

L.T. SUSTAINING, FRIDAY, MAY 19, 1967

GOOD EVENING EVERYBODY:

Crisis in the Middle East -- marked today by a chilling ceremony in the Sinai Desert. That U.N. peacekeeping force stationed in Egypt -- bowing to demands from Cairo. U.N. troops -- lowering their flag for the last time; then withdrawing to the ancient city of Gaza -- famous for another crisis when Samson pulled down the temple. From Gaza they'll return to their native lands.

For the first time in ten years -- the Arab-Israeli frontier wide open once again to any potential invader.

A situation -- in the words of U.N. Secretary General U Thant that "may have grave implications for peace."

As it to underscore U Thant's statement -- troops of the militant Palestine Liberation Army -- immediately taking up former U.N. positions -- with the Arab radio calling for a "holy war" against Israel. A war also --

"to destroy" U.S. oil interests in the Arab world.

[The remainder of the page contains extremely faint and illegible text, likely obscured by the large white scribble or due to low scan quality. Some faint words like "Washington" and "troops" are barely visible.]

## VIETNAM

Now -- Vietnam. The U.S. State Department calls it -- "purely" a defensive measure. Both Hanoi and Moscow call it -- "a new and extremely dangerous escalation" of the war. The U.S. Marines call it -- a vital necessity. All talking about the same thing; that U.S. and South Vietnamese invasion -- of the buffer zone separating the two Vietnams.

Fifteen thousand Allied fighting men -- crashing into the southern half of the six-mile-wide D.M.Z. Now demilitarized -- in name only. Their assigned job -- to find and destroy an estimated five thousand Viet Cong; now using the D.M.Z. as a base of operations against the South in violation of the Nineteen-Fifty-Four Geneva Agreement.

Washington pointedly asserting -- that Allied forces will not cross the center of the buffer zone; that they will not cross the border -- into North Vietnam. Further, that U.S. troops will remain in the area -- "no longer than necessary."

However, this from a Marine commander in the field. The Viet Cong -- said he -- "ha<sup>ve</sup> been using the D.M.Z. for a sanctuary -- they've violated the damn thing -- so we're sick of it -- we're going to clean them out."

Meanwhile, a massive U.S. air strike today -- against a previously untouched power plant barely two miles from the center of Hanoi. Along the way -- American jets downing three MIG interceptors.

# KASHMIR

The world does have its troubles! With more trouble today in Kashmir. Rawalpindi accusing Indian troops of crossing into Pakistan territory -- allegedly to attack a Kashmir border post. The fighting -- said to have flared all day. Rawalpindi calling it -- the worst clash since that brief Indo-Pakistani war of two years ago. Few details.

WALTER REED

After thirteen days in Walter Reed Army hospital -- former President Eisenhower was finally released today. A bit weak from that recent illness -- but, otherwise, in "fine" condition. And ready once again -- to serve his country.

Newsmen recalling that President Johnson had asked Ike a few months ago -- to make a good-will trip to Vietnam. To which the General replied he's still "ready to go" -- whenever President Johnson gives him the word.

Ike further calling the war in Vietnam -- "a nasty war;" one almost certain -- to breed "differences of opinion" -- said he. "But I believe we must win" -- said he -- adding that "protesters are in the minority" -- and mostly "misguided people."

Now it's back to Gettysburg -- to regain his strength.

## SENATE

On Capitol Hill -- Senator Dodd of Connecticut today won an extension -- of three weeks and a day; to ready his defense against a committee recommendation -- that he be censured for violating Senate ethics.

The first three weeks of delay by agreement of Senate leaders -- at the request of Senator Dodd himself. Setting a tentative start -- for June Twelfth. The extra day added later -- at the request of Senator Pastore of Rhode Island; and providing one light touch -- to an otherwise somber occasion.

Senator Pastore explaining: "On June Twelfth my son graduates from medical school. I've waited twenty-five years for this" -- he went on. Adding he'd sure hate to miss it.

A moment's hesitation -- and then the reply from Senate Majority Leader Mike Mansfield, a father himself. Okay -- said he -- "June Thirteenth."

## LINDBERGH

If you happen to hear a buzzing in your ears this weekend -- here's the explanation. It'll be the sound of a Hundred Thousand private planes -- taking to the air; as part of a nationwide tribute -- to Charles Lindbergh -- The Lone Eagle.

