L.T. BUICK, FISHER, THURSDAY, MARCH 18, 1965
WEATHER

A two-day blizzard with winds up to fifty miles an hour--continued to pound the Midwest today across the top of the mation from the Dakotas to Michigan.

In Minnesota -- the worst storm of the winter-with two feet of measured snowfall -- whipped by the wind'
into drifts up to twenty-five feet deep. The blissard
so bad that even snow plows were immobilized -- throughout
most of the state. Schools closed in Minneapolis and
St. Paul -- for the first time in twenty-five years.

Actually, thousands of schools were closed today in the blizzard area--with many highways impassable-- and town after town completely snowed in. With temperatures expected to plummet--to fifteen below tonight in Minnesota.

Meantime, another cold front sweeping from the Northern Rockies -- all the way to Florida -- all this less than four days before the official arrival of Spring. That Soviet space spectacular is being acclaimed tonight on both sides of the Iron Curtain -- as a fantastic feat. The Russians' two-man orbital show -- clearly man's greatest achievement in space to date.

Soviet Cosmonaut Alexei Leonov -- the world's first true spaceman; leaving the Russian space ship for twenty minutes -- as it orbited the earth at more than Seventeen Thousand miles an hour. Performing a series of acrobatics -- taking pictures of the earth -- and peering down at the millions below -- while secured to the capsule by nothing more than a lifeline.

Another historic flight -- all of it broadcast by Moscow television. The entire performance seen as a giant step toward the eventual landing of a um on the moon.

Beyond that, the Russian feat once again clearly
demonstrating the tremendous gap -- between Russian and American
space programs. The U.S. proceeding with plans to launch its
first two-man space team -- into a three-orbit flight next

ruesday. But, actually leaving a space capsule -- that's something the past, astronauts won't try -- until a year from now -- at best.

overwhelsing , ate . Ordering its Southern-deminated Judiofnry

Committee -- to clear the bill for a final vote -- no Dater thundaptil Minth, That's just three was a sway.

to the last soil. Charging that the action violated all

traditions and procedures of the Senate -- calling the Sill

itself "un-American," But the speed-up finally aperoved by a

roll call vote -- of sixty-seven for -- to just shirteen

egainst.

That sergie, inclosufally, more than enough -- if it

thing fire -- to halt an expected filthoutur.

The President's voting rights bill today cleared its first Congressional hurdle -- and a big one at that.

The Senate declaring its intentions -- by an overwhelming vote. Ordering its Southern-dominated Judiciary Committee -- to clear the bill for a final vote -- no later thankpril Ninth. That's just three weeks away.

Southern Senators fighting the Committee speed-up -to the last bell. Charging that the motion violated all
traditions and procedures of the Senate -- calling the bill
itself "un-American." But the speed-up finally approved by a
roll call vote -- of sixty-seven for -- to just thirteen
against.

That margin, incidentally, more than enough -- if it holds firm -- to halt an expected filibuster.
