

SUEZ L.T. - Deleo. Fri. Oct. 5 - '56.

In London, today - the appointment of an executive committee to direct the operations of the Suez Canal "Users Association". On this board of Directors - are the big three, Great Britain, France and the United States. Plus - Norway, Italy and Iran. A seventh member - to be appointed later, after the organization finds out whether Pakistan, Ethiopia and Japan decide to join. At present - they <sup>are</sup> ~~are~~ holding out.

The <sup>(conferees)</sup> ~~CONFERENCE~~ in London have still to name a "czar". To direct the business of trying to get the Canal internationalized. No selection of a top man has been made. Nor have they decided where the "Users Association" will have its headquarters. Questions - to be taken up in London next week.

At the United Nations today, ~~the~~ Britain and France called on the Security Council - to indorse the London proposals. The Security Council requested - to make a recommendation to Egypt. Urging Premier Nasser to cooperate with the "Users Association."

In Cairo - roving Indian Ambassador Krishna

Mennon had a meeting today, with Egyptian officials.

Krishna Mennon - trying to find a formula for a compromise  
in the Suez dispute.

A dispatch from Manila states - that all foreign airlines may have to discontinue flights to and from the Philippines.

Why? Because the Philippine Weather Service will be discontinued, on Sunday. No more ~~more~~ meteorological reports - and airlines cannot operate without weather information.

But why is the meteorological service being discontinued? Because of a shortage - of trained forecasters. Weather experts, trained in the United States - have been quitting. To take - better jobs elsewhere.

So, without the weather forecasting - how can you have a weather bureau?

However, there seems to be some hope - Manila stating - that there will be a raise of pay for weather technicians. <sup>Then</sup> ~~And~~ maybe enough of them can be had - to keep the Manila weather bureau going, And keep - the airlines flying to and from <sup>Manilla</sup> ~~the Philippines~~.

We've been hearing ~~and~~ about the shortage of  
scientists.- ~~and~~ Here's a graphic example.

ANDREA DORIA

Today the Captain of the Andrea Doria stated - that the log books of the Italian liner were lost in the sinking. Previously his company had <sup>said</sup> ~~stated~~ - that the logs were saved. But Captain Calamai calls that "one of the many inexact reports."

Adding - that only ~~his~~ his personal log had been saved. The record for the engine room, cargo, and other records - going to the bottom with the Andrea Doria.

He said that, upon leaving the sinking ship, he thought - the logs had been saved. And the attorney for the owners of the Stockholm asked - could he not have sent a man back to the Andrea Doria to get the records? When he learned - they had not been traken off the ship?

"Today," replied the Captain, "I can say - yes."

He referred to the fact that the Andrea Doria did not founder

until four-and-a-half hours - after the last man was off. *Then*

*he*  
~~And~~ added: "I didn't know if the ship would go down immediately."  
*^*

And, I was so shocked by the tragedy. And that's why I didn't even think."

## SEGREGATION

The Tennessee Supreme Court declares the segregation laws of the state - unconstitutional. Tennessee, joining Florida and Texas - which already have had their segregation laws overturned by their supreme courts.

The Tennessee ruling was a result of that trouble in Clinton - where national guardsmen had to put down demonstrations over the question of integration in high school. One group of citizens carried their appeal to the State Supreme Court - ~~askn~~ asking it to uphold segregation. Instead, the court decrees - Tennessee must obey the Supreme Court ~~of~~ of the United States.

## MCKEON

Navy Secretary Charles Thomas overrules the conviction of Sergeant Matthew McKeon who lead six marines to their deaths on a night march. Secretary Thomas sets aside the decision of McKeon's court martial but orders the Sergeant broken to the rank of a private. This means that McKeon can stay in the Marines.

