

GOOD EVENING EVERYBODY:

Tonight West Germany's "Rolling Embassy" is headed toward Moscow. The train with thirteen cars - carrying West German experts to the Soviet capital. The first West German train to travel through Soviet territory

This "Rolling Embassy" was deemed necessary for the coming conference between Chancellor Adenauer and the Russian leaders - because West Germany has no embassy there no diplomatic relations with the Kremlin. Hence no suitable facilities in Moscow, for the experts and aids Adenauer has with him.

The West German delegation will live in the "rolling embassy". The train, equipped with everything - from a sound-proof ~~CONFERENCE~~ conference room, to refrigerators containing light German beer and pretzels, so we hear.

The Chancellor, himself, is not aboard this so-called "rolling embassy". He'll fly to Moscow on Thursday - aboard a constellation of the new West German airlines.

ALGERIANS

The French police rounded up hundreds of North Africans today - most of them, Algerians. The point about the story, being - that the crack down took place in France.

We've already heard about the Algerian problem in France. Algeria is legally part of the French nation. All Algerians having full French citizenship with thousands of them emigrating to Paris. The "little ~~Algiers~~ Algiers" section of the city on the Seine - has become more and more of a problem in recent years. More so than ever since violence broke out in North Africa.

Hence today's raid. The Paris police, rounding up Algerian Nationalists. Terrorists to be shipped back to Algeria, to add to problems there.

~~Now~~ Meanwhile, in Morocco, French troops, supported by ~~the~~ tanks and planes, have been in action against Berbers who have refused to surrender.

From Paris to the Atlas mountains and to the Sahara beyond, the French more than have their hands full.

ADD ALGERIANS

The Sultan of Morocco still refuses to abdicate.

In a formal statement today, Sidi Mohammed Ben Moulay Arafa repeated that he must fulfill ~~his~~ his "divine mission."

He insists that Allah made him Sultan - and only Allah can remove him. So far Allah hasn't given him any sign ~~to~~ to abdicate. So he refuses to step out at the command of mere mortals - the politicians in Paris.

ISRAEL

(Israel apologizes to Egypt. The reason, an attack across the Gaza frontier - after both sides had agreed to a cease fire.)

Yesterday, Egypt and Israel accepted a deadline - set by ^{Cambodian} General Burns, of the U N .. But ~~him~~ shortly afterward, an Israeli patrol advanced into Egyptian territory. There was a battle. Three Israeli soldiers ~~were~~ were killed - and one captured.

Now General Burns has reported to Cairo - that the incident occurred by mistake - and the Israeli government is sorry that its patrol violated the armistice.

The apology is taken as a hopeful sign - that both sides will try to keep the peace. Egypt did not retaliate for the attack. And now Israel apologizes for it.

EGYPT

Western diplomats are worried about that Egyptian statement of last night. Cairo, declaring that it would accept arms from the Russians - if the other powers refused to sell guns to the Arab states.

Britain, France and America - have kept down the traffic in arms. The three western nations, anxious to keep a balance of power in the Middle East.

That balance of power would be upset if the Kremlin started delivering guns and ammunition to the Arab states.

Which would certainly touch off an Arms race - because the big three, ^{supposedly would then} ~~would have to~~ supply Israel. And the whole situation might ~~blow up~~ blow up into a full scale war. The West is worried about that possibility.

The President of the United States was criticized today - by a former President. Harry Truman, giving his opinion of Dwight Eisenhower's administration.

Mr. Truman spoke in Detroit, from the steps of the City Hall. ~~It was~~ ^T the same platform from which he launched his campaign for the Presidency in Nineteen Forty-Eight.

And today's address sounded like the old Harry Truman's a slam-bang "give em blazes" attack. The ^{just} ~~substances~~ of the speech ^{that} ~~President~~ Eisenhower's administration is good for business men - and bad for labor. And, of course, the former President went on to say that the Democrats are the friends of labor. ^{Then} ~~he~~ he appealed to the American people - to support the Democratic candidate in Nineteen fifty-six.

Who will the candidate be? Mr. Truman carefully avoided ^{peering into the crystal ball,} ~~anything that looked like a prediction.~~ He simply said we should all vote Democrat - no matter who ^{is.} ~~the candidate~~

~~Yes, Harry S. Truman was in good form today. He~~

He sounded in high spirits, And ~~he~~ looked physically fit -
although he admitted that he had to slip away from his wife
and his doctor - to make the Detroit speech.

NIXON

(Top Republicans are optimistic about President Eisenhower accepting re-nomination in Nineteen Fifty-Six. So says Vice President Nixon.) Mr. Nixon, speaking before ~~his~~ news conference today, *said that*

~~He says~~ one reason for the ^{is} optimism is that President

Eisenhower is in good physical condition. *No reason for* our Chief Executive

~~won't have~~ to step out - because of ill health. *also* And G O P

leaders believe he enjoys his job more than *he did at first and will* ~~even would like~~

be willing to take ~~to have~~ it for another four years.

Vice President Nixon also *stated* ~~mentioned the fact~~ that

the Republican party is stronger than it was a year ago *partly* because

the issue raised by Senator McCarthy is no longer a problem.

As the Vice President sees it, the President and the Senator

were involved in a show-down and the Republican Party lined

up solidly behind Mr. Eisenhower.

So ~~Mr.~~ ^{Mr.} Nixon is confident that he knows who the

Republican candidate will be. As for the Democrats, he

mentioned Stevenson, Harriman and Kefauver. The Vice ~~President~~

adding that we should not under-estimate Kefauver. ^{that} The Senator
from Tennessee, ^{is} sure to be a strong candidate for the
Democratic nomination ^{this time.}

RUSSIANS

One of these Russian observers at our National Aircraft show in Philadelphia said today that the American Air Force is superior to the Soviet Air Force. The information comes from a Brazillian - who acted as interpreter. Elizer De Santos accompanied the Russians through the exhibits; answered their questions about the planes on display; and gave them other information.

