COMMUNISTS L.J. P. + S. Wednesday, June 2, 1940.

Washington this afternoon had its fx demonstration against the Mundt-Nixon Bill for Communist control. A crowd of four thousand formed on Capitol Hill, and pickets the White House - a crowd in which there was no lack of Reds and Pinks. There was plenty of noise and milling around? But that was about all. The police arrested two for disorderly conduct. But there was no real violence - as Communists, fellow travelers, Henry-Wallace-Third-Party-followers and sundry others made a concerted protest against the bill that would impose wer drastic restrictions on the Communist Party.

is - flood crest going, and flood crest coming. Today
the high-water level of the Columbia River dropped inches, as the crest of the flood moved down-stream to
the point where the Columbia pours its waters into the
pacific, at the same time, warning went out
a new rise of the river, coming.

Weather Bureau authorities have been keeping a close watch on the behavior of the myriad streams that flow into the Columbia, and these are surging again, pouring a new excess of water into the big river. That's the sign, the signal - that a new flood is building in the upper reaches of the Columbia, a new crest that will move down stream.

So the flood story may be told all over again, a repetition of the tale of the deluge which flooded twenty-five per cent of the city of Ratz Portland, inundated huge areas of land in several states and Canada, drove a hundred thousand people from their homes, and dank and a hundred million dollars. Wether damage. The hope

is that the second flood crest won't be that bad - the water that pours down from the mountains of British Columbia, ima Idaho, washington and we Oregon, as the heat of this early summer season melts the huge snows of a winter of blizzards.

DROUGHT FOLLOW FLOODS

The story of water on the rampage is accompanied by a contrast - as dry as the floods are wet.

There is danger of drought in the Middlewest - danger also of forest fires, a which already are raging fiercely in Canada.

The Middlewest is having a heat wave, and a lack of rain-fall -- a peril for the corn crop.

The fields are hot and dry, and so are the forests.

Rangers are taking precautions against outbreaks of flame in the woodlands - this as smoke pours across the northern border from giant forest fires in Canada. we hear the there's a haze over the Mississippi Valley, as far south as Kentucky - that much smoke from blazing Canadain woodlands.

In the Congressional uproar about the voice of America, an offer was made by the National Broadcasting Company today. The trouble was caused by radio pag programs broadcast by .B.C. to Latin-America, and now the big radio at network offers to let the Federal Government have the use of its short wave facilities for a fee of one dollar a year. The proposal is that the government should handle all oversease programs, take that responsibility in full, the radio network to withdraw entirely from international branksaingx broadcasting. Kiloli N.B.C. has three fifty-millimeter short wave stations, and offers to hand these over to the government for a buck a year.

APPROPRIATIONS

The House of Representatives has passed a six-and-a-mi-half-billion dollar bill, funds for the army and air force - and the Legislators are ready to act on an appropriation for the Navy, three-billion,—six-hundred million. All of which follows, warning issued today by our top defense command - warning that Soviet Russia is building an enormous war machine, Army and Air Force.

Congress has was advised - that "war is not impossible."

(Here's the latest on Palestine: - A dispatch from Tel Aviv quotes a spokesman for the government of Israel as saying that Jewish forces stopped firing at three A.M. today. The Jewish spokesman said that Israel is accepting the United Nations four-week truce proposal after two major lastminute minute strategic moves by the Jewish armies to protect their positions. "We have decided to risk the lives of our own people rather than risk violating the ceasefire order" said he." the live of our one people rather than rig violating the sesseline erder said he now it is up to the other side." And he adds that if the Arabs don't stop shooting by nightfall, the armies of Israel may start major operations am on all fronts."

As yet no word from the Arab states that the cease fire order has gone out to their troops who are reported to be still firing on five fronts.

The New city of Jerusalem being heavily shelled

(continue with original story)

The United Mations had accided to consider the Jewish and arab acceptance unconditional. To be sure, both Israel and the moslems, in agreeing to a U.N. truce, set forth assumptions and interpretations of what they believe an armistice would mean. But they did not lay down formal conditions, and that gives the security Council its cre - in deciding that both messages of acceptance are unconditional.

Council late this afternoon sent a message to the U.M.

mediator on the spot, Count Bernadotte of sweden
instructing him to arrange with Israel and the Arabs for
a cease-fire date, a definite time for fighting to stop.

Count Bernadotte, in Palestine, is working on that right

The Arab acceptance when the full statement from the Moslems was made public, today, had an unpromising look. The Arab States insist that, at the end of the proposed armistice of one month, they will definitely resume fighting.

unless the state of Israel is dissolved. This, of course, will never find any Jewish acceptance - which makes any truce look dubious, as a permanent thing. However, the U.N is eager to have the fighting stop under any circumstance and hopes for the best.

In London today, Foreign Secretary Ernest
Bevin disclosed the present status of Glub Pash., the
British officer who commands the Arab Legion. Glub
Pasha has resigned from the British Colonial Service, so
that he may retain his high military post in Trans-Jordan.

Important news from Germany - the western ellies have reached a full agreement for giving the people of western Germany a government of their own. For weeks there were secret negotiations between the United States, Great Britain, France, Belgium, the Metherlands and Luxembourg, with much bitter wrangling on what to do about getting up a German government in the zones held by the western powers. France, in particular made objections, the French always worried about & strengthening their old rivals - the Germans. But now all differences have been settled.

This was announced officially today, with an added word that a constituent assembly for the people of Western Germany will probably be set up in September .

