

L.T. - OLDS. TUES. DEC. 22. 1959.

GOOD EVENING EVERYBODY:

President Eisenhower's return to Washington, tonight, will be delayed as a result - of the reception he got in Morocco, today, upon his arrival - from Spain, he was hailed by the most tumultuous crowd encountered in all his travels. Wild Berber Horsemen - riding at a breakneck pace. Swinging swords - and shooting rifles. The news correspondents called it - "a wild west ovation" - North African style.

At Casablanca, throngs out of control - hailed the President, slowing down - his motor trip through the city; delaying his arrival at the Royal Palace by eighty minutes. The Presidential schedule - that much behind.

After which he hurried things. But, still, he was forty-seven minutes late in boarding his plane, homeward bound.

Then across the Atlantic, with a refueling stop

at Goose Bay, Labrador, where his pilot hoped to make up for some of the lost time. But, how much - is doubtful.

The President was to have landed at Andrews Air Base, just outside Washington, tonight at ten-thirty P M Eastern Standard Time. Now his arrival is not expected - until around midnight. Probably they'll have a spectacular parade - no matter what time.

In Casablanca, today, President Eisenhower arrived at an agreement with Sultan Mohammed, on subject of American Air bases in Morocco. Which are to be abandoned. The King and President - in a joint announcement; that - all U S Forces will be withdrawn from Morocco by the end of nineteen sixty three. Preparations for their departure - to begin in the near future.

EISENHOWER - GIRL

Here's how the "good looking grandpa" got a kiss. A loud smack, that made him blush.

In Madrid, Rosetta Jimenez Calvo, is seven years old. A little while ago, she heard that President Eisenhower was coming to ~~XXXX~~ Spain. So she wrote him a note, asking - could she see him when he arrived in Madrid? Rosetta had seen his picture, and she called him the "good looking grandpa." Which, in fact, is not a bad description of Ike.

~~XX~~ U S Ambassador John Davis Lodge arranged a date. Rosetta, with her parents, waiting at ~~President~~^{the} Eisenhower place of residence this morning.

When he appeared, the President carried a large package, wrapped with Christmas trimmings. They sat chatting, and he asked Rosetta - did she like dolls?

"Si, Senor," replied the little girl.

Whereupon the President gave her the package, with a doll about as big as she was.

So that was when Rosetta pulled at the Presidential coat

EISENHOWER - GIRL - 2

lapels and gave him a big kiss. Smack - for a good looking blushing grandpa.

NATO

In the world of statecraft, all may be quiet on the summit. But, way down ~~at~~ ^{at} the foot of the mountain there was an uproar, today. The lonely little fellows, in an uprising.

The smaller countries belonging ~~to~~ to Nato, protesting, ~~because~~ because they were not consulted, when the summit conference was arranged. The big powers, Britain, France, and the United States= acting on their own.

The rebellion of the little fellows broke out - at a meeting of the Nato Council in Paris, today. The Turkish foreign Minister, Fatem Zorlu, saying, they were tired of being pushed around. Delegates from Greece and Belgium - immediately joining him.

But, finally, they were ~~pacified~~ ^{passified} ~~pacified~~ with assurances that they would be consulted in the future.

All quiet, for the moment - at the foot of the mountain.

TYPHOON

The list of missing in the Philippine typhoon ~~p~~ reduced in dramatic fashion, today. As many as one-hundred-and-thirty people, feared lost. Following, the tropical storm that raged across the Island over the week-end. But now, one hundred school teachers have returned.

They were on their way to the island of Samar, for a school teachers convention. Navigating, in a motor launch, which was caught in the typhoon, ^{with} ~~blowing~~ winds at one-hundred-and-twenty miles an hour. They never arrived at Samar, and it looked like a heavy blow ~~to~~ to the Philippine Education system.

Today, however, ~~they~~ ^{would reach} Manila - that, in the howling tempest, their motor launch turned back. Making its way to the place from which they started. The one hundred Philippine school teachers - now safe.

VACCINE

Striking figures - from Soviet Russia. Indicating, the effectiveness of new Polio vaccine. The facts given out by the world Health organization, in Geneva, today. A report - prepared by Doctor Dorothy Horstmann, of Yale. Who visited the Soviet Union to check on the success of the vaccine.

The number of polio cases in Russia - drastically reduced. In Soviet Lithuania, there were ~~one-hundred-and-eighty-one~~ cases last year. This year - fifteen. In Estonia - a drop from ~~five-hundred-and-eighty-three~~ to six.

The vaccine, developed in the United States, ~~By~~ Doctor Albert Sabin - of Cincinnati. The Soviet getting it - through a deal between the Moscow Ministry of Health and the U S Public Health Service.
Health ~~SERVICE~~.

It's a live virus vaccine - not yet on the market in the United States. Doctor Horstmann stating - it will take another year of testing, before its value is ^(thoroughly) ~~thoroughly~~ established.

ENGINEERS

In the world of education, a repetition of what might seem - a surprising phenomenon. The enrollment of students in colleges at an all time high, this autumn. But, a decrease in engineering students; For the second year in succession, the freshmen enrollment for engineering - declined.

So announced by the U S Education Commissioner, Lawrence Derthick, who says, it's all the more surprising, ~~XX XX~~ because of the large demand for engineers. An increasing demand, because of technological advance in industry. More jobs - but fewer students training for them. *Could it be that* ~~the~~ the boys just don't like -
math? "~~math~~"

ROCKEFELLER

I suppose we'll all agree that, when a Rockefeller gets beat up, that's news. Especially - when he gets whacked around three times.

So no wonder the reporters made inquiries following the disclosure by Governor Nelson Rockefeller of New York - that one of his boys, when fourteen years old, took repeated shellackings from a bunch of tough kids. It was Stephen Rockefeller who, during the summer, married a former family maid in Norway.

Stephen, at the time, attended the Buckley Grade School for Boys. The head of the school, today, explaining the situation.

He said the buckley boys wore blue caps, stitched in silver, with the letter "B". Young Stephen Rockefeller going to the private school from the Rockefeller ~~apartment~~ apartment on Park Avenue. Which wasn't far. But the way led through the Bailiwick of a gang tough youngsters

who specialized - in beating up the Buckley boys with their blue caps stitched with silver. More than eighty of them taking a licking. And that, Dick, included young Rockefeller, who got beaten up, three times! The cops finally broke the gang.

INCOME TAX

Now lets gaze with awe and wonder - at Irving and Leonard K Koppel, Aged - sixty and sixty-nine. Two wealthy brothers - who, in California, never filed an income tax return. They just didn't bother.

Today, at Los Angles, they pleaded guilty. Admitting, that, since nineteen thirty-five, their income has been four million dollars. Income tax - half a million. But, never a tax return.

Which inspired Federal Judge William Byrne to say, "Oh, what a blissful life it must have been. Even a poor judge has to pay taxes."

He suspended the ^S~~SENTENCE~~ _^ considering their age and their "~~Exemplary~~ Lives". Exemplary - except for that small matter of taxes.

"Oh, what a blissful life it must have ^{been} ~~been~~ _^.
