

CANADA

L.T. - Cads. Mon. Apr. 22 - 63.

Lester Pearson took his oath of office today - becoming fourteenth Prime Minister of Canada.

4672 He was sworn in at the bedside of the ailing Governor General, George Vanier - along with about twenty members of his Cabinet.

The Twenty-Sixth Canadian Parliament now consisting of - one hundred thirty Liberals; and the Loyal Opposition led by ex-Prime Minister Diefenbaker - with ninety-three Conservatives; twenty-four members of the right-wing Social Credit Party and seventeen left-wing New Democrats.

47 The new Prime Minister announcing he will acquire - nuclear warheads for his country's armed forces, And maintain the "friendliest possible" relations - with the United States.

Most people think the Opposition will not be in too big a hurry - to topple Mr. Pearson's

government. The country - needing a breather. people
Tired of so many elections - two in the last ten
months, four in less than six years. by his - in this
moment of crisis.

The King's appeal comes after a weekend of
pro-Basser rioting which toppled the government and
established Hussein's Uncle - as Prime Minister.
Rumors from Jerusalem say that some of Hussein's
advisers want him to abdicate - to avoid a bloody
rebellion. But Hussein, backed by his loyal Bedouin
troops - seems to have weathered the storm. For the
moment anyway.

King Hussein's appeal for support in the Jordanian
parliament, which is expected to meet in Amman
today, may be the last step towards the formation
of a new government.

By Terence... of the

King Hussein's appeal for support in the Jordanian

HUSSEIN

King Hussein of Jordan broadcast to his people today - and told them he would never step down from his throne. Appealing to them to stand by him - in this moment of crisis.

The King's appeal comes after a weekend of pro-Nasser rioting which toppled the government and established Hussein's Uncle - as Prime Minister. Rumors from Jerusalem say that some of Hussein's advisers want him to abdicate - to avoid a bloody rebellion. But Hussein, backed by his loyal Bedouin troops - ~~seems~~ seems to have weathered the storm. For the moment anyway. (5)

quest: The ~~speech~~ that Khrushchev made in Moscow today - ties in with what he said to an Italian newsman at a Kremlin interview. (1)

Let's take the speech first. Khrushchev, using the ninety-third birthday of Lenin - to describe himself as a true Leninist. A believer in the Leninist doctrine - of peaceful coexistence. But his argument is beginning to sound - a little forced. After all, if President Kennedy insisted on telling everyone that he believed in democracy - we might feel a trifle suspicious of his sincerity. And the point, as you know - is that the Red Chinese are indeed suspicious of their comrade in the Kremlin. In fact, they insist - that Khrushchev has betrayed Leninism.

As for that interview with the Manager of the Milan newspaper "IL GIORNO" - Khrushchev dodged the

questions about Red China, ^{and he} repeated his old ^{ple to}
theme - about the disarray of the Western Alliance, ^{of}
~~And~~ the unity - of the Red bloc. But he wouldn't
go into the problem of - just who is, and who is not, ⁽²⁾
a Leninist.

A nice dilemma for the tradition of Lenin -

on Lenin's birthday.

Dr. Gill has just arrived in this country ^{to help educate us by} to spend some months
as a guest professor at the University of Hawaii, the University
of Utah in Salt Lake, where he is at the moment, Texas A & M,
Indiana, Ohio University, Wisconsin, University of California,
University of Washington at Seattle, and so on.

He will also spend considerable time at the University
of Colorado, doing special work there on cosmic ray variations.
I'd like to explain what that means, but I'm afraid it would
take all the rest of this broadcast, and then some! In fact,
I'd have to have Dr. Gill do it for us.

DR. GILL

As you know, we are constantly sending our people to all parts of the planet, to help others with their problems of economics, government, education, and religion. So, it's rather exciting when you hear of it being done in reverse.

