

OLYMPICS

L.T. - Olds. Friday, Aug. 26, 1960.

At the Olympic Games in Rome there was sudden tragedy on the opening day for athletic events. There were a few yesterday. Danish cyclist, Knud Enemark - dying in the middle of the race, from sunstroke. Rome - sweltering. And Rome really can be hot in August. The athletes were all feeling the heat. Knud Enemark succumbing to it.

He was in the hundred kilometer cycle race. That's about - sixty three miles. Shortly after the fifty mile mark he began slowing down, then to wobble - collapsing over his ~~fix~~ bicycle, dead by the time they got him to a doctor.

The Danish cycling team immediately withdraw in tribute to their team mate. However the rest of the athletes from Denmark will continue in the competitions.

The first gold medal of the 1960 Olympics was won by the Italian cyclists.

And in the swimming trials, America's Chris Von Saltza set a new Olympic ~~an~~ record - for women, in the

hundred meter free style. In the furnace heat of the
Eternal City where Vulcan poured on the heat today and a
Viking from Denmark perished.

IDEOLOGY

Tonight the capitals of the world are buzzing - about the ideological split between Russia and Red China, and the special memorandum - drawn up by Khrushchev, which we are told has gone out warning the satellite states that the present Kremlin line on co-existence is the only right one. The Stalinism of Mao Tse Tung is dead wrong, according to Khrushchev.

Naturally, the boss of the Kremlin - doesn't mention any names. But the Khrushchev phrase "hopeless dogmatist" can only apply to Mao. So, there seems to be a real collision - between the two Red giants?

WINTERS

The American diplomat just expelled from Moscow - formerly was with our Central Intelligence Agency; George Winters - a secretary at our Embassy in Moscow. His past connection with the CIA is probably the reason why Khrushchev decided to oust him.

As the world knows, took over by force - claiming to represent the will of the people. He promised a free election, but has shown no signs of allowing one.

Turning to Castro's accusations against the United States - Secretary Rortner invited his colleagues to set up an investigating Committee, the Committee, to hold sessions - in both the United States and Cuba, then report back - to the U.S.S.

He promises our full cooperation - in showing how absurd Castro is when he accuses us of planning a military invasion of Cuba.

HERTER

The American Secretary of State today referred to the Premier of Cuba as a dictator. Secretary Herter, in addressing the Organization of American States - at San Jose, Costa Rica, pointed out that the people of Cuba - have not been allowed to vote on their government. Castro, as the world knows, took over by force - claiming to represent the will of the people. He promised a free election, but has shown no signs of allowing one.

Turning to Castro's accusations against the United States - Secretary Herter invited his colleagues to set up an investigating Committee, the committee, to hold sessions - in both the United States and Cuba, then report back - to the O.A.S.

He promises our full cooperation - in showing how absurd Castro is when he accuses us of planning a military invasion of Cuba.

DOMINICAN

Americans in the Dominican Republic - have no diplomatic protection tonight. Our government, in breaking diplomatic relations - with Trujillo, called home our Ambassador. This was in accordance with the O.A.S. decision; and Washington is now considering further sanctions against Trujillo.

CONGO

The Premier of the Congo Republic today widened his indictment, ^{and} ~~nam~~ ^{ed} ~~ing~~ - more opponents. He now includes the French - as well as the Belgians.

Lumumba was referring to the other Congo Republic - the one that ~~was~~ used to be French, just across the Congo River. Its capital, ~~is~~ Brazzaville. Lumumba, charges that the French in Brazzaville - are, ~~cooperating~~ with the Belgians, ^{conspiring} against him. Brazzaville, ^{is} in the Congo on the north side of the river Congo, ^{and} ~~in~~ Lumumba ^{says it is} ~~is~~ "the seat of a spy network - directed against the Congo south of the Congo.

He says planes are flying from Brazzaville to Kasai Province, with arms for Kasai's Premier Kalonji, to help Kalonji keep Kasai independent of Leopoldville.

Lumumba today also repeated his attack on Dag Hammarskjold, demanding that Hammarskjold show more energy in getting the Belgians out of the Congo.

