

ADENAUER

K.T. Delee. Thurs. June 4 - 59.

In West Germany, Adenauer will stay on -- as Chancellor. Reversing his decision - to run for President -- of West Germany, so announced officially -- in Bonn tonight.

He was sure to be elected President -- but the post is mostly ornamental. And would mean -- rest and retirement ~~of~~ for the eighty three year old veteran. His decision to stay on as Chancellor -- a matter of tangled politics -- apparently. The word from Bonn being-- that Adenauer's party, the Christian Democrats, want to avoid a battle among candidates ambitious to succeed him. So, to avoid a free-for-all among possible successors, Adenauer remains the West German Chancellor.

GENEVA

The French Foreign Minister was the host in Geneva today. Couve de Murville, bringing his opposite numbers together at his villa - for another secret session.

No announcement - about what was said, but there are rumors that an "interim solution on Berlin" may be forthcoming.

The "interim solution" would provide for the west to reduce its garrison in West Berlin. With the Soviets guaranteeing the rights of Britain, France and America - in the German metropolis far inside East Germany.

KHRUSHCHEV

The Red Czar of the Kremlin - is in Hungary.

Khrushchev - flying into Budapest - after his tour of Albania. No fanfare - at the airport. The Hungarian puppet regime - obeying orders to keep Khrushchev's visit informal. No honor guard - no big crowds - and only a few flags.

Puppet Kadar was on hand of course - along with Premier Muennich. Giving their boss an enthusiastic reception.

In the West, the belief is that Khrushchev is in Budapest to lay down a new party line on Yugoslavia.

Khrushchev, getting tough with Tito - again.

FISHERMEN

The Russians have stretched the Iron Curtain - as far as the Newfoundland fishing banks. So says Captain Tavares de Almeida - of the Portuguese Navy. Captain Almeida commands a ship, standing guard over his country's fishing fleet - off Newfoundland.

In Montreal, today - this Portuguese sea captain told newsmen ^{that} big Soviet trawlers ~~are~~ of modern design, are fishing the banks this season. But the crews - aren't very sociable. Keeping away from - western vessels. The only fishermen of the international fleet off Newfoundland - who never fraternize. Obviously - on orders, from Moscow.

Khrushchev, telling his fishermen "don't swap fish stories, with those capitalist anglers from the West."

ECUADOR

Tension in Guayaquil - Ecuador is more intense than ever tonight. President Enriquez, clamping a curfew - on Guayaquil, and Quito the capital of Ecuador too. Army tanks - patrolling the streets. Strict censorship - of press, radio and television. Even the flights at the airport were cancelled.

The reason - last night's rioting in Guayaquil. The culmination of disorders - that began on Saturday. And have taken twenty lives.

The government of Ecuador blames - the Communist party. But some observers in Quayaquil say, the basic grievance against the Enriquez administration is - low wages, and poor working conditions.

NICARAGUA

From Managua comes an unusual explanation of the Nicaraguan rebellion. President Somoza's regime, branding the invaders as - capitalists. No, not Communists. Capitalists.

The brother of President Somoza saying that rich investors are trying to seize power and - exploit Nicaraguan labor. In his words - "the real battle is between - local capitalists and a liberal government."

Meanwhile - the military situation remains confused. The government - claiming victory while the rebellions. Living in slave camps - working on what the Reds rebels assert they are driving on Managua, in three call "the nation building program". Meaning - the Tibetans columns.

Tonight, in Washington, the organization of American States - voted to investigate the rebel invasion of Nicaragua, as a possible threat to the peace of the Hemisphere.

TIBET

From New Delhi - a clearer picture of Communist occupied Tibet. Reports, filtering across the Himalayas, *have* ~~been~~ ^{been} pieced together by Indian experts. What picture of the roof-of-the-world do we get? ~~now? The picture of~~ ^a captive population feeling the full weight of the Red occupation.

Mao Tse Tung's men - swamping Lhasa. Members of the Dalai Lama's government - under house arrest in the Potala. The monks, told to stay in their monasteries - or what's left of them.

Captured freedom fighters, drafted into labor battalions. Living in slave camps - working on what the Reds call "the nation building program". Meaning - the Tibetans are restoring roads, and ^{some} ~~many~~ buildings damaged during the ~~rebellion~~ recent battles.

The Communist Chinese - not stopping with the men they captured, ^{are} ~~they're~~ drafting women and children. Rounding up all able-bodied Tibetans - at the point of ^{the} bayonet.

Forcing them to clean up the rubble - left by the Red bombardment.

Also we hear that Tibet is being deluged - with Communist propaganda. Furious tirades - against the Dalai Lama. Tibet's God King - denounced as "an agent of the west." The Reds, calling him - "the last of the Lamas." Tibet, to be driven from Lamaism to Communism - says Mao Tse Tung's radio.

But not all Tibetans - are captives of the Chinese. The Khamba, fighting mountain people, are still holding out - in their remote valleys. The hard riding men of Kham - vowing to take up the fight again, whenever the Dalai Lama - from his sanctuary in India - gives the word.

Information to be used - in our next attempt to put an animal into orbit.

SATELLITE

The failure of Discoverer the Third - was caused by a mistake in geometry. The rocket achieved the proper speed - eighteen thousand miles an hour. Enough to escape - the earth's gravity. It got high enough - a hundred and forty miles. But the angle - was wrong. An error by the scientists ⁱⁿ ~~who~~ figured ^{ing} ~~out~~ the geometry of space.

Instead of going into orbit - the rocket zoomed up - and then down, through a gigantic arc. Plunging toward the earth - burning up in the atmosphere.

The four mice aboard - casualties of the mistake in geometry. But they had a ~~few~~ ^{and will get} moments of glory ~~in~~ a paragraph in the books on ~~the~~ space exploration. Because, their blast off was - perfectly recorded on the scientific apparatus. The "Moon Mice" - telling the scientists what it felt like - when they suddenly became weightless.

Information to be used - in ~~the~~ ^{the} next attempt to put an animal into orbit.

FLYER

San Francisco's "flying grandfather" - lands at Los Angeles, with a new record. Max Conrad, who left Casa Blanca, Morocco, on Tuesday, flying - a Piper Comanche.

By the time he arrived over El Paso, Texas - the "flying grandfather" already had broken the record he was shooting for. Six thousand, nine hundred and fifty-eight miles - in a single engine plane. Instead of landing at El Paso, Don, he flew on to California - another seven hundred miles.

At, later, the words were changed, "Good morning to all" becoming "Happy birthday to you."

Now, Don, let's all rise and, act sing Happy Birthday!

SONG

Here's a question - what's the most popular song in this country? What song is sung the most? The answer is given by Dr. Sigmund Spaeth, the well known musicologist, in his new book - "Fifty years with music!" A fascinating book, whether you know a note!

Dr. Spaeth relates how, in Eighteen Ninety-Three, Mildred and Patty Hill, two sisters, both school teachers - wrote the song named- "Good morning to all."

And that's the most popular song in this country, today. The catch being - that, later, the words were changed, "Good morning to all" becoming "Happy birthday to you."

Now, Don, let's all rise and, not sing Happy Birthday!