## EISENHOWER ATOMIC

Today brought a Presidential reply to the Stevenson proposal - that atomic tests be ~~discontinued~~ discontinued. Mr. Eisenhower telling his news conference -that it would be "foolish" to stop testing H-bombs, until we got an agreement that Russia and the other nations~~seemed~~ would follow suit,

He explained - that the purpose of our latest atomic tests is to develop what are called "clean" bombs. That is - hydrogen bombs which do not hurl <sup>far and wide that</sup> radioactive "fall out" ~~far~~ ~~and wide~~ about which we have heard so much.

## EISENHOWER NIXON

Here's an answer to a question that we couldn't answer yesterday what did Vice President Nixon tell President Eisenhower when he reported on the Nixon electioneering tour? Today, the President said that Nixon reported - he found people across the country "quite happy" except for some concern about farm problems and unemployment.

Yesterday, we heard that the Vice President had urged Mr. Eisenhower - to make more campaign appearances than planned at present, but, today, the President corrected that. He said - Nixon did not ask him to do more campaigning but, on the contrary, urged him to stick to his present schedule - and not work himself to death.

A newsman ~~was~~ asked - did his doctors put any limit on his campaigning? And the President replied, "far from it!" *and he added:-*  
^ "the doctors always tell me I can do more than I want to do."

He said he ~~likes listening~~ *enjoys* the campaign trail. "I like to go out and see people," said the President. "I get awfully tired just listening to reports."

ADD EISENHOWER

Late this evening, Mr. Eisenhower issued a formal statement from the White House - repeating what he said in his news conference - and charging that Stevenson is spreading confusion, with his proposal to stop hydrogen bomb tests.

## EISENHOWER TWO TERMS

President Eisenhower expressed a surprising opinion today. Saying - he's doubtful of the wisdom of the "two term" constitutional amendment. Which was launched by a Republican congress - and ratified by the States. Limiting the Presidency to two terms.

The President indicated - a mild sort of disagreement. Saying: "By and large - the United States ought to be able to choose for its President - anybody it wants. Regardless - of the number of terms he has served."

The subject came up at a news conference, today, when reporters made the suggestion that's heard from time to time. That President Eisenhower's leadership would be weakened in a second term, because everybody would know that it would be ~~his~~ his last. The President admitted - that his influence might be lessened by the two term limitation. But added - that the power that goes with the Presidency is so great, that a President would still have a dominating position.

Then it was that <sup>he</sup>~~that~~ spoke up with a mild opinion -  
that the two term limitation might not be so wise.

## BASEBALL

Today's game turned out to be a World Series game, a nightmare; of bad putching. The New York Yankees broke a World Series record - by putting a parade of seven hurlers in the game. By the time the third inning was over they had trotted out five. Brooklyn used three pitchers, and maybe you can say they won - by three pitchers to seven.

The statistics round out the nightmare picture - twenty-one runs scored, thirteen for Brooklyn and eight for the Yankees. Each - getting twelve hits. But the Yankee pitchers gave eleven bases on balls - another world series record.

And what a wild and wooly fantasy was that second inning! Eleven runs in the 2nd; which ties the record for World Series play. Equalling an eleven run single inning - staged - twenty-seven years ago - by the Philadelphia Athletics and the Chicago cubs.

The Yankees had scored a run in the first inning, then they made five more in the second. Yogi Berra - lining out a grand slam home run. But, in the second half of the second, the Dodgers tied it up with a six run rally. Featured - by Duke Snider's three run homer.

After that, the Dodgers went on to score - inning after inning. First Baseman Gil Hodges - a batting hero. In 1952 he was the goat of the World Series; with - not a hit. Today, he slammed out two doubles, each good for two runs. Which wrapped up the game.

Some thirty thousand spectators witnessed the pitching nightmare - including Presidential candidate Adlai Stevenson. Who beheld - not a political, but a baseball landslide.

## STEVENSON

Adlai Stevenson is in New England tonight - after attending the World Series game, today. Leaving the ball park he flew up to New Haven, for an address at Yale. There he criticized the Republican party - for ~~KRYA~~ trying to foster a spirit of complacency among the voters.

