BUDGET

The new Russian budget - may reduce military expenditures a little bit. But the Soviets are putting a larger percentage into armament - than is the case in our American budget. Sixteen per cent of all the money spent by the Moscow Government - ~~is~~ for military purposes. Over here - ten per cent. Moreover, the Russian percentage does not include money spent for guided missiles, rockets, and atomic weapons. While such ultra-modern devices are included - in the American ten per cent.

These angles are pointed out by experts in Washington, who are studying the new Soviet budget. They warn us - it's hard to make any real comparison. Totalitarian bookkeeping - so different from our own.

SUB MOSCOW

In Moscow, a spectacular news conference - with klieg lights and all. A spokesman for the Soviet Foreign Ministry declaring - that the United States is waging a "secret war" against Communism.

He charged - that this country has been sending "spies and saboteurs" into Russia. And introduced - four Russians, whom he identified as American trained spies.

They told the correspondents - they had been recruited and trained by U.S. intelligence agents in West Germany. Then - sent into Russia, for subversion.

The Foreign Ministry press chief added that the United States carries on the "secret war", acting through, what he called, "all sorts of private committees, foundations and unions." He cited the Rockefeller Foundation, the Ford Foundation, Radio Free Europe, and so on. Which do, in fact, present the cause of Liberty.

HUNGARY

A Communist Repatriation Committee - at a camp of Hungarian refugees, near Vienna. The Reds - wanting to talk the refugees into coming back. But they never did get a chance to talk. Instead - they were met by a shower of stones from the refugees. A crowd of these yelling slogans of anti-Communism. And hurling such a bombardment of missiles - the automobile with the delegation of Communists simply turned around and left.

JEWISH COMPENSATION

In Germany, an agreement - for compensation to be paid to Jewish forced-laborers in world war two. Three thousand of them - to get as much as eleven hundred and ninety dollars each.

During the Hitler Terror, thousands of Jews were thrown into the Auschwitz Concentration Camp. Nearby - a plant of the giant I G Farben Chemical Combine. Inmates of the camp - sent over to the chemical plant, as forced labor.

Today, the I G Farben Combine is being dissolved - with a settlement of claims made by a Jewish Conference. A total of six million, four hundred and thirty thousand dollars - assigned as compensation for the former forced laborers.

NATIONAL GUARD

In the National Guard controversy, the President comes out in favor of the Army plan to give National Guard recruits six months of continuous basic training. General Ike said he was speaking as a "military commander", in advocating six continuous months.

SOIL BANK

The House of Representatives, today, passed the "Baby Soil Bank" bill. Drafted by the Democrats - to aid the drought stricken ranchers of the West.

Secretary of Agriculture Ezra Benson argued against it - but his objections were not pressed by the Republican Leaders. The "Baby Soil Bank" passing by two-hundred-and-seventy to one-hundred-and-eight.

EISENHOWER-INFLATION

President Eisenhower gave warning, today - that unless business and labor collaborate in checking inflation, the Federal Government will have to do something about it. He urged both sides to act voluntarily - and hold the "wage-price line." That is, avoid undue increases of wages and prices. Those increases - which are causing inflation.

The President noted that such economic control by the Government - is not the American way. But there may have to be controls, if prices and wages keep going - up and up.

Today's news dispatch from the White House tells of a remark made by President Eisenhower - and, in describing the way he spoke, ^{the dispatch} uses these words: "Calmly, and with no show of emotion."

The subject under discussion - Vice President Nixon. Will he be given additional duties, and extra assignments? The President declaring - a Vice President's job is, a pretty much, what the President makes it. And adding - that a Vice President should be kept fully informed of what goes on.

Mr Eisenhower saying: "Even if Mr. Nixon and I were not such good friends, I would still have him in every important conference of Government. So, that, if the grim reaper would find it time to take me, remove me from the scene - ^{the Vice President} ~~he~~ would be ready to step in without any interruption."

So These were the words that were spoken "calmly and with no show of emotion." The reference to the grim reaper.