One of the world's foremost scientists in the complex field of cosmic radiation, is a handsome, genial gentleman from India. Physically, he has the build of a Notre Dame fullback. Dr. Gill has just arrived in this country ^{to help educate us, by} ~~to~~ spend some months as a guest professor at the University of Hawaii, the University of Utah in Salt Lake, where he is at the moment, Texas A & M, Indiana, Ohio University, ^{Univ. of} Wisconsin, University of California, University of Washington at Seattle, and so on.

He will also spend considerable time at the University of Colorado, doing special work there on cosmic ray variations. I'd like to explain what that means, but I'm afraid it would take all the rest of this broadcast, and then some! In fact, I'd have to have Dr. Gill do it for us.

Years ago, when we were working on our T.V. High Adventure series, we paid a visit to Dr. Gill at his research laboratory in the western Himalayas, at Gulmarg. The Doctor picked one of the most spectacular sites in the whole world for his research laboratory. He looks right down on the glorious Vale of Kashmir, of which one of the great Mogul Emperors said: "If there be a paradise on earth, it is this, it is this, it is this!"

lowered to inspect it.

But the Navy is not optimistic about the chances of salvaging the THRESHOLD. Their chief hope at the moment - to identify the hull and learn something about its condition.

Meanwhile an expert on piping, today told the Navy investigators in Portsmouth it was "very improbable" - that a pipe joint on the submarine had failed in a deep dive.

THRESHER

The Naval experts in Washington tonight are sure that the THRESHER lies within a ^{ten} ~~hundred~~ square-mile area, off the Massachusetts coast; ^{in fact} ~~and~~ the Navy has narrowed its search to - six objects on the ocean floor.

Tomorrow, cameras from the oceanographic ship ATLANTIS II will try to - photograph these objects, ~~to~~ find out whether one of them - is the THRESHER.

If this is so, the deep-diver BATHYSCAPH^E TRIESTE will be ~~lowered to inspect it.~~ lowered to inspect it.

But the Navy is not ~~surely~~ ~~so~~ optimistic about the chances of salvaging the THRESHER. Their chief hope at the moment - to identify the hull and learn something about its condition.

Meanwhile an expert on piping, today told the Navy Investigators in Portsmouth it was "very improbable" - that a pipe joint on the submarine had failed in a deep dive.

PARIS

The Gendarmes of Paris have just broken up -
the "Little Rabbit Club". What's that? Why, a
club devoted to teaching its members - the age old
art of ~~love~~ amour,

The club - located in a chateau near Paris.
The little rabbits - about a hundred students of
both sexes. Spending the weekend at the chateau -
5 1/2 studying, ~~hard as ducks~~ Lessons interrupted by -
unsympathetic police, / And horrified parents,
Who nabbed the rabbits - coming out of the chateau,
And put them through a thorough examination - on
their studies.

COSMONETTE

The rumor is becoming louder in Moscow that the next cosmonaut - will be a cosmonette. That ⁽³⁾ is - a woman. *All we really know is* ~~Not much to go on except the fact~~ that the ladies ~~are known to~~ have invaded the Soviet space program. And Khrushchev likes to talk about - equality of the ~~Sexes~~ behind the Iron Curtain, ^{and} he sure could make a point - by sending a cosmonette into outer space. ~~Which, I suppose, is sufficient explanation for this rumor.~~ Florida to Maine. At ^{least} *Meanwhile* ~~the~~ the new Russian satellite is sending back information - about radiating heat, magnetism, and so on. All of which will be used - on the next flight of a cosmonaut. Or - cosmonette, Dick.

WEATHER

There is great variety in the weather news today - of the kind we could do without.

Snow in the Rockies - eighteen inches ^{of new snow,} ~~deep.~~

Windstorms - lashing the Midwest. Causing casualties, damaging homes and airports, disrupting power and communications. And on the Southern plains - a record-breaking, searing heat wave.

Meanwhile in the East - still no rain. And forest fires flaring up from Florida to Maine. At least three people killed, hundreds injured, damage in the millions.