Senator Kennedy's speech in Detroit - calls
for stronger defense. ^{and} The Democratic candidate, accus^{ed}~~ing~~
his opponent of lulling the American people - into
complacency, Kennedy, ^{today told} ~~telling~~ the Veterans of Foreign
Wars - that despite Mr. Nixon, our position ~~is~~ in the world
is not what it should be. ^{and he} ~~Kennedy~~ ^{ed} ~~pledging~~ a build-up of
our military strength - if he is elected in November.

LABOR

The A F L - C I O leadership is for Kennedy -
with only one dissenting vote. The lone vote "no" -- Philip
Randolph, head of the sleeping car porters. The rest, [?] *They*
support~~ing~~ the Kennedy - Johnson ticket ^{and} ~~is~~ asking the union
rank and file to do the same.

NIXON

Vice President Nixon - today continued his swing through the South - Alabama and Georgia; making good his promise - to carry his campaign into the deep south. This is a bold Nixon bid to break the Democratic hold on the solid South.

and
Nixon/his wife, Pat, were greeted by enthusiastic crowds - in both states, cheered - and, showered with confetti. The Vice President, delivered strong political speeches - asking Alabamans and Georgians to vote strictly on the issues. He thinks if they do - there is a good chance of building up a two party system - in the deep south.

Last Sunday, the Cleveland Indians were at Briggs Stadium. Playing center field for the Indians was colorful Jimmy Piersall. The Detroit fans, are riding

BASEBALL

Detroit baseball fans are threatened with - ninety days in jail; if they don't behave themselves at Briggs stadium. So ruled - by the motor city's common council.

Detroit fans adore their fighting Tigers, and don't love any of the invaders who come there to knock off the Tigers. A couple of weeks ago there was a near riot when the hated New York Yankees were there. When Yankee slugger, Bill Skowran - hit a home run, and the umpire called it a fair ball, the Detroit fans - howled foul; and backed up their decision - with a barrage of fruit, eggs, and bottles.

A Yankee player was hit. The game was interrupted, and Casey Stengel complained while the grounds-keeper had the outfield cleaned up.

Last Sunday, the Cleveland Indians were at Briggs Stadium. Playing center field for the Indians was colorful Jimmy Piersall. The Detroit fans, in riding

Piersall became personal. And one bleacherite fired a ripe egg at him. The Indians - protesting. The umpires, asking the management - to restore order.

Now the Detroit City Fathers rule in favor of the umps; passing a resolution that could mean ninety days for any too rambunctious Detroit fans.

Shades of Ty Cobb, and his flashing spikes, and his brawls with players and spectators.

MARSHALL SPRAGUE

Marshall Sprague, author of Money Mountain,
and formerly with the New York Times, sends me word from
Colorado about an ~~unusual~~ historical event to take place
this weekend. ^{The place} ~~Sunday afternoon~~ high up on a mountain top on
the western side of Pike's Peak. ~~The actual place is a~~
~~smaller mountain~~ ^{Gfau} altitude just over ten thousand feet ⁱⁿ the
Cripple Creek Mining district, above Victor. ^{Here} More than three
hundred million dollars in gold was taken from Battle Mountain,
and a marker is ~~going~~ to be placed there telling about it. As
one of those who years ago ^{dug some} ~~helped a little toward digging~~
~~some~~ of that three hundred million in gold from Battle
Mountain, I wish I could be there, ^{on Sunday.}

PARTICLE

Now let's take a look at - the Pi Zero Meson.

It will have to be a quick look, for Pi Zero Meson - doesn't stay around long. Pi Zero Meson is an atomic particle - just discovered by American scientists. Its existence was revealed today at a meeting of physicists - at the University of Rochester.

What's so unusual - about the Pi Zero Meson? It has a life span of - one two hundredth quadrillionth of a second; if you can imagine that! The number two hundred - followed by twelve zeros. In that infinitely small fraction of a second - this nuclear particle comes into existence - and vanishes.

But, the physicists say it is one of the building blocks of the universe. And Pi Zero Meson to you, Dick.