ANTARCTIC

Now, imagine - suppose you took a look at the thermometer some fine morning. And found it registering -one hundred and twenty degrees below zero ! If the thermometer - could go that low it would ^{be} at the south pole - from which frosty region this next bit of news emanates.

The scientists at Little America - giving a prognostication of what they'll have to expect, when the Antarctic winter comes. Down there, ^{right now} it's summer ~~at the~~ ~~season~~ - with comparatively reasonable temperatures.

Dr. Harry Wexler points out - that the South Pole is much colder than the North Pole. The latter - consisting of ice floating on water, which is relatively warm.

The South Pole - on a lofty continent, covered with a huge glacier. So, when the Arctic night comes around, with six months of darkness, they can expect - one-hundred-and-twenty below, ^{that is} ~~Especially~~ - at South Pole village, down there at the ultimate south.

Never a human being has lived in such abysmal cold. The lowest on record hitherto - ninety-one degrees below zero, in Siberia.

But, cold weather - is one thing they^a are down there to study. One important phase of the Geophysical year - meteorology. The U.S. expedition - having established seven bases, which are scattered around the South Polar Continent. Other countries - having forty-five antarctic stations.

Plenty of weather observation, in an area that has a huge effect on Global climate. The South Polar Continent called - the world's biggest cold weather factory.

~~(Proper marking today)~~

SHOOTING

In St. Louis, the police produced a dramatic show, today - in reenacting the killing of a High School boy. Shot - accidentally, by another boy.

The scene, the living room of the home of Jerrold William Pearson, a High School sophomore. Three lads - playing a game of cops and robbers. Playing it - with loaded pistols. The Pearson boy's father - being a gun collector.

As it happened, they had a tape recorder on - as they fooled around with deadly weapons.

Today, the tape recorder was played back, and the voice of the Pearson boy could be heard clearly. Saying: "I'll tell you what. I'll go back to the bedroom, and you come back and try to get me."

Then, presently, from the tape recorder came - the sound of a shot.

The Pearson boy killed - when, in the scramble of pistols, one gun ~~was~~ went off.

A game of cops and robbers - while the tape recorder was on.

DIVORCE

In a Parisian divorce court - testimony picturing a husband, who - sure was the boss. "Iron discipline," was his motto - and wifie did what she was told, or else.

Today Testimony given by Madame, ~~was~~ related - that their courtship had been idyllic. Anything she did - wonderful. He let her do as she pleased - gazing at her fondly. But what happened, after they were married?

Madame testified that, two days after the wedding, she started to light a cigarette. But hubby snatched it from her, saying : "I don't like women who smoke."

Three days later, in a cafe, the bride ordered beer. But got - "lemonade." Hubby saying "I don't like women who drink."

At night upon retiring, she lay in bed, reading ^a mystery story. But hubby snatched the book, hurling it to the floor. "I don't like women who ^{read in bed.}"

~~road on 4/20/11~~

The final blow came (when, at the dinner table,
the bride started eating onions. And hubby roared:
"I don't like women who eat onions."

Whereupon she threw the onions in his face -
and went home to mother.

WOMEN

Today in Cleveland, Mrs. Marge Keller said:
"It's a shame that a little sociable game among
elderly women - is the subject of a police raid."

Which follows the arrest of Mrs. Keller and
twelve other women - who were playing games in Mrs.
Keller's apartment. Ten of the ladies - playing poker.
Three - gin rummy.

The cops declare that - in the poker game, there
were twenty-five dollars in the pot. Sixty-seven
dollars in chips - in front of the players. In the
gin rummy game: - fourteen bucks.

But Mrs. Keller says - appearances were
deceiving. The games - not much more than penny ante.
"We play poverty poker," she explains. "Every one
starts with twenty-five dollars and we play ^a twenty-five
cent limit. We take a quarter from each pot for a
jack-pot. When we have about three dollars in the
kitty, we put it up in the pot and have a jack-pot."

Henry, Maybe ~~some~~ of you gentlemen who are ^{an} experts
at poker ^{and} can clarify that.