This extraordinary "fly-by" -- sponsored by the Silver Wings. Veterans all -- of at least twenty-five years of flying. Paying homage to one of their own -- on the Fortieth Anniversary of his daring solo flight -- New York-to-Paris.

Forty years ago tomorrow -- Charles Lindbergh left New York. Forty years ago Sunday -- he arrived in the French capital. A triumph of determination, daring -- and skill.

Later telling of the ultimate thrill -- in his famous book, "The Spirit of St. Louis," said he: "I'm still flying at four thousand feet when I see it -- that

LINDBERGH--2

scarcely perceptible glow -- as though the moon had rushed ahead of schedule. Paris is rising -- over the edge of the earth!"

So the climax -- to one of the great flights of all time.

## LIONS FOLLOW LINDBERGH

Another anniversary of note -- that of the world's largest service club. Lions International -- with close to a million members in nearly every country of the world; now celebrating fifty years -- of service to mankind.

And the theme of the Lion's Fiftieth Year -- that "Peace is Attainable."

WASHINGTON

One of the biggest contracts in aviation history-- awarded today to the Douglas Aircraft Corporation. An order from the Air Force--in the amount of Six Hundred and Seventy-Four<sup>Million</sup> dollars; or roughly--two-thirds of a billion. For planned work--on the Manned Orbiting Laboratory program.

A second contract--to McDonnell Aircraft; for a Hundred and Eighty Million--on the same project.

CHICAGO

In Chicago -- the medical profession was charged today -- with totally ignoring one of the greatest killers of modern time:

The doctors' accuser -- a doctor himself; Dr. Robert Hess -- a traffic safety expert from the University of Michigan. Total cost of medical research last year -- said he -- an average of about Two Hundred and Twenty dollars for each of an estimated half-million cancer patients; about Seventy-Six dollars -- for each of a Million-and-a-half cardiovascular patients; but only about fifty cents -- half-a-buck apiece -- for the country's ten million accident victims.

On the same subject -- a story today from headquarters of the New Jersey Highway Authority. Telling of a recent study of high-speed accidents -- on a crack new superhighway.

Over the twelve months of the study -- about forty per cent of all injuries occurred in accidents involving small cars -- compacts and foreign models. What's more, nearly half of all deaths -- occurred again in accidents involving small cars. Yet these same small cars -- accounted for less than a quarter of total traffic in question.

As a result -- New Jersey's leading traffic official -- recommends that small cars should be banned from high-speed superhighways. "From what I've seen" -- said he -- "small cars, high winds and fast roads are incompatible."

LONDON

 book that annually tells the counts from the counterfeits -- published today in London. Debretts Peerage coming up with the possibility -- that two Americans are in line to become British earls. Also listing -- some surprising genealogies.

Of the two in line for titles -- one is Bladen Horace Capell -- a forty-six-year-old supermarket clerk in Yuba City, California; who may become -- the next Earl of Essex. The second -- if he can be found -- eldest male descendant of one John Breadalbane Campbell -- who died in Florida in Nineteen-Eighteen. Lucky gent -- to become the next Earl of Breadalbane.

Among the genealogies -- one for Charles DeGaulle. Raising the possibility that he's a branch of the same family tree -- that gave us George Washington, Franklin D. Roosevelt, Sir Winston Churchill and Queen Elizabeth the Second.

~~(KOH)~~  
~~Quei irony!~~

## CHARLOTTE

A weird story comes today from Charlotte, North Carolina. About a so-called "faith healer" by the name of Carey Maxwell -- who bills himself as "The Saviour."

Maxwell running a foul of the law -- when he tried to cure a case of blindness. That of an elderly man -- who lost his sight in a dynamite explosion nearly forty years ago.

When the "patient's" wife arrived on the scene -- she found Maxwell beating him about the head. "Trying to make him see again" -- as he put it. By the time police arrived -- the man was dead. A victim of what police call -- "overzealous religious fanaticism."

As for the "Faith Healer" he's now facing a charge of homicide.

## FASHIONS

Here's a shocker! Soon to appear in the world of fashions -- skirts for men. Says a top fashion designer, Elizabeth Hawes.

No if's, ands or buts about it -- says Miss Hawes. She says flatly that men are now "psychologically ready" -- to change from trousers to skirts. Perhaps not for business wear at first -- said she -- but certainly for leisure wear; "for at home -- for golf," and so on. James, I'm going out for the evening -- bring me lame mini skirt!

Miss Hawes once wrote a book called "Fashion is Spinach." What say you, Warren -- as I say solong until Monday.