"We have heard a great deal and we're going to hear a lot more in the weeks ahead about prosperity and peace", declared the candidate. And added: "But, surely, the uneven measure of prosperity we now enjoy and the restless and uneasy peace in which we now find ourselves - were not achieved by standing still and admiring them."

EISENHOWER BASEBALL - 2

Washington Senators would step up their brand of baseball. The team finished in seventh place this year, - last place last year. Which Eisenhower opinion no doubt will win unanimous approval. I suppose the Washington Senators are about due to emerge from the cellar.

## EISENHOWER BASEBALL

President Eisenhower, today, spoke up on the subject of baseball. And said - he's opposed. No, not opposed to the Brooklyn Dodgers - or the New York Yankees. He was talking about - the Washington Senators. He's opposed to any plan - to move the American league team away from the National capital.

This follows a report printed in Washington newspapers - that the President of the Washington Ball Club, Calvin Griffith, is considering a plan to move the franchise to Los Angeles next year, which, by the way, is denied by another official of the Senators.

The question ~~is~~ came up at the White House news conference today, and Mr. Eisenhower declared - he's against the Senators leaving Washington. Of course, there might be a few legislators on Capitol Hill whose departure wouldn't grieve <sup>DE</sup> the White House. But ~~is~~ ball players - that's another matter.

However, the President did say that he wished the

## KIDNAP

In Chicago, a kidnap story came to a happy ending, today. One month old Ronald Butcher recovered from a woman - who simply ~~said~~ says: "I wanted a baby of my own."

Mrs. Gladys Bynum, twenty-six years old, relates how, yesterday, she started out with the deliberate intention - of abducting a child. In the course of which errand - she went into a store, where she saw Mrs. Lois Butcher, with her one month old son.

Mrs. Bynum struck up a conversation with the mother - admiring the baby. Then, ~~she~~ said she was feeling ill, and asked - could she go with Mrs. Butcher to her home, nearby, for a rest? Mrs. Butcher agreed, and the two women, with the baby - went to the ~~apx~~ apartment. Where, presently, Mrs. Butcher went out to telephone for a taxicab - for her guest. There being - no telephone in the apartment. When she returned, Mrs. Bynum was gone - and the baby too.

The alarm given, and there was a hunt - by three hundred policemen and detectives. Combing - the neighborhood.

No result, until a motorist came forward - and told how a woman with a child hitch-hiked a ride in his car. He drove them - to an apartment, Nóticing - how much the woman fondled the child. 

With a child hitch-hiked a ride in his car. He drove them to an apartment. Noticing how much the woman ~~was~~ fondled the ~~child~~.

With that clue, the cops ~~was~~ went to the apartment, and found Mrs. Bynum - taking busy care of the baby.

One strange thing is this. The woman abductor had been pretending - she was going to have a child. And had stuffed herself out - with baby clothes. Which she now had put on the infant she had taken away.

## FATHER AND SON

At the McGuire Air Force Base, New Jersey, a father and son, separated for fifteen years, talked on the telephone ~~as~~ with each other, ~~daily~~ daily, for a month. Without knowing - the identity of each other.

Eighteen year old James E. Tracey is stationed at the control tower of the Air Base. Technical Sergeant Franklin E. Tracey works in the flight operations office. And the young airman was often on the wire with the technical sergeant. Discussing - flying field business.

But they never called each other by name - only by military code. Using - their initials. J E T and F E T.

But then, at length, the airman began to wonder. The initials of the technical sergeant were the same as those of his father, whom he hadn't seen since he was a small child. The family - broken by ~~divorce~~ divorce.

He had a photograph of his father, and went to the flight operations office and showed the picture to an officer, who said, "That's technical Sergeant James Tracey."

*- Henry -*

A few minutes later, the young airman ~~was~~ walked up to the technical sergeant, and announced: "This may shock you, but I'm your son."

~~So that was the reunion, at the McGuire Air Force~~

~~base.~~