Now De Santos afterward said that one of these Russians told a Columbian officer - about our superiority in the air. That all sounds rather round about. Russian to Columbian, to Brazillian to us. By the way, those Russian observers are something of a mystery. No one seems to know whether they were invited in the first place. They didn't have passes - and no one thought to ask them for tickets. They just walked in - dressed in their Soviet uniforms - and watched what was going on. The first day, they saw the Army, Navy and Marines, put on their demonstrations. The second day, they got a look at our Air Force.

All the while, they were taking photographs -

and asking technical questions. ^{And} It never occurred to anyone
to inquire who gave them permission to attend the proceedings.

AMERICANS

Two more American soldiers have returned from Soviet captivity. Privates Wilfred Kumis, of Amesbury, Massachusetts - and Michael Feingersh, of Brooklyn. They say they're glad to be back. ^{These two are} ~~But they're both~~ listed as ^{AWOL} ~~absent~~, ~~without leave~~ for more than seven years. So, they may be court martialed.

With them was a civilian - one, Frederick Hopkins, ^{who at first} ~~At first he insisted~~ that he was an American. But ^{it was discovered} ~~our officials soon proved~~ that he was not, ~~and then he~~ ~~admitted it.~~ So far, they haven't been able to find out just who this Frederick Hopkins is - or where he ^{does} come from.

Along with these ~~three~~, ^{also} the Russians liberated more than twenty other ^{S.} ~~prisoners~~. Some of them are Dutch ^{- who} ~~and they~~ say they've been in Soviet prisons for more than ten years.

SUSPECTS

Tonight a batallion of the State National Guard -- is stationed at the jail in Greenwood, Mississippi. For fear that two men inside may be ~~kyn~~ lynched.

Roy Bryant and J. W. Milam, both white - are accused of ~~murder~~ murdering a negro boy from Chicago, Emmett Till. They admit that they kidnapped him - claiming that he insulted Bryant's wife by whistling at her. They insist they released him unharmed.

But Emmett Till's body was found in a river. He had been shot to death. Whereupon Bryant and Milam were arrested.

There are rumors that automobiles have been pouring into Mississippi - cars with Illinois license plates. The drivers, negroes. And the jail has received several tips - that an attempt would be made to ~~in~~ lynch Bryant and Milam.

The sheriff asked ^{the governor} ~~the government~~ for help, and the National Guard, a batallion strong is now on guard at the Greenwood, Mississippi, *Jail*.

SHOEMAKER

The lucky shoemaker from New York City -is back in his native Italian village, Gino Prato, who became famous and rich on a TV program - arrived in the town of Statale today. Where the first thing he did, was mebrace his ninety two year old papa right there in the village square.

To reporters, the shoemaker repeated - that the elder Prato was responsible for winning that thirty-two thousand Meaning, that it was the father's advice that restrained him from going for the sixty four thousand.

No wonder ~~Qm~~ Gino Prato is grateful. Now that he's in Italy, he's a millionaire. Thirty two thousand American Dollars equals twenty million Italian lira. So the shoemaker is a millionaire, as long as he stays in sunny Italy.

LABOR DAY

Every Labor Day - in fact every summer holiday - we get statistics - that make us shudder.

This time the National Safety Council predicted there would be four hundred ~~deaths~~ fewer of us after this Labor Day. Tonight we are told that, alas, that prediction is coming true.

One reason - the weather. Glorious almost ~~anywhere~~ everywhere. Countless thousands of cars on the road. In fact twenty five million of them! Causing the biggest traffic jam in history. Again pointing to the fact that our highways are inadequate - and our drivers take too many chances.

EARTHQUAKE

The earthquake that hit California yesterday - was

the third ^{most violent} ~~strongest~~ in the past ten years. Only two ~~persons~~

were injured, - and the damage ~~was~~ minor. But the quake jolted

the area around Berkeley - and registered strongly on the

^{instruments} ~~seismographs~~ at the University of California. It lasted for

about thirty seconds - with after-shocks continuing for

fifteen minutes after the initial jolt. The great San

Francisco quake of long ago only lasted 15 seconds longer.

HURRICANES

The weather news today is all about "Gladys" and "Flora". At sixty miles an hour "Gladys" drenched the lower Rio Grande Valley with torrential rains.

Her sister "Flora" coming up from ~~the~~ South Atlantic, tonight reported ~~near~~ northeast of Puerto Rico. "Flora" a real hurricane moving at ninety miles an hour. Flora's destination still unknown.

RECORD

The Air Force announces a new speed record. Colonel
Horrace Hanes, of Edwards, California, flew a sabre-jet - at
better than eight hundred miles an hour. ~~The Colonel did it last~~
~~month~~ Over the Mojave Desert. His time, almost seventy miles
an hour - faster than the previous record.

BALLOON

That giant balloon is still floating over Minnesota, more than twenty miles up. It should have returned to earth last Thursday. But its timing mechanism broke. So we hear the balloon hangs way up there - between Duluth and International Falls.

The scientists say that all they can do now is wait. That eventually, the balloon will deflate - descent to airplane level. Then some airman will shoot it down. But it may be weeks before that happens.

The scientists ~~are~~ already know that part of their experiment has been ruined. The animals aboard have succumbed. The oxygen running out on the mice and the guinea pigs.

But the rest of the experiment should be okay. They say their instruments should be recording valuable information about ~~the~~ cosmic rays - twenty miles up in the ~~the~~ stratosphere. Information they'll have when the balloon descends. The balloon that went up, ^{Hugh - and so} ~~and stayed up~~ far has refused to ^{come} down.
