

Thurs. July 31st 69

For President Nixon in Hindustan a tremendous welcome today in New Delhi. His arrival - even in hundred degree weather - drawing countless thousands who cheered his every move. At one point - the surging masses

actually toppling a concrete wall - narrowly missing the official party. *Those welcomes in India are unlike anything on Earth. Sometimes several million people turn out.*

The President himself responding with a speech - recalling a conversation years ago with ~~the great~~ Jawaharlal Nehru, Quoting the Indian leader as saying: "What we need above all else - is a generation of uninterrupted peace." The President adding on his own: "That was true then - ~~it~~ is even more true today - a generation of peace for Asia - for India - and the world."

Later, the President conferring with Nehru's daughter - the present Prime Minister - Madame Indira Gandhi. Then - a tour of the <sup>Teeming</sup> street of New Delhi. <sup>This</sup> Followed by an official statement - stressing a policy of "Asia for the Asians." The President saying: "We firmly believe that

***Asian problems must be resolved - by the people of Asia."***

***But even so - he added - "we stand ready to help."***

## KAMPALA

Speaking of rip-roaring welcomes <sup>there was</sup> more of  
the same at Kampala <sup>in</sup> Uganda, where Pope Paul became  
today - the first Pontiff ever to set foot on African soil.

His arrival at Kampala Airport - setting off a bedlam of  
beating tom-toms, booming bull horns, blaring bugles.

In return, the Pope offering a prayer <sup>saying: -</sup> - "that Africa may  
flower forth with all the riches of its culture and noble  
traditions - advancing with even longer strides upon the  
road to progress."

Although he failed to mention it just then - the  
Pope was also much concerned with the war in Nigeria.  
Indeed, he told newsmen aboard his special plane - he  
would "do anything, risk anything" to bring peace to that  
embattled land. A Vatican spokesman later adding that the  
Pope was prepared to "stay in Africa a month - if he thought  
it would ~~help~~ ~~bring about~~ help bring about Nigerian peace  
talks.

# SENATE

Here at home - the U.S. Senate has finally agreed on a tax compromise; ~~Approving~~ by a narrow margin ~~today~~ a measure that would extend the present income tax surcharge until the end of this year. By which time - it is hoped - Congress and the administration will have formulated a complete tax reform program.

By the way, Senator Kennedy of Massachusetts - <sup>was</sup> one of those present and voting "aye". His first day - back in Washington. The Senator also confirmed ~~today~~ - what he seemed to imply yesterday, <sup>that</sup> ~~saying~~ he has no intention of running for President in Nineteen Seventy-Two - in fact, never did. However, Senator Muskie of Maine later observing with a smile: "There is nothing irrevocable - about anything in politics."

## PARIS

*On the peace front - Paris - the U.S. begins to get tough. Henry Cabot Lodge taking his cue today - from President Nixon's "No more concessions" statement in Saigon. Charging the Communists with showing "contempt" for their own people - in refusing to agree to free elections in South Vietnam. Further accusing the enemy of stalling for time - in an attempt to get a better deal.*

*But it won't work - said Cabot Lodge. Adding: "The United States will not break its word - the United States will remain committed to our objectives; that of giving the South Vietnamese people the opportunity for genuine self-determination." And if you believe otherwise - he told the Communists - "you make the same mistake that others have made who do not understand American history."*

*Another U.S. mission to Asia - that of Secretary of State William Rogers; who arrived today in Seoul - after three days in Japan. The secretary promptly telling South Korean officials - the U. S. is ready and willing to help repel any Communist attack from the North.*

*Earlier, a young Japanese fanatic attempting to stab Rogers - as he boarded his plane at Tokyo airport. However, the youth accosted by mistake - U.S. Ambassador to Japan Armin Mayer. Both tumbling to the ground - although, luckily, no one was hurt.*

Coincident with Fall and Winter showings this week in Paris - a new book just out in London. "Modesty In Dress - The Hide And Seek Game" by James Laver - stripping bare the trappings of high fashion down through the ages. Coming to the conclusion - it's an endless cycle repeating itself over and over again; all the way from the nude look - to the complete cover-up.

*he says*  
This ~~we are told~~ - a demonstration of what the psychologists call - the "theory of the shifting erogenous zone." In other words - a shifting of the female center of attraction - whenever men seem to be getting bored with the old "erogenous zone". Arthur Laver going on to say that fashion is, therefore - "nothing more than a series of variations on seven themes;" emphasizing - each in its turn - "the neckline, waist, hips, derriere, arms, legs - and finally length, or circumference of the body itself."

Some will argue the point - says Laver.

Observing that men - "<sup>in</sup>~~and~~ their imaginations" - generally view "the whole female body as ~~a~~ desirable ~~object~~." But he adds: "In practice this is not so - as anyone can testify who ever visited a nudist camp."

What about you, Warren.

5/14

*If the earth seems strangely out of kilter these days - well, the reason could be - it is! ~~At least~~ Anyway, that was the contention put forward today - at a meeting of the Geological Society Congress - <sup>at</sup> Johannesburg, South Africa. Dr. Warren Hamilton of the University of Denver - suggesting that the earth was actually shifted on its axis millions of years ago; ~~Probably~~ the result of being hit by a giant meteor - somewhere in the vicinity of South Africa's capital city of Pretoria.*

*Such an impact - if it really did occur - one that was probably felt in every corner of the globe - says Dr. Hamilton. Adding that the same thing could happen again; in which case it would probably set off tidal waves - destroying every coastal city in the world. No need to worry though. Dr. Hamilton saying he foresees no such danger - for the next hundred thousand years, at least.*
