

CRASH L.T.-OLDS. Fri. Feb. 1 - 63

46 1/2
That plane crash over Ankara - sent debris crashing down all over the city. The fuselage of the Turkish Air Force plane -slamming into historic Ankara Citadel. One wing of the civilian airliner - dropping into the main square. Other pieces of debris - landing in side streets and back alleys.

Four big buildings - went up like ~~torches~~ torches.

47
A dozen cars - burned out at the curb. Others, hit ~~at~~ while moving - in the middle of the street. ~~Minor~~ ^{Other} damage, ^{right} ~~spotted~~, across the ~~entire~~ city ~~limits~~.

The toll - ~~evidently greater than in any previous~~ ^{Three times that} ~~air disaster~~. Some sixty killed, - ~~about the same~~ number injured.

How the airliner and the military plane happened to reach the same point in the sky at the same moment - not yet determined.

The dispute between Ottawa and Washington - has simmered down. ~~And I do mean "simmered"~~ ^{more} No heated remarks today, like ~~those~~ of yesterday - when Prime Minister Diefenbaker accused us of interfering ~~in~~ in Canada's internal affairs. But - neither side has withdrawn from its previous position.

Diefenbaker, repeating - that his original statement was "correct and proper." ^{And he} Adding - "we need no assistance from the ^{U.S.} State Department." Will there be a Canadian election soon - because of ^{all} this? ^{From the} ~~future~~ ~~The Canadian~~ Prime Minister ^{no comment on} ~~is remaining mum~~ ~~about~~ that.

On the American side of the international fence, Secretary of Rusk insists - that there was no undiplomatic interference ~~in~~ by Washington. That our government simply found it necessary to reveal our position - concerning nuclear arms for Canada. That we have a ~~perfect~~ right - to keep the record straight.

ALLIANCE

There is no radical split in the western alliance - according to the American Secretary of State. Dean Rusk, admitting that DeGaulle's ~~v~~ veto of British membership in the common market - has ~~ca~~ created new problems. But denying that there is any break - in the anti-Communist front. The nations of the West, still bound together, in ^{Dean} Rusk's words - "by the harsh realities of the cold war." Namely - the threat of Red aggression.

The immediate effect - of the DeGaulle veto? ~~Dean~~ Rusk sees - "a period of pause, a reconsideration of alternatives."

The visit of the British Prime Minister to Rome was supposed to be - routine. Nothing special on the agenda, when MacMillan arranged to hold talks with Premier Fanfani.

Well, the visit has turned out to be - anything but routine. MacMillan bringing with him - Lord Privy Seal Edward Heath, Britain's negotiator ~~at~~ at the abortive Brussels talks. Italy backed Britain - for membership in the Common Market. And MacMillan hopes to work out something more tangible - before he leaves Rome.

49

ATOMIC

The American moratorium on underground atomic explosions - lasted less than a week. On Saturday, President Kennedy announced the suspension of the Nevada tests - as a conciliatory gesture during the negotiations for a test ban.

Then the Soviets ~~has~~ became recalcitrant - in their usual fashion. And today Dean Rusk told his news conference - that our underground nuclear series will be resumed.

Khrushchev, not getting anywhere ^{at} ~~the~~ ^{he} ~~thinks~~ ^{he} ~~can~~ maneuver ^{ing} us into a unilateral test ban.

CUBA

The Red Cross announces that Fidel Castro has received - half of his ransom for the invasion prisoners. Almost thirty million dollars worth of medical supplies - already transported to Havana. The rest, to be delivered in the next few weeks.

At the same time, American citizens are continuing to arrive - in Miami. Flown by Red Cross planes - from the Red-dominated island.

50
Ans How long will ^{Cuba} ~~it~~ remain a Red-dominated? Secretary Rusk said today that we will take any necessary steps - if the Russians try to make their stay permanent. Khrushchev promised to pull his military forces ~~out~~ out of Cuba - "in due course." But, said Dean Rusk today "due course isn't fast, in this case."

WEATHER. ~~I suppose that the~~ ^{one} most fantastic thing about ~~this~~ ^{the present} West Coast storm - is that it's driving across the Pacific from Hawaii. Our fiftieth state, not so much of an island paradise - tonight. Hawaii whipped by high winds - and drenching rain. Shacks blown away, and cocoanut palms knocked over - from Honolulu to Hilo.

The Pacific, ~~not~~ not so pacific - tonight. ~~Massive waves, rippling across the surface of the greatest ocean on the globe.~~ ^{Great waves} Breaking with a shattering impact - on the West Coast of Canada and the United States.

~~Here are some facts and figures.~~ Alviso, California - under eight feet of water. Las Vegas, Nevada - three feet. Bancroft, Idaho - encircled by streams ~~bursting~~ over their banks. In Colorado, some buildings at the Air Force Academy - are without roofs tonight. The result of - the worst gales in the history

of the Academy. In Montana, the Highway Patrol is asking everyone to stay off the highways - except for emergency travel.

EMBEZZLER

The mystery about Hugh Campbell of Selma, Alabama. How he managed to embezzle some four hundred thousand dollars he's charged with taking, and Second, how he spent it.

Hugh Campbell, assistant cashier at the Selma National Bank - for thirty-five years. They say he made withdrawals in cash - and covered the differences by juggling checks. Quite a juggling act - 400,000.

Where - did the money go? They say he's a conservative chap. No liquor, no betting - no lady friends. So how did he spend the four hundred thousand?

EUROPE

A Londoner said today "that talk about an ice age a hundred thousand years from now, why, it's already here".

All fifty-three counties of England and Wales, covered by ice and snow. The cold indoors, worse than ever - because of the shortage of kerosene, the traditional British substitute for central heating.

France and Italy have more snow tonight than they've had in seven years. East Germans have been ordered to use melted snow for everything except drinking - because of water shortage.

JOKE

Here's a dispatch from the Gulf of Bothnia.

A Swedish conscript phoned regimental headquarters at one in the morning, identifying himself as a security officer, ordering the regiment there on the Soviet frontier to fall out - repel an invasion.

Picture the scene - in the darkness there near the Arctic Circle. Bugles blaring the call to arms. Infantry, racing out of barracks - into the Arctic cold. Tanks roaring over frozen tundra - toward the border. Pilots and radar men, searching the skies - for war planes.

Then that Swedish soldier got worried. The practical joker - who started it all. In a panic he phones headquarters again, with the truth. You can imagine what happened to one Swede!