A dispatch from abroad brings a new theory to explain the murder of George Polk, correspondent for C.B.S. in Greece. He was, apparently, on his way to try for an interview with the leader of the Communist Guerrillas, when he was killed. Some suspect the Communists while others think that George Polk was murdered by Greek reactionaries, the C.B.S. correspondent having been outspoken in criticizing various aspects of the present conservative regime in Athens.

Today's new theory emanates from the Greek.

Red Guerrillas, via Moscow, and declares that the American newsman was assassinated on instructions of, what Moscow calls - the -American secret police. The Red story is that George Polk was lured to his death in a trap laid for him - by the American Secret Police. But just what can this be, this American OGPU, this N.K.V.D. of the U.S.A. Americans will be puzzled.

Cuba has elected a new President - Carlos

Prio Socarras. The figures for the vote cast in the

election held yesterday, are still incomplete - but they

are decisive. Canaidate Prio, backed by the Havana

Government, is running far ahead in all six pax provinces

of Cuba - and his election is conceded by his chief rival.

There were four candidates in the race, and last place goes to the Communist, whom the incomplete figures show to have a mere ninety-nine thousand out of nearly a million was three hundred thousand was votes polled thus far.

Today's news tells the results of a primary election in South Dakota yesterday - and, along with the figures comes a vision of daring peril in distant tropical skies.

In Minnehaha County, Candidate Joseph
Jacob Foss has won the Republican nomination for the
State Legislature. That's equivalent to being elected
in November, because the Democrats are not making any
contest in that County. So now we'll have State
Representative Joseph Jacob Foss, who will plunge into
Legislative problems, debates, bills and resolutions.

But mm memory will hark to back to wild scenes in the South western Pacific, whirling planes, rattling machine guns, air battle on high. Because the newly elected State Representative is Lieutenant Colonel Joe Foss, who won fame by being the first American pilot in the Second world war to equal the record established by Eddie Rickenbacker in world war One, the record of twenty-six enemy planes shot down.

Yes, Joe ross will now busy himself with aull

matters of taxation, state budgets and nighway problems.

But his comrades of the South Pacific will think of him in terms of breathless adventure - like the day off Guadalcanal, when Joe Foss with a squadron of Marine Corps Planes, was flying up there at the ceiling, twenty-nine thousand feet high. He got into a fight with a Jap zero, caught it square with his machine guns, and sent it plunging like a rock down to the Pacific far below.

But, fast as the zero fell, Joe Foss

plunged faster, because way down there, nearly six miles

below, he spotted a couple of Jap Torpedo planes, flying

at low altitude. Down he went in a roaring power dive,

going after the two torpedo planes. At the end of the

stupendous dive, he leveled off and shot down one of them.

ne sent it crashing into the ocean before the zero, which

he had blasted far above, feel into the water. In the

dive of nearly six miles, Joe Foss had beaten the falling

x zero seconds to spare, by enough them to shoot

another Japanese plane into the sea.

But now it will be committee hearings and

Legislative enactments for South Dakots State Representative Joseph Jacob Foss.

but, it will be something else for a war hero Lieutenant in Illinois, a salesman who, unfortunately, was never in the Army, let alone the war. In a Chicago Court today, he pleaded guilty of falsitying Army remains records, in which he bestowed upon himself both military rank and exploits of valor.

but never had A chance. He dreamed of exploits of courage and first glory, but a defective arm kept him out of the service. So all he

could do was go to work for the army as a civilian.

for himself, and putting it on file.

he was assigned to the 'Officers' Records Branch, where he had to copy and file away citations for valor, official accounts of the exploits of officers in battle. It was the depth of frustration the salesman who longed to be a war hero handling the hero-records of others. It was also a full sole temptation. If filled in his dream by making out a record

On paper, he made himself a Lieutenan.

Lieutenant, and assigned himself to a glorious branch of the service - the Paratroopers. The theatre of war he chose was Europe, the second front invasion, D-Day. He composed citations honoring exploits in battle that he figured out for himself as a soldier of the sky. He classical awarded himself numerous medals, including the bronze star, the combat infantry and the purple heart with oak leaf cluster - almost everything except the Congressional Medal of Honor.

That was as near as he could come to making his dream a reality, a dream that exploded with a final melancholy bang in a Chicago Court room today - as he pleaded guilty of falsifying Army records.

substant has loss been a bit by in the

America has a new visitor, a most unwelcome guest, named Nematode. In case you are not acquainted with him, let me make a formal introduction by saying that Nematode belongs to the Phylum Nemathelminthes, Today in Washington, the Department of Agriculture asked Congress to put up half a million dollars a year - all for the purpose of getting rid of the Nematede. It sounds serious - and it is.

Recently, on New York's Long Island,
farmers noted that their tomato and potato plants were
looking sick - leaves withering, plants wilting.

Investigation disclosed a tiny white worm, something like
a piece of string - the Nematode. Which was surprising,
because that particular type of pest had never before
been known on this side of the atlantic - although the
M Nematode has long been a blight in the tomato and
potato patches of England, ocotland and Ireland.

thow did the pest get over here? No hody
thows. Its merely another case of unwelcome immigration
in the world of worms. Having found a new home on Long

Island, the wematode is likely to follow that old merican advice, "Go west Young Man, to west." That is, unless something is done about it.

Today whief Entomologist of the repartment of Agriculture S.A. Rohwer told a Congressional Committee that the string-like worms feed on the roots of tomato and potato plants, and their eggs are so light that they're blown by the wina, like dust, for long distances. Hence the urgent need of doing something to get rid of the unwelcome guests. So, the farmers far and wide may have uninvited visitors by the name of - Nematode. Phylum Nemathelminthes. — and Now Nel. Case.
